WELCOME TO THE STILLING CATALOGUE 2024

In this catalogue you will find our full range of profiles and their recommended accessories, as well as a list of universal accessories to be used across various profiles.

At the back of the catalogue you will also find our maximum load specifications, custom colouring details and other practical information.

If you have any questions, we are always ready to help you. Contact us by phone at +45 4360 0063 or send us an e-mail at stilling@stilling.dk

75 YEARS OF CRAFTSMANSHIP

Stilling's management and board of directors. From left: Nille Skalts (Board member), Rasmus Stilling-Schütz (Owner), Jesper Panduro (Chairman of the Board), Thomas Trads Hansen (Owner), Henrik Stray Doijohn (Board member).

The year 2024 marks a significant moment in Stilling's history as we get to celebrate the 75th anniversary of the founding of our company, and thus 75 years since the first product left the basement in Herlev, Denmark, where our founder, Preben Stilling, established his company in 1949.

With savings accured from collecting discarded glass bottles, which were in short supply after WWII, Preben started the development of his first venetian blinds; produced during the day and sold door-to-door at night.

Since then, we have proudly upheld craftsmanship traditions which have been passed from employee to employee for more than seven decades. We have nurtured our love for aluminium as a material and established ourselves as the biggest producer of drapery hardware in Scandinavia. A position we embrace with a profound sense of responsibility.

Responsibility for developing new products and solutions with greater care for the environment, with social responsibility for the people who enrich the products with their craft, for the local communities that they are part of, and for the value-chain from which the raw materials are sourced. It is this responsibility that has led us to attain official certification as a B Corp®, signifying our commitment to placing equal importance on caring for the planet and its people as to generating economic profits.

With a new board of directors, we take a stand for protecting the world and the communities we are part of, for the consequences of our presence, and the general changes that are needed to ensure that we can leave positive footprints and create worthy living conditions for future generations. To ensure that we give back more than we take.

We thank you for taking part in our history and for supporting the realization of our social and environmental projects.

Rasmus Stilling Schütz

Fausen.

SUSTAIN

LOOK FOR THE SUSTAIN™ LABEL

Our all encompassing goal is to be able to offer you the best in product design and functionality with as little negative impact on the world as possible. Therefore, transparency regarding material composition and origin are some of the latest measures we have taken to ensure consistent openness about our products.

It goes without saying that all our products are subject to strict criteria for quality and environmental footprint, but we are constantly looking for new technologies and methods that can ensure that we continuously minimize our footprint. To reflect this effort, we have created a label for those of our products that meet our highest criteria. We call the labelling SUSTAIN™.

WHAT DOES THE SUSTAIN™ LABEL MEAN?

The SUSTAIN™ label is our way of marking that a given product meets our highest criteria for responsibility throughout all phases of it's life cycle; production, period of use and disposal.

For a product to receive the SUSTAIN™ label, it must:

1) Be produced from a minimum of 50% recycled material.

2) Be at least as durable as an equivalent conventional product.

3) Be composed of recyclable and separable materials.

4) Be produced and transported with minimized or otherwise improved energy consumption.

WANT TO LEARN MORE?

You can read more about the SUSTAIN™ label and find more details on the selection criteria on our website.

Visit stilling.dk/en/sustain/

THE BEST RESULTS WITH SPECIALISED STILLING® TOOLS

To ensure the best experience with our products, we continously develop specialised tools, each designed with their own special purpose in mind. The lastest addition is a mounting tool for curtain tracks that are mounted directly into the ceiling without the use of brackets (XX21-article numbers). The tool protects the gliding track when mounting and thus ensures that the functionality of the track is maintained.

Find the tool (art. 1590) and the compatible bits (art. 1591/1592) next to each compatible product throughout this catalogue.

433 MHz zigbee

SAY HELLO TO **CURTAINLIGHT™ 2.0**
AMBIENT LIGHTING FOR CURTAIN TRACKS

With 2024, we introduce a whole new version of our 2024 "CURTAINLIGHT™" LED lighting for curtain tracks, which is now not only dimmable, but can also change temperature gradually from cold to warm white.

COMPATIBLE WITH PHILIPS HUE

To control the new lighting system, we have added a series of new remotes in both 1- and 4-channel versions, while the new LED driver runs on the Zigbee-protocol, which means that you can easily connect the light to existing smart home systems such as Philips Hue or Somfy TaHoma®.

GRADUAL DIMMING

ADJUSTABLE TEMPERATURE

ARE YOU FAMILIAR WITH OUR PATENTED WAVEFEEDER®?

