

# Machu Picchu

*Performance Rug*

Hafizia™

FEATURES, ADVANTAGES & BENEFITS

Woven with UV stabilized 100% polypropylene yarn, the rugs are weather resistant, outdoor safe, light in weight, strong, and easy to clean. The Rugs do not felt with washing or wear and are completely resistant to insects and micro-organisms.

Here is a list of benefits that the Rugs have to offer:

Washable

polypropylene is one of the more durable synthetic rug fibers. It can be washed in the machine or hand-washed with mild dish detergent.

Chemically Inert

PP is almost a non-reactive fiber, having excellent chemical resistance to acids and alkalis.

Easy to clean

they are easy to maintain as don't absorb the grime and dirt particles stay above.

Water resistant

Do you have a swimming pool outside? Consider covering the patio around it with a polypropylene rug. The moisture regain of polypropylene fibers is so small as to be insignificant, and water has almost no effect on tensile strength, nor does it cause any noticeable degradation in the fibers.

Recyclable

it's fully recyclable and reusable. Polypropylene recycling process comprises of the collection, sorting, cleaning, reprocessing by melting and then producing new products from the recycled stuff.

Solution dyed & color fastness

The only possible way to dye the polypropylene fiber is solution/ dope dyeing. It cannot be dyed conventionally. Hence, the colors are very fast to light and rubbing.

Effect of sunlight

The addition of UV stabilizers during the solution dyeing process helps polypropylene fibers resist polymer degradation in UV light

Resistant to mold and fungi

Polypropylene fiber does not support the growth of mildew, fungi, or bacteria. It cannot be digested by insects and related pests, such as white ants, dermestid beetles, silverfish, and moth larvae.

Stain resistant

No fear of dropped food and spilled drinks like coffee or red wine; smudges are easy to wipe off with a damp cloth.

Durable and strong

made to handle extreme weather conditions, and messes; polypropylene rugs are good choices for an outdoor environment.