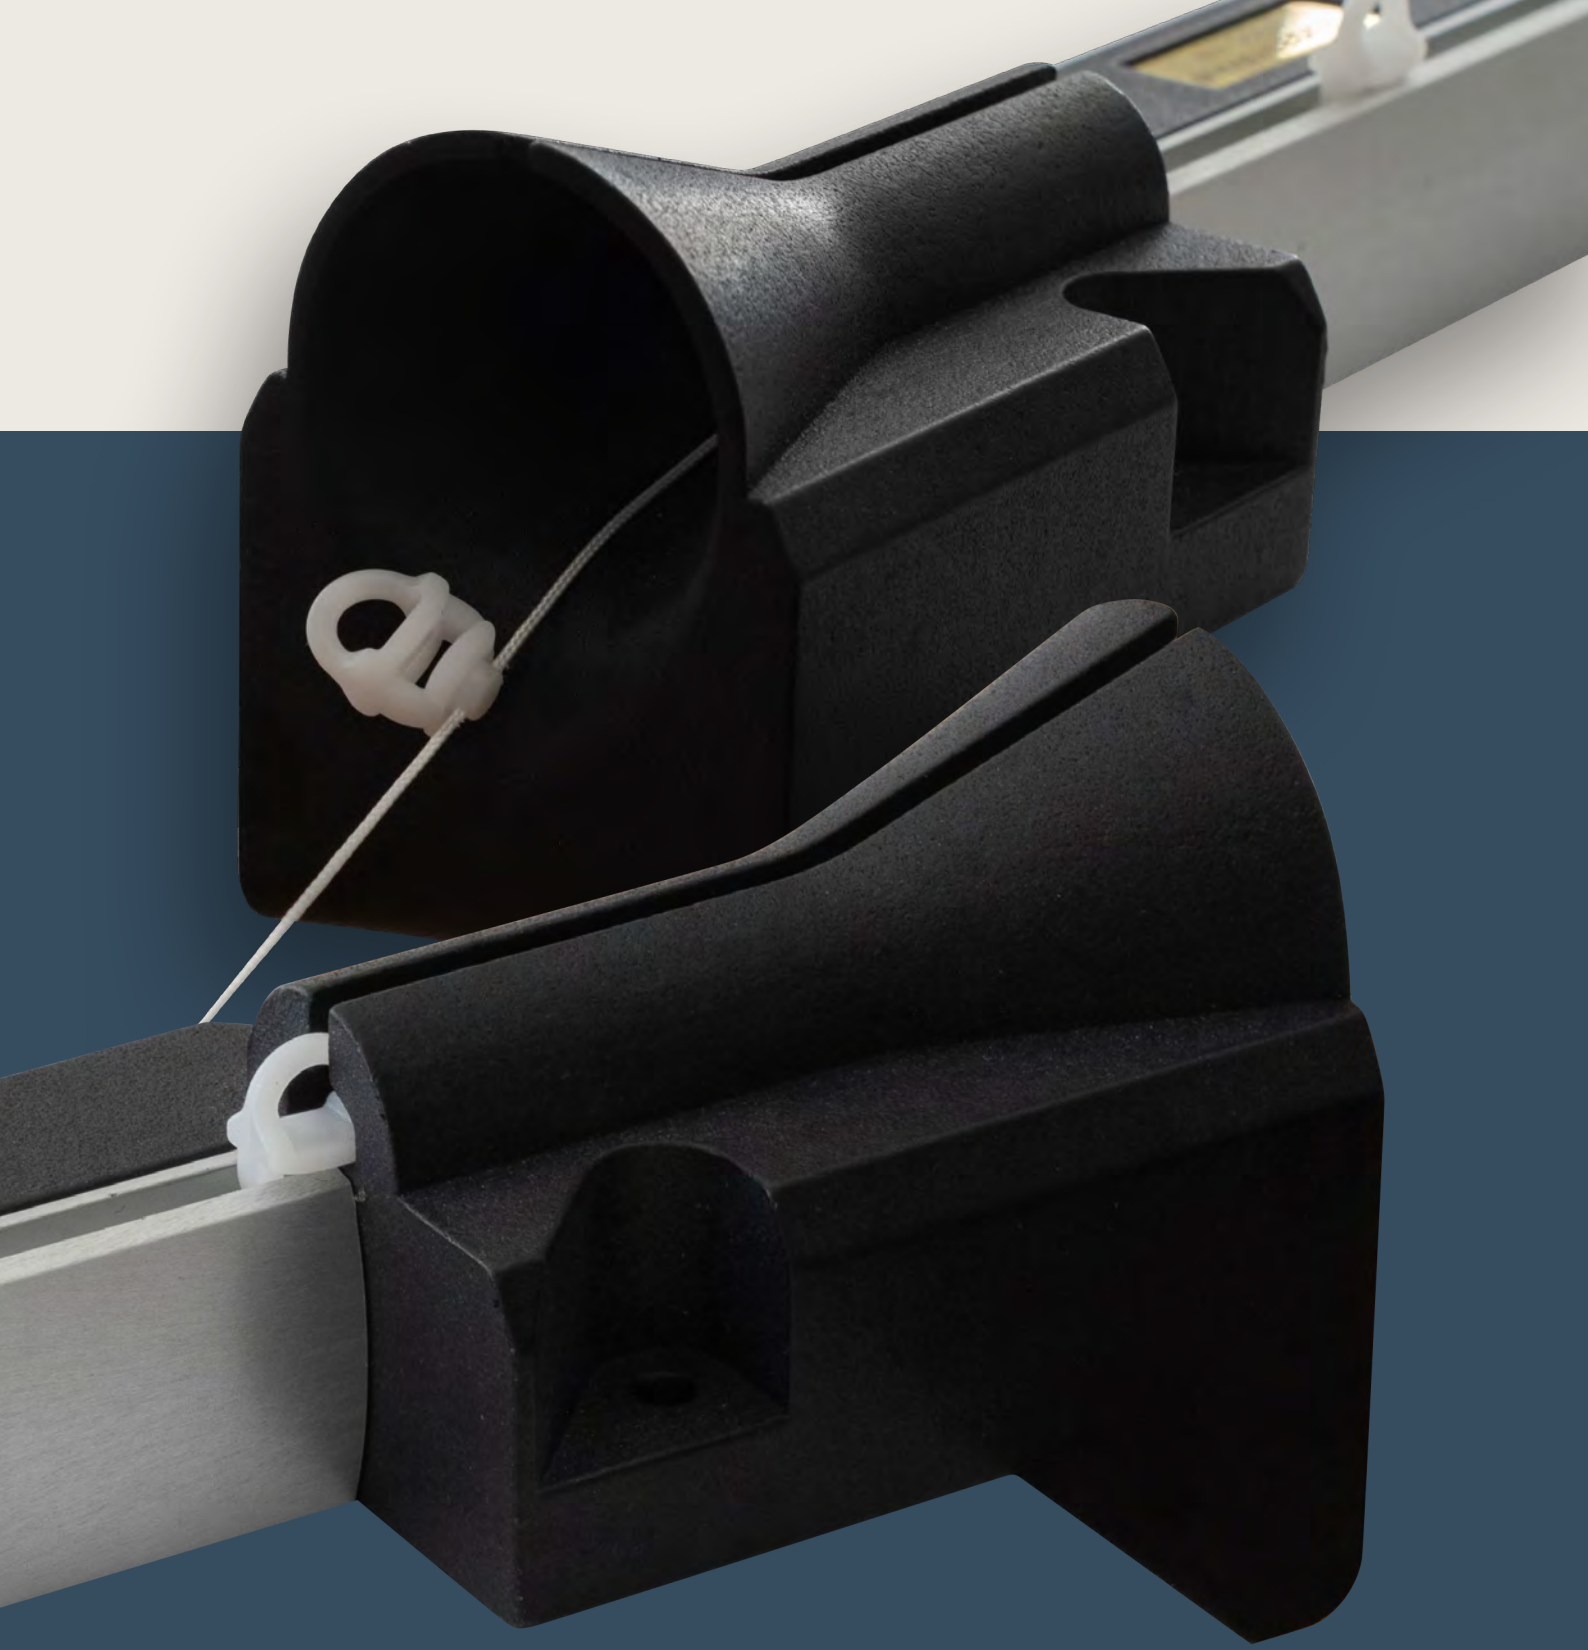
Installing wave gliders can both be a challenging, tiresome and time consuming task. In an effort to streamline the process, we have spent years inventing a new and unique tool to make the task a quick and easy procedure. And now, we are ready to introduce our new WAVEFEEDER® tool!

HOW IT WORKS

The WAVEFEEDER® tool is mounted on the compatible Stilling track, and the first waveglider is placed in the track as usual. Following this, the wave gliders are mounted quickly and easily by simply pulling the first glider towards the end of the track. In our experience it takes about 1.5 minutes to mount wavegliders in a 6 metre track, but with the WAVEFEEDER® tool, it can be done in as little as 8 seconds!

WANT TO LEARN MORE?

Feel free to contact us for more information about our new WAVEFEEDER® tool by writing to customerservice@stilling.dk.



AVAILABLE SYSTEMS

The WAVEFEEDER® is a precision tool and only works with Stilling® tracks and Stilling® wave gliders. Using incompatible accessories or tracks with even small deviations will result in the tool not working properly. As of January 2024, we offer the following wavefeeders:

WF 0520 - *compatible with track AP 0520 / 0521*
WF 1100 - *compatible with track AP 1100 / 1121*
WF 2001 - *compatible with track AP 2001*
WF 2005 - *compatible with track AP 2005*
WF 2300 - *compatible with track AP 2300*
WF 2500 - *compatible with track AP 2500*

CURTAIN TRACKS

Ever since our first professional curtain track was developed back in the 1980s, we have dedicated ourselves to becoming one of the world leaders in specialized drapery hardware. Almost all our tracks are processed by hand in Denmark by skilled craftspeople, before being exported to countries throughout the world.

AP 0520 / 0521

1:1 drawing

SUSTAIN

AP 0520 is a graphic wide track profile which over the years has remained a firm, global favourite. The AP 0521 profile is identical to AP 0520, but is supplied with pre-drilled holes for direct mounting without the use of brackets. AP 0520S is made from min. 75% recycled post-consumer aluminium and extruded using only renewable energy, making it part of our SUSTAIN™ portfolio.

COLOURS

White | Super Silver | Black | Gold (ano.) | Bronze (ano.)

Powder coating and wet lacquering in all RAL and standard NCS colours is possible for an additional charge.

ORIGIN & MATERIALS

Extrusion Sweden

AP 0589

1:1 drawing

AP 0589 is a slim, curved profile, which is well suited for carrying light curtains. With this track you can create a discreet and elegant curtain solution, as the AP 0589 is mounted with hidden ceiling brackets. In unison with our new low wave glider art. 14059 your curtains will move smoothly and effortlessly.

AP 0689

SUSTAIN

AP 0689 is the big brother of AP 0589, with which it shares its curved design. AP 0689 is mounted with a hidden twist bracket and works perfectly with our smooth 12 mm waveglider (art. 6035). Together, they create an aesthetic and silent solution for almost all types of curtains. AP 0689S is made from min. 75% recycled post-consumer aluminium and extruded using only renewable energy, making it part of our SUSTAIN™ portfolio.