Smell-free

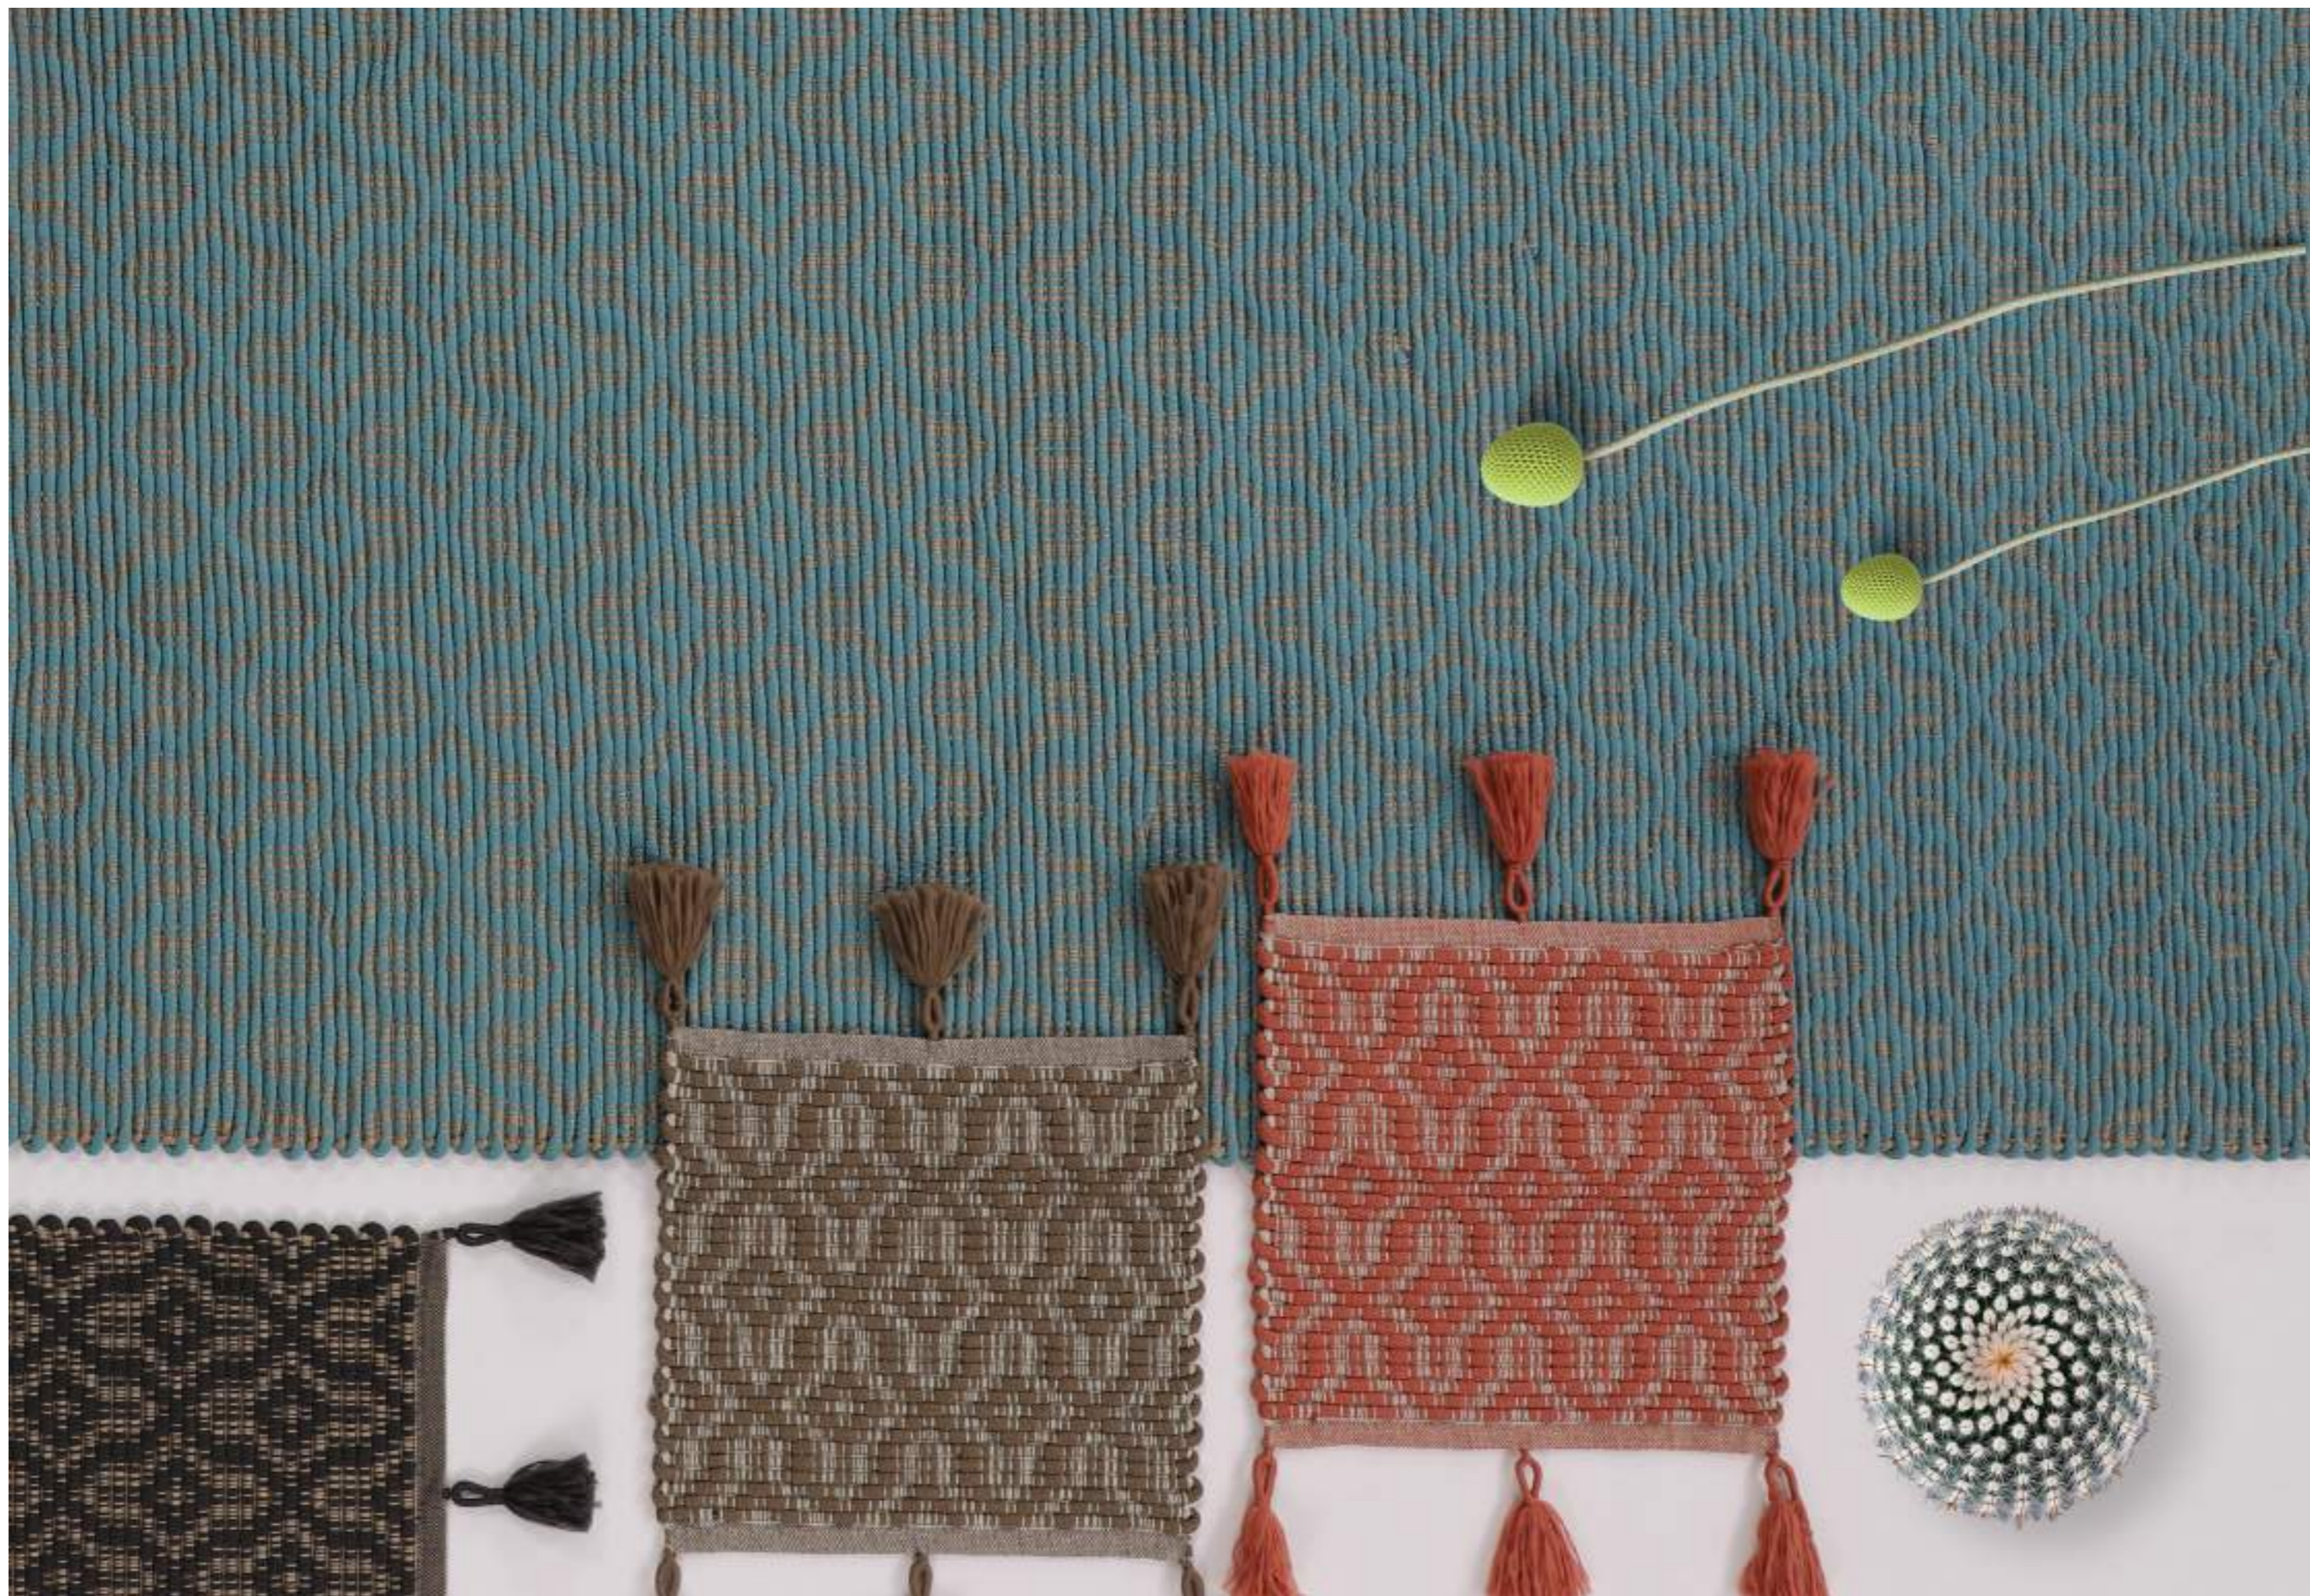

Won't hold any unpleasant smells at all.

Light Weight

The density of polypropylene is quite low (0.91 g/cc), compared to other synthetic, polyester (PET) for instance (1.38 g/cc). The diameter of PP fiber is therefore proportionally higher than the polyester fiber of the same denier. As a result, thicker and bulkier Rugs are made with PP, for a given count of yarn and area density.

## About us

Hafizia Art & Crafts Pvt. Ltd. is an Indian export-oriented Company, producing an exclusive collection of hand-woven and hand-tufted Rugs and Carpets, along with a wide range of hand-made home furnishing accessories, Cushions, Poufs, Stools, Baskets, Handbags for instance. The company is a member of Good Weave International and the products are created respecting ecological & ethical values. With its foundation laid back in 1992 by H M Akram, in the hub of State government recognized city for Rug weaving, Sitapur (Uttar Pradesh), the company has since designed products that have reached 40+ countries globally.

## Our Vision

To serve our mother earth by introducing upcycled & recycled products with minimum wastage of natural resources. Spreading our quality and innovative products worldwide, we aim high to meet the sustainable essentials true to consumer's expectations

## Our Mission

Exceeding customer's expectations with constant innovations to be the foremost handwoven brand.

## Our Values

We believe to grow bigger, together with our dedicated creative team & trusted clients. Our organization values crafting products best for our people and our planet.

## Corporate Social Responsibility (CSR)

Hafizia has been doing impactful CSR activities for years now. We have educated about 200 children through its supplementary Learning Centers. We have always been very generous when it comes to voluntary contributions for social welfare, and we have taken more effective steps in the following areas.

- Promoting education amongst the children of weavers and the children residing locally nearby factory. Yearly academic fee, syllabus fee, including schools bags & stationery are provided as per requirement.
- Promoting gender equality and empowering women
- Supporting more than 1000 families indirectly
- Providing employment to around 500 people directly.
- Keeping our premises green, hence promoting environmental safety.
- Providing a healthy working environment to employees that can improve their productivity.