COLOURS

White | Super Silver | Black

Powder coating and wet lacquering in all RAL and standard NCS colours is possible for an additional charge.

AP 1005

SUSTAIN

AP 1005 is a discreet, curved track for light curtains. The profile's small size makes it popular for e.g. inner, base layer curtains. AP 1005 is made from min. 75% recycled post-consumer aluminium and extruded using only renewable energy, making it part of our SUSTAIN™ portfolio.

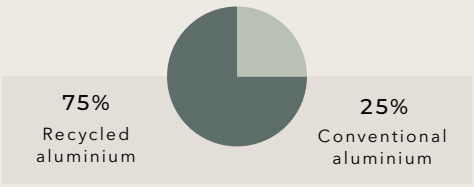
COLOURS

White

Off white

Powder coating and wet lacquering in all RAL and standard NCS colours is possible for an additional charge.

MATERIALS



This profile is made from min. 75% recycled post-consumer waste. By mixing recycled aluminium with a smaller part of primary aluminium, we preserve the aluminium's durability and flexibility.

AP 1170

SUSTAIN

AP 1170 is a new version of our AP 1100, which is specifically designed for built-in LED ambiance lighting. LED highlights the sleek, architectonic look of the profile and is an obvious choice for hospitality clients. AP 1170S is made from min. 75% recycled post-consumer aluminium and extruded using only renewable energy, making it part of our SUSTAIN™ portfolio.

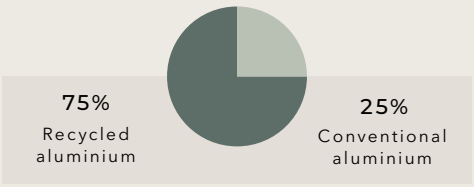
COLOURS

White
Super Silver
Black
Dutch White (ltd. edition)
Comice (ltd. edition)
Avalon (ltd. edition)

Curated by Nadia Olive Schnack

Powder coating and wet lacquering in all RAL and standard NCS colours is possible for an additional charge.

MATERIALS



This profile is made from min. 75% recycled post-consumer waste. By mixing recycled aluminium with a smaller part of primary aluminium, we preserve the aluminium's durability and flexibility.

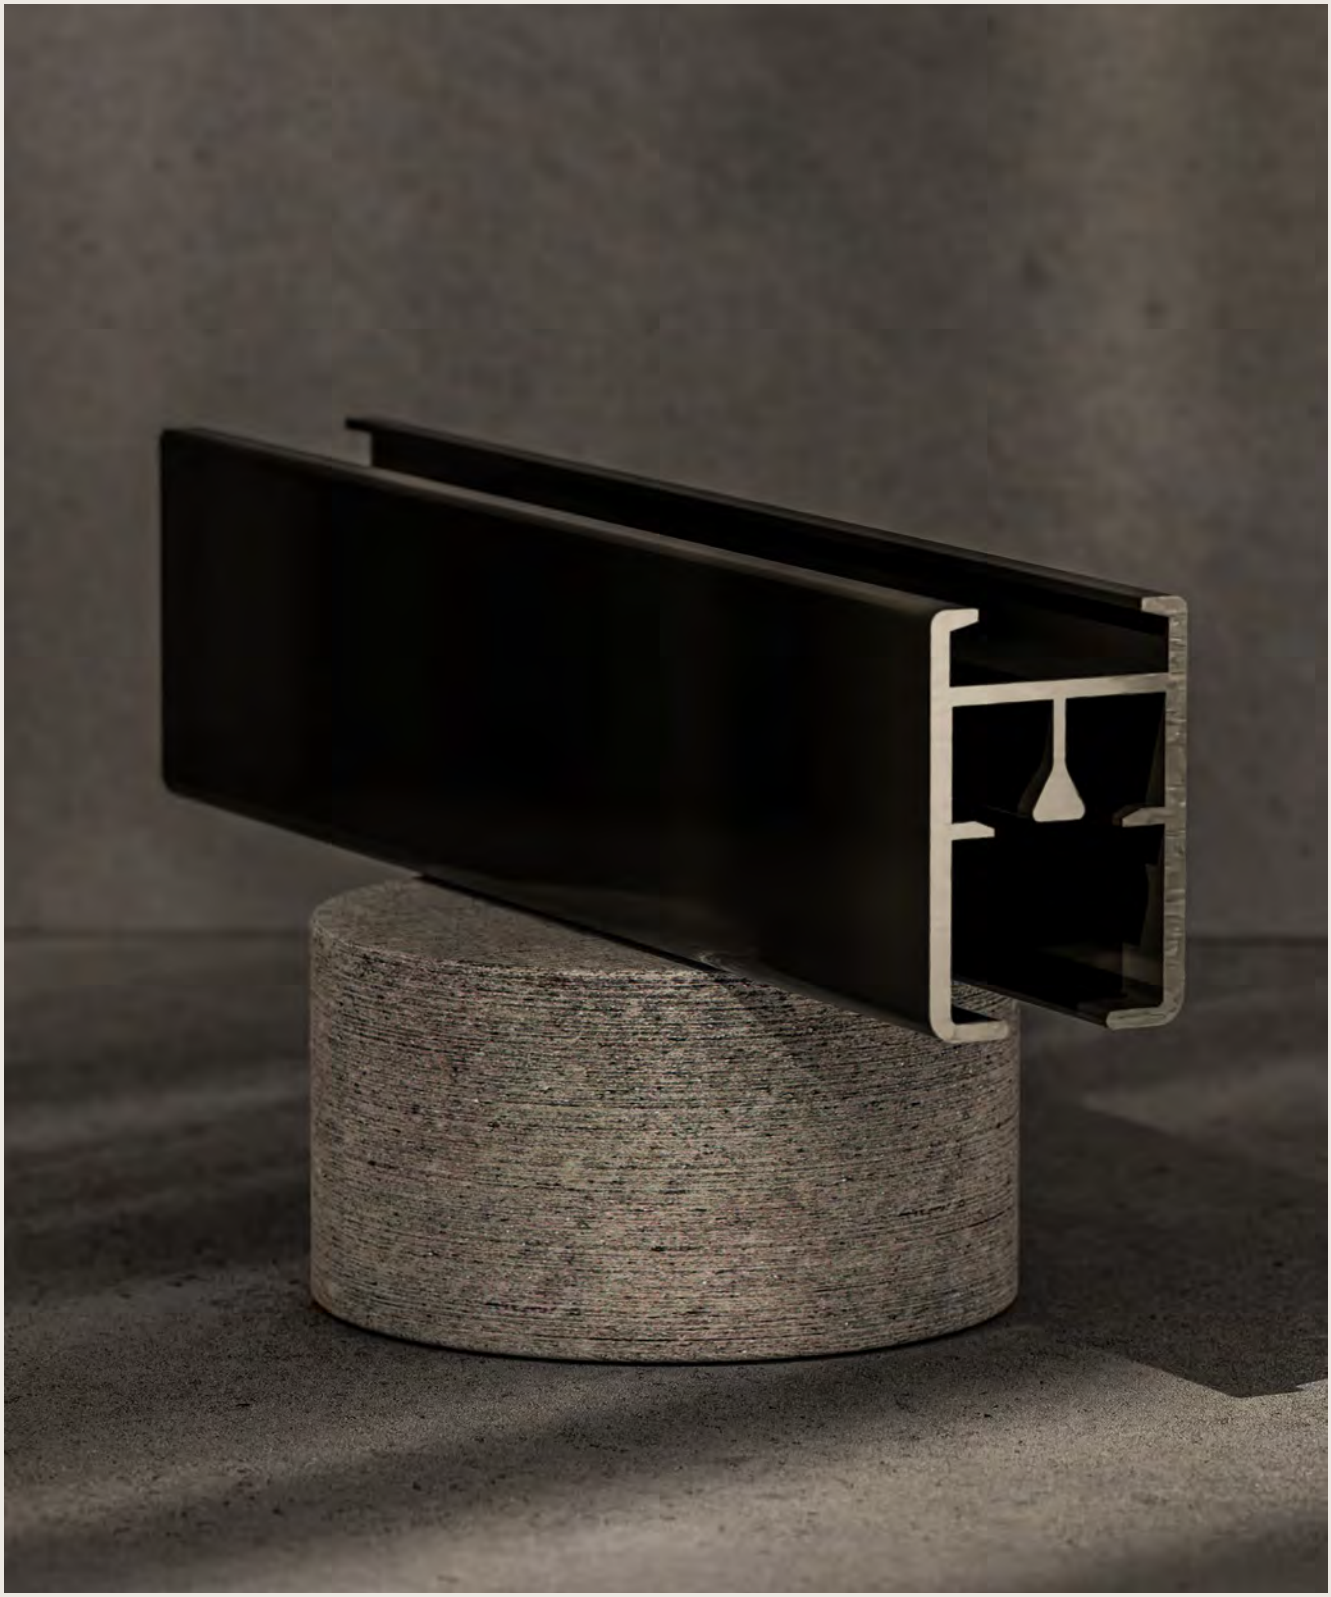
AP 1400



AP 1400 can handle even the most demanding tasks. The strong, cord drawn track is specially designed for the heaviest drapes, such as stage curtains and sound-absorbing room dividers. To ensure the best functionality, the AP 1400 is always equipped with roller gliders with ball bearings. Can be assembled to a length of up to 24 metres and mounted with our specially designed ceiling brackets.

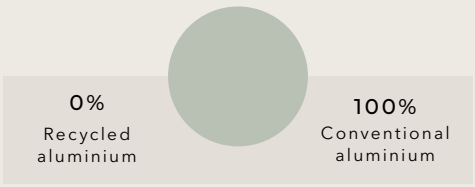
COLOURS

White

Black

Powder coating and wet lacquering in all RAL and standard NCS colours is possible for an additional charge.

MATERIALS



Our ambition is to eventually convert all our curtain tracks from conventional to recycled, or otherwise more responsible, materials. These changes will happen gradually over time.

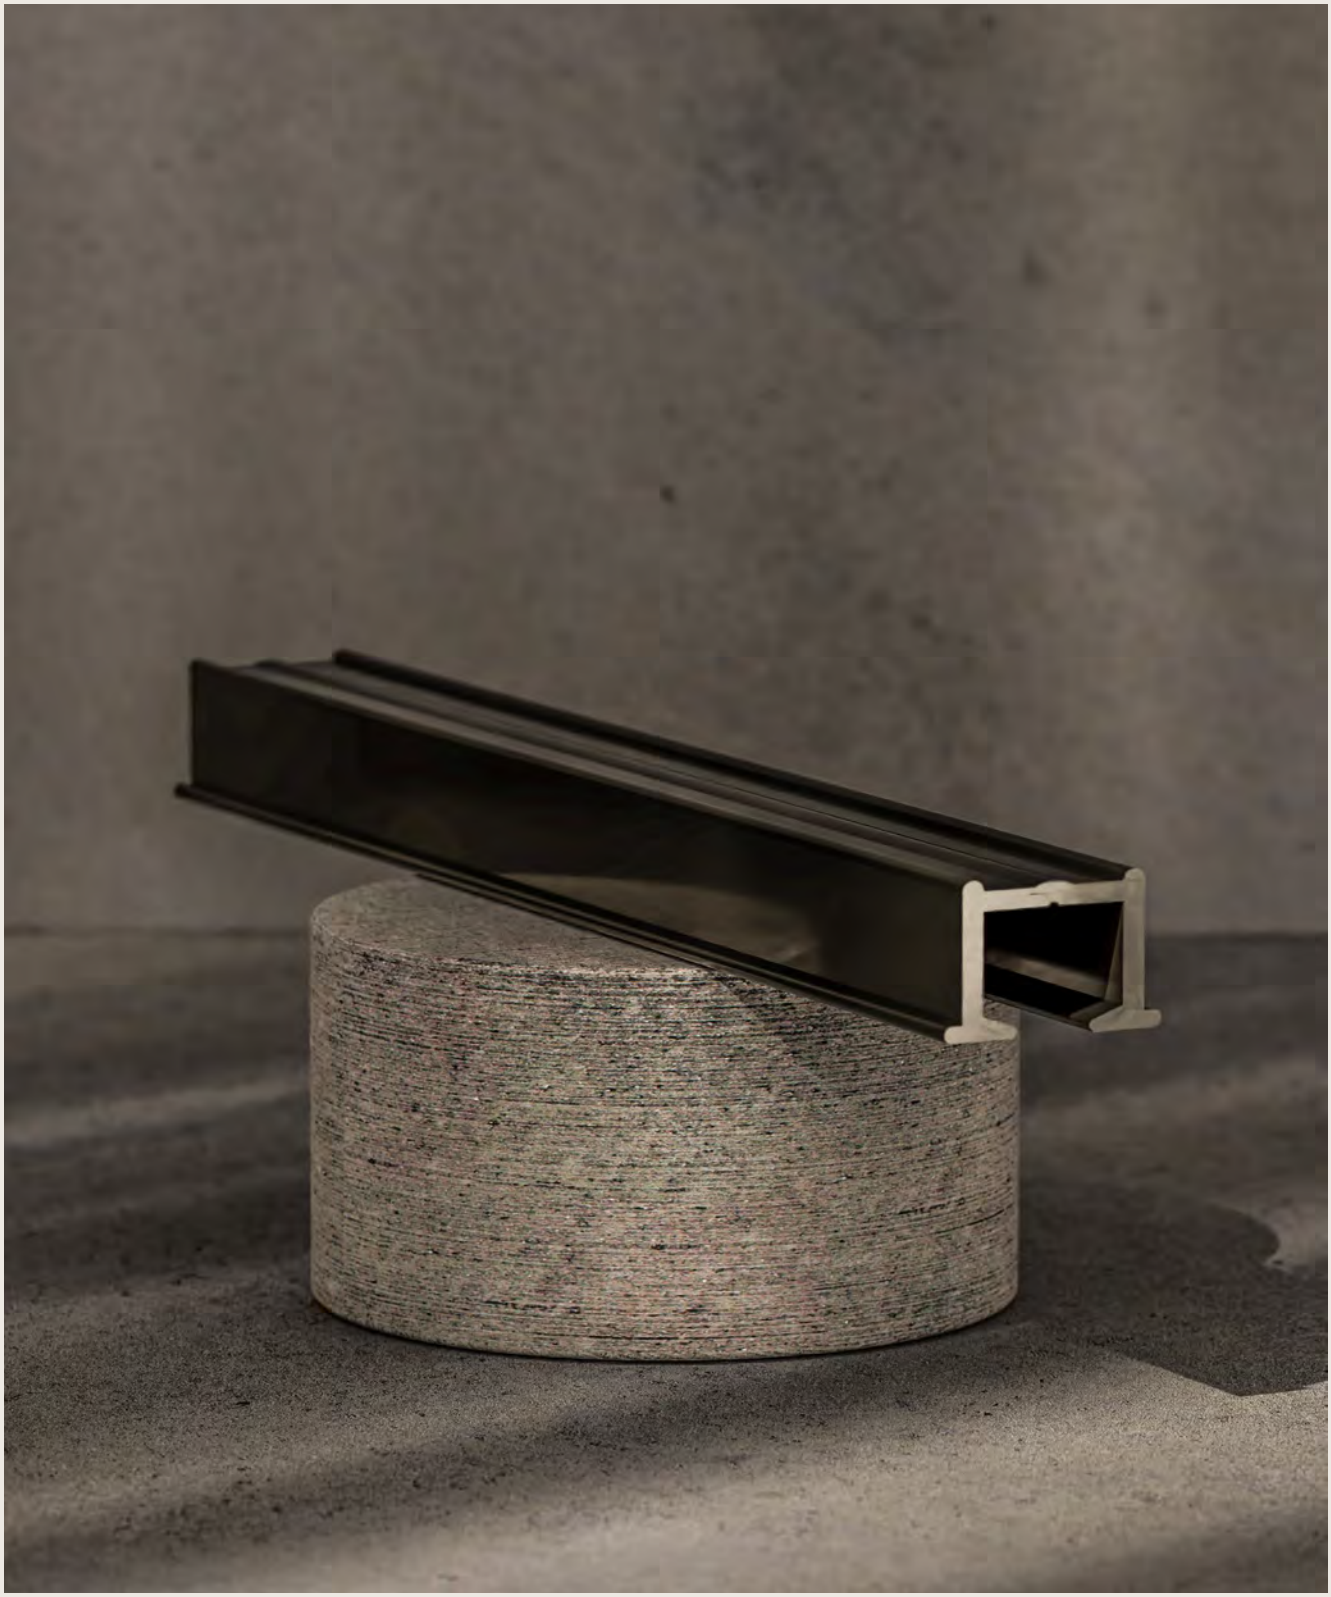
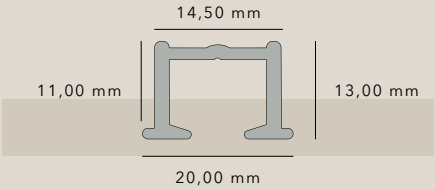
AP 1500



1:1 drawing



AP 1500 is a curtain track for installation directly into ceilings and panels. If you want an ultra-discreet and almost completely invisible track, the AP 1500 is the right solution. It creates a beautiful, extravagant look with curtain fabric cascading from floor to ceiling. The track is easily mounted with screws directly through the pre-drilled holes using our mounting tool (art. 1590).

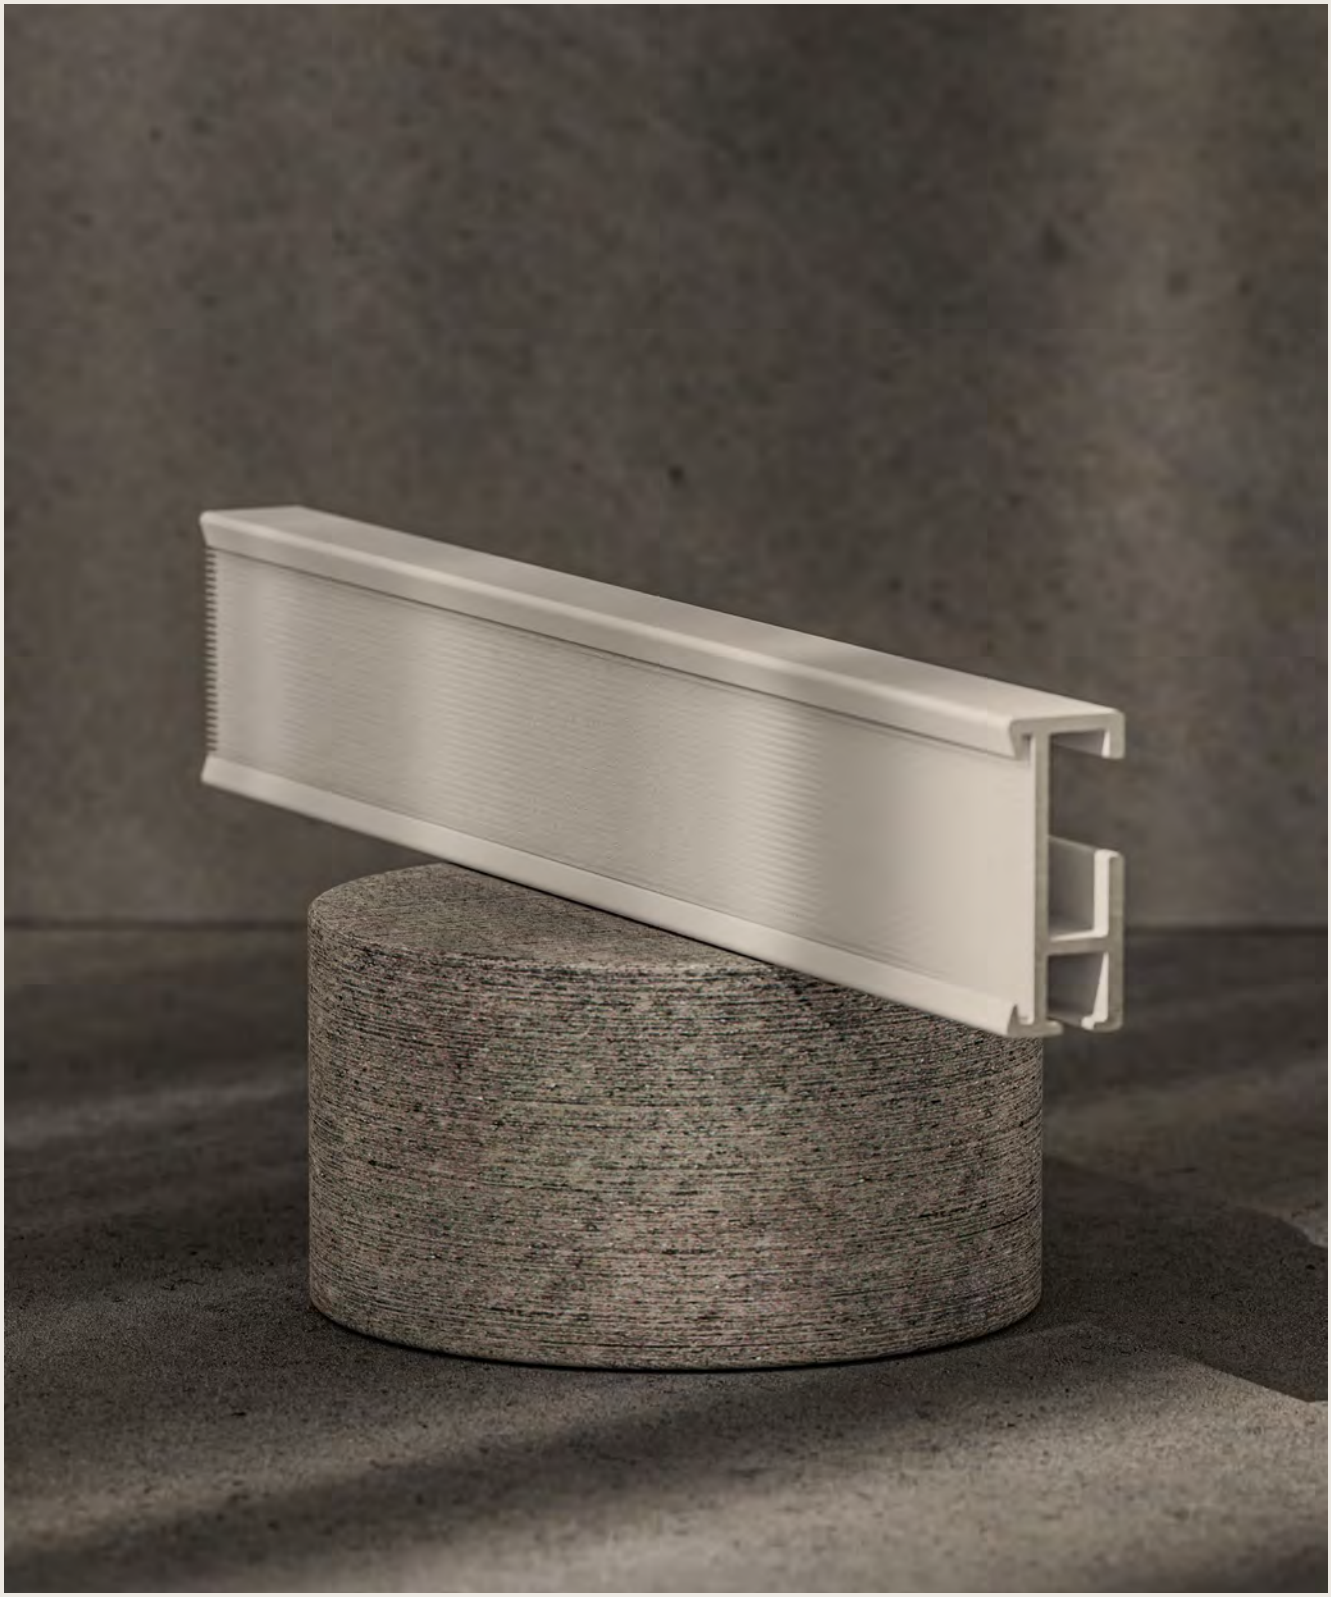
AP 2002



SUSTAIN

AP 2002 is a velcro profile which is a popular and easy solution for both lift curtains and cornices, where the velcro on the front is used to fasten the fabric. The AP 2002 works with our user-friendly mounting accessories, including swivel- and side brackets, making it incredibly easy to install and very flexible in use.

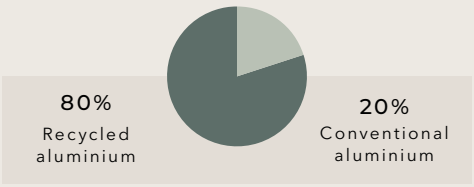
COLOURS

White

Silver

Powder coating and wet lacquering in all RAL and standard NCS colours is possible for an additional charge.

MATERIALS



This profile is made from 80% recycled aluminium, of which appox. half is post-consumer. Post-consumer aluminium stem from products that have alreadyy been used in other products such as aluminium cans.

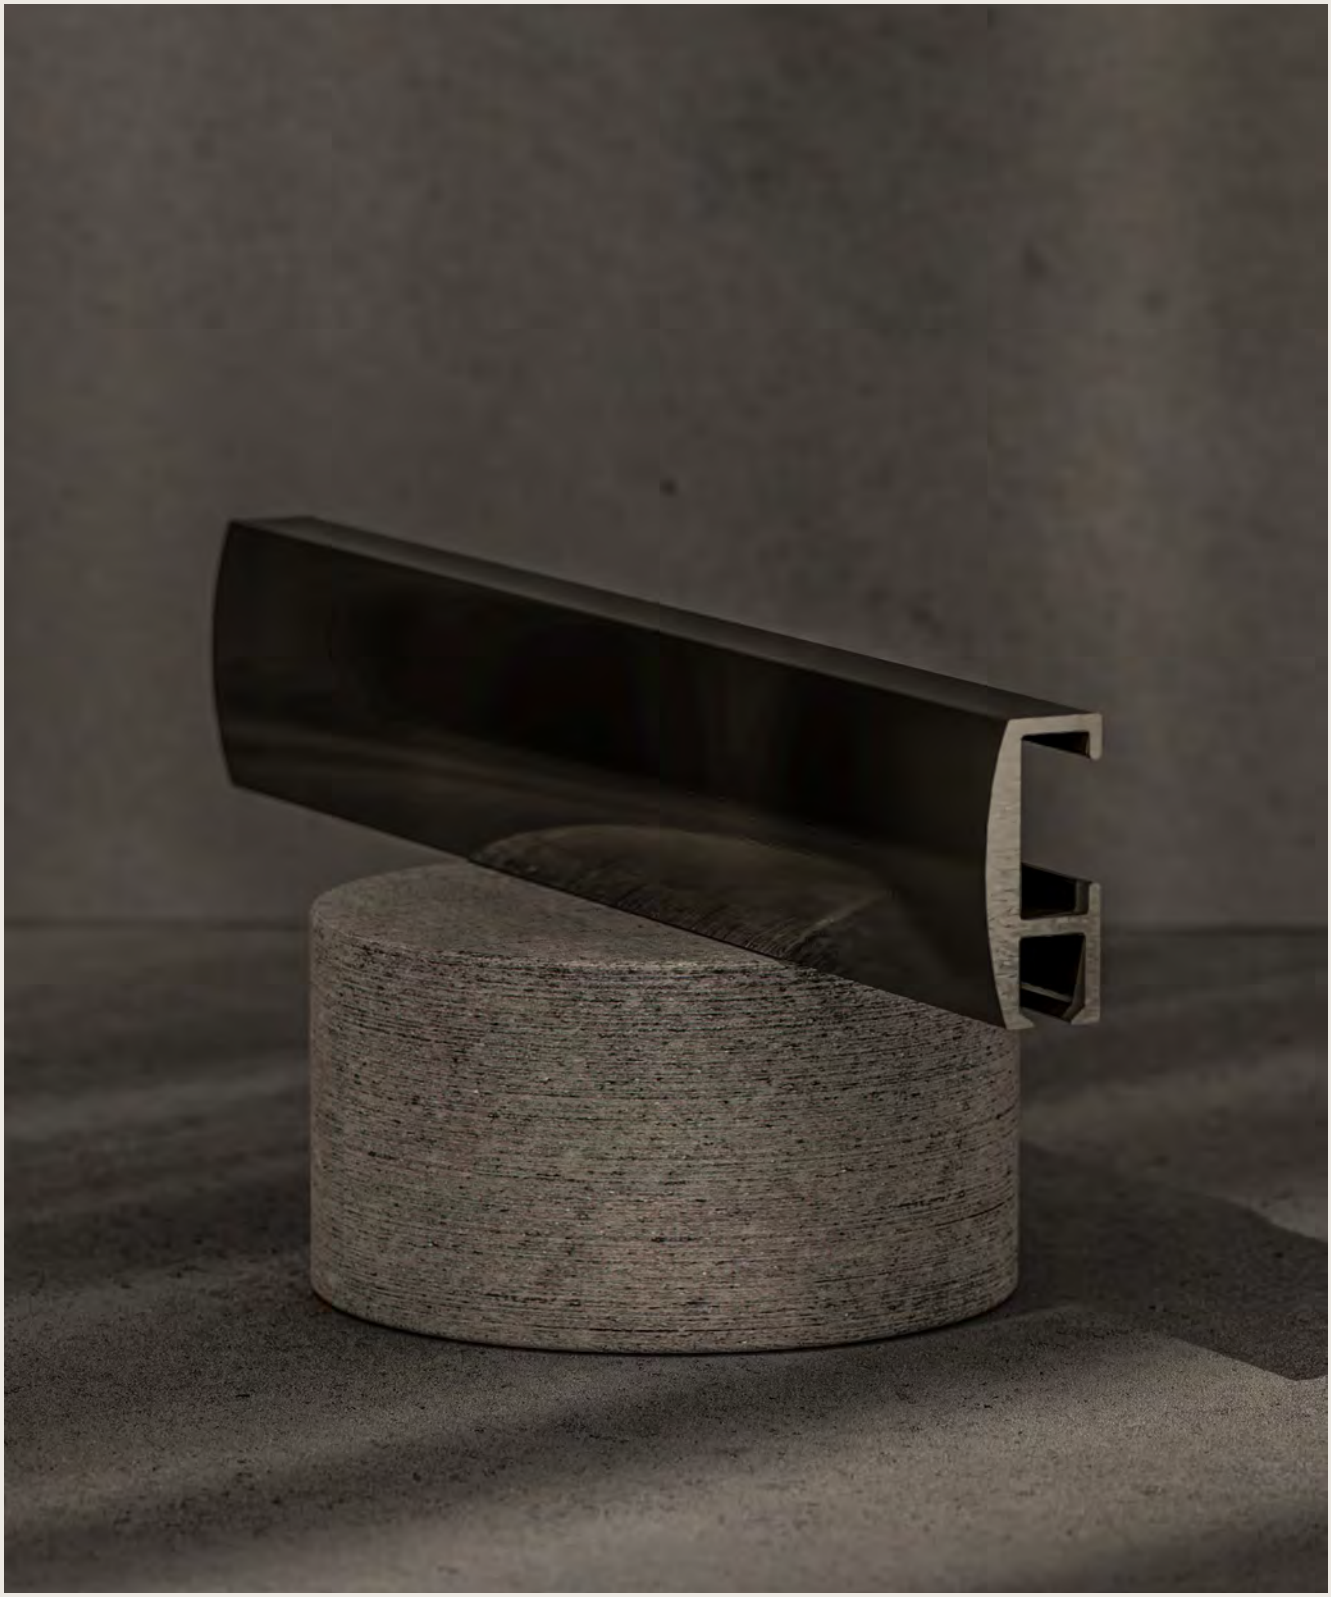
AP 2005



SUSTAIN

AP 2005 is a stylish, curved profile, which has been one of our most popular tracks since it was designed in 1991. AP 2005 is a versatile track as it can be bent and milled and can support up to medium weight curtains. Choose from 14 collection colours with matching accessories. AP 2005 is made from min. 75% recycled post-consumer aluminium and extruded using only renewable energy, making it part of our SUSTAIN™ portfolio. Selected accessories available in 100% recycled nylon.

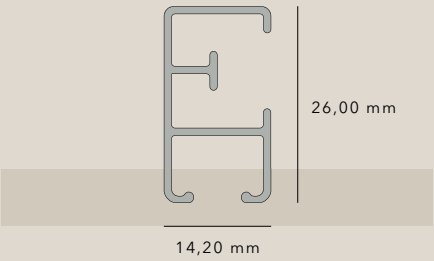
AP 2500

1:1 drawing



SUSTAIN

AP 2500 is a strong, elegant and very versatile curtain track. The very first 2500 profile was extruded back in 1983 and it has been one of our most popular tracks for medium-weight curtains ever since. AP 2500 can be mounted upside down, so that the gliding track is not visible from below, which creates a minimalistic look.

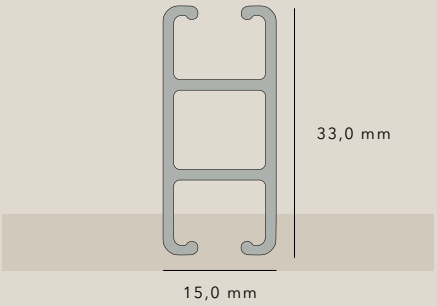
AP 5001

1:1 drawing



SUSTAIN

AP 5001 is a strong profile which can carry everything from light to heavy curtains and it is one of our most popular curtain tracks - also as a room divider, for ceiling curtains and for bathrooms. The AP 5001 profile was originally designed for technical curtain solutions in hospitals and healthcare facilities, and the cubicle track therefore has a wide range of options for mounting, bending and milling, as well as a lot of specially designed accessories.

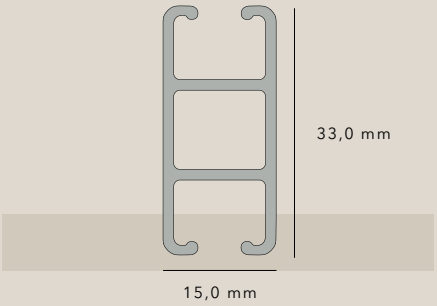
AP 5001 SAFETRACK™

1:1 drawing



SUSTAIN

The AP 5001 cubicle track works together with AP Safetrack™, our range of anti-ligature accessories, developed for installation in psychiatric hospitals. To avoid self-harm or loss of life, the AP Safetrack is designed to release from attachment points such as wall brackets and ceiling supports at a pull of as little as 8 kg. Safetrack is tested and certified by the Danish Technological Institute and meets the international anti-ligature standards.

RECOMMENDED USE

- Ceiling-mounting
- Wall mounting
- Ceiling supports
- Bending
- Milling
- Recessing

COLOURS

White | Super Silver | Black

Powder coating and wet lacquering in all RAL and standard NCS colours is possible for an additional charge.

SPECIFICATIONS

Materials:
Aluminium alloy 6060/T5-6

Operation:
Hand drawn

Ext. dimensions:
15,0 mm x 33,0 mm

Track width:
6,0 mm

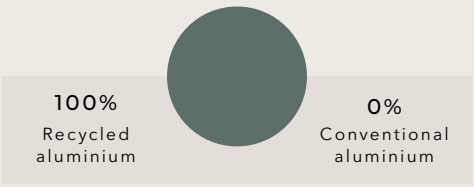
Length:
6000 mm

Max. load:
Up to 8 kg (see sep. table)

Bending radius:
Min. 10 (recommended)

Environmental impact:
2,42 kg CO2e per kg (extrusion)

MATERIAL



This profile is made from 100% recycled aluminium, of which min. 60% is post-consumer. Post-consumer aluminium stem from products that have alreadyy been used in other products such as aluminium cans.

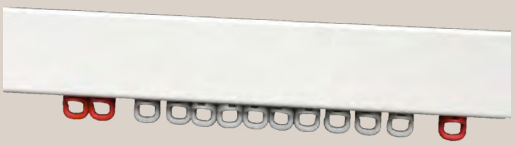
Instructions for using the SAFETRACK™ gliders

Place two (2) pcs. 5738ST RED as the first gliders in the track and one (1) as the last glider; if possible on the outside of the stopper.

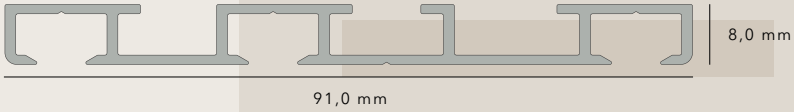
Place the 5738ST GRAY gliders between these two positions.

Use a maximum of 10 gliders per metre track.



AP 5408

1:1 drawing



SUSTAIN

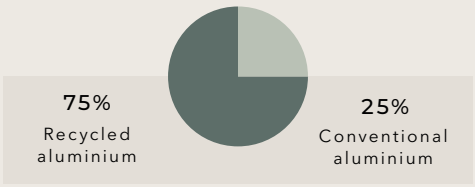
AP 5408 is a profile with 3 tracks, designed for the contract market and one of our most popular curtain tracks for hotel projects. Available in both 4 and 6 metres length as a standard. Mounted directly into the ceiling with screws. AP 5408 is made from min. 75% recycled post-consumer aluminium and extruded using only renewable energy, making it part of our SUSTAIN™ portfolio.

COLOURS

White

Powder coating and wet lacquering in all RAL and standard NCS colours is possible for an additional charge.

MATERIALS



This profile is made from min. 75% recycled post-consumer waste. By mixing recycled aluminium with a smaller part of primary aluminium, we preserve the aluminium's durability and flexibility.

GLYDEA

HAND DRAWN

SUSTAIN

AP 1781379 GLYDEA is a strong electric curtain track which can carry up to 25 kg. Therefore it can also be used as an ordinary hand drawn track for heavy curtains or for room dividers in places where a motor track solution is not desired. Now available in both 6 and 7 metre lengths.

COLOURS

White

Black

Powder coating and wet lacquering in all RAL and standard NCS colours is possible for an additional charge.

MATERIALS

100% Recycled aluminium

0% Conventional aluminium

This profile is made from 100% recycled aluminium, of which min. 60% is post-consumer. Post-consumer aluminium stem from products that have alreadyy been used in other products such as aluminium cans.

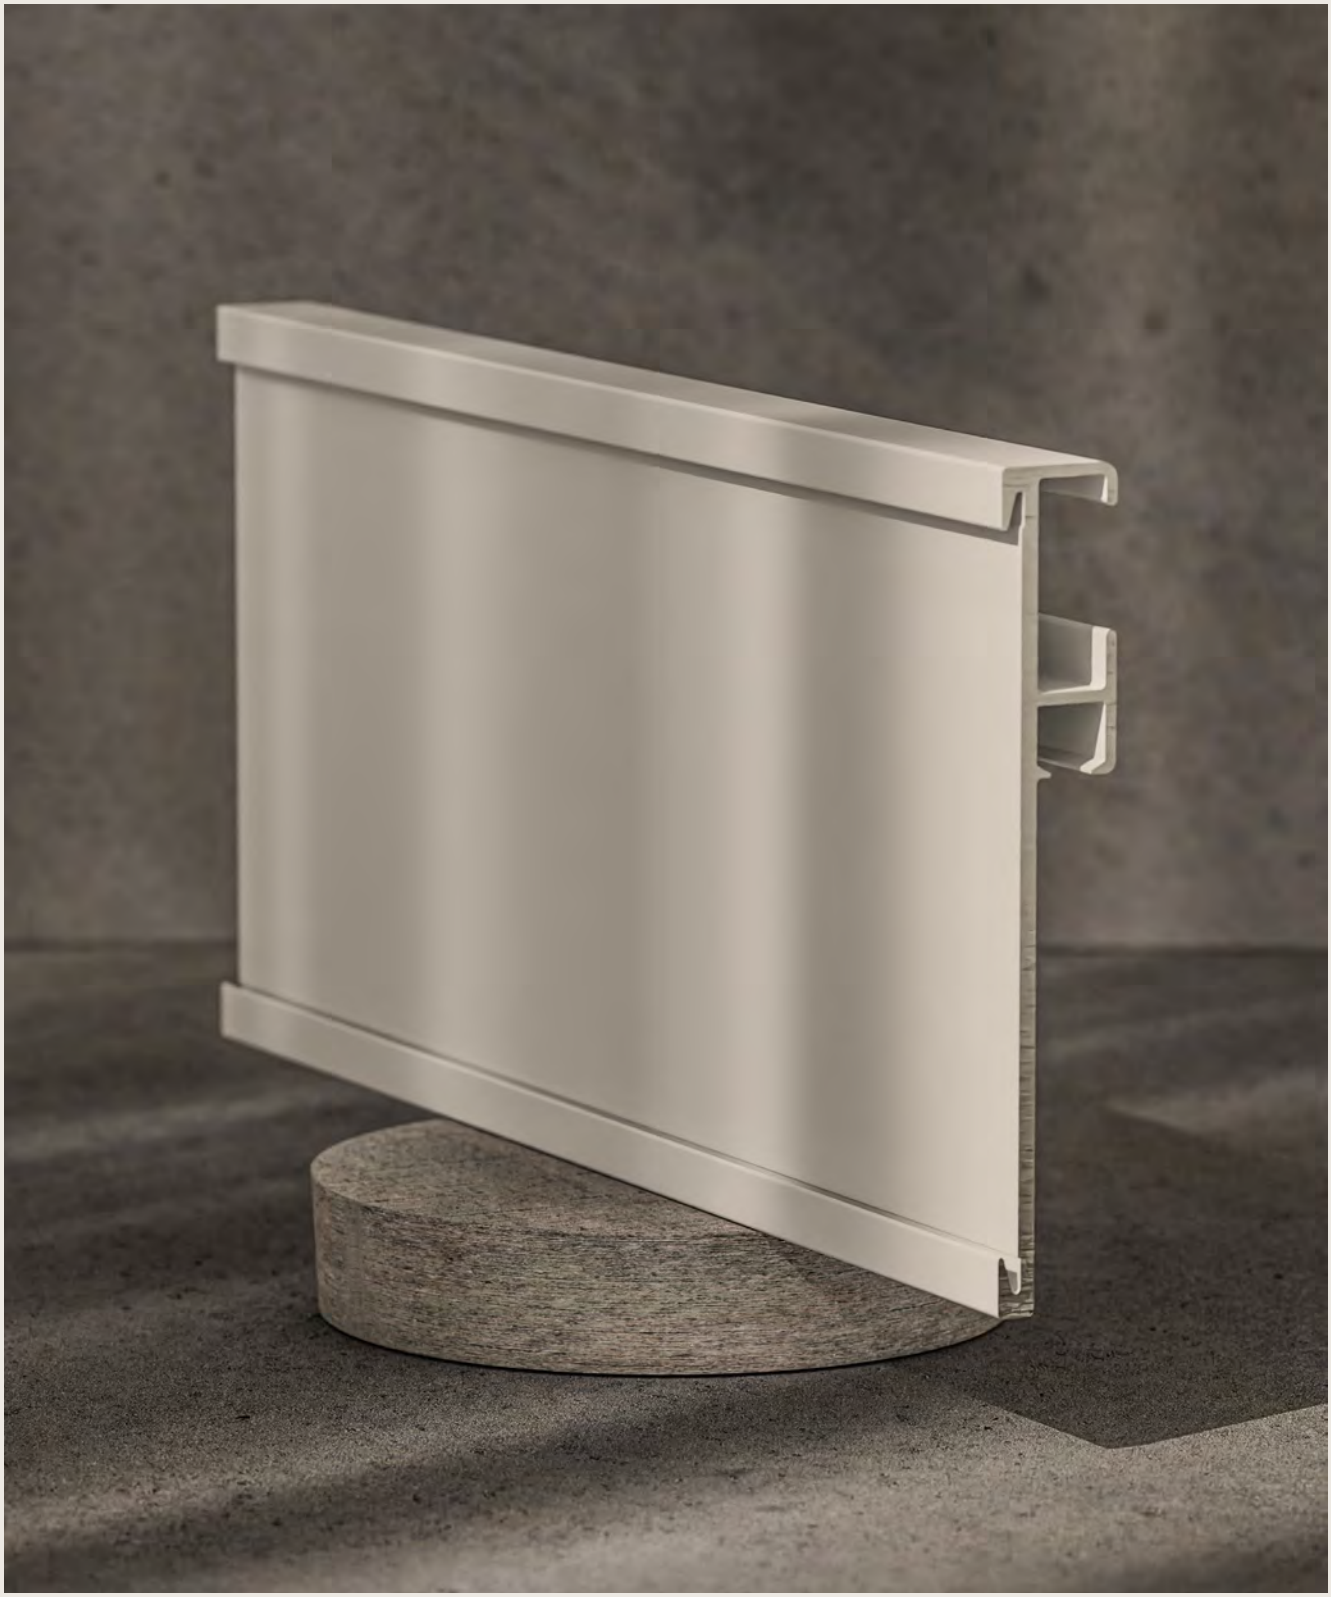
CORNICES

A curtain cornice is a beautiful aluminium pelmet which you can mount in front of your curtain solution and thereby hide both curtain tracks and fixings. Traditionally, the curtain cornice is covered with fabric. For a more contemporary look, it can also be used without fabric, and even custom lacquered to match the wall colour.

AP 2668



SUSTAIN

The AP 2668 cornice is a stylish addition to curtains or roman blinds. The profile is used with 63 mm vertical slats or regular fabric with fleece lining. AP 2668 can also be used without textiles. You can choose custom lacquering to match your wall colour (add. cost). Our cornice profiles come in 3 sizes, are all made from min. 75% recycled post-consumer aluminium waste and extruded using only renewable energy, making them part of our SUSTAIN™ portfolio.

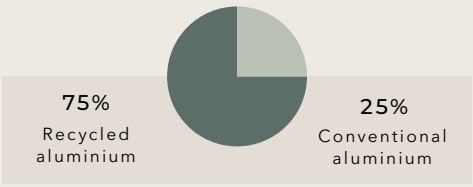
COLOURS

White

Silver (Ano.)

Powdercoating and wet lacquering in all RAL and standard NCS colours possible at an additional cost.

MATERIALS



This profile is made from min. 75% recycled post-consumer waste. By mixing recycled aluminium with a smaller part of primary aluminium, we preserve the aluminium's durability and flexibility.

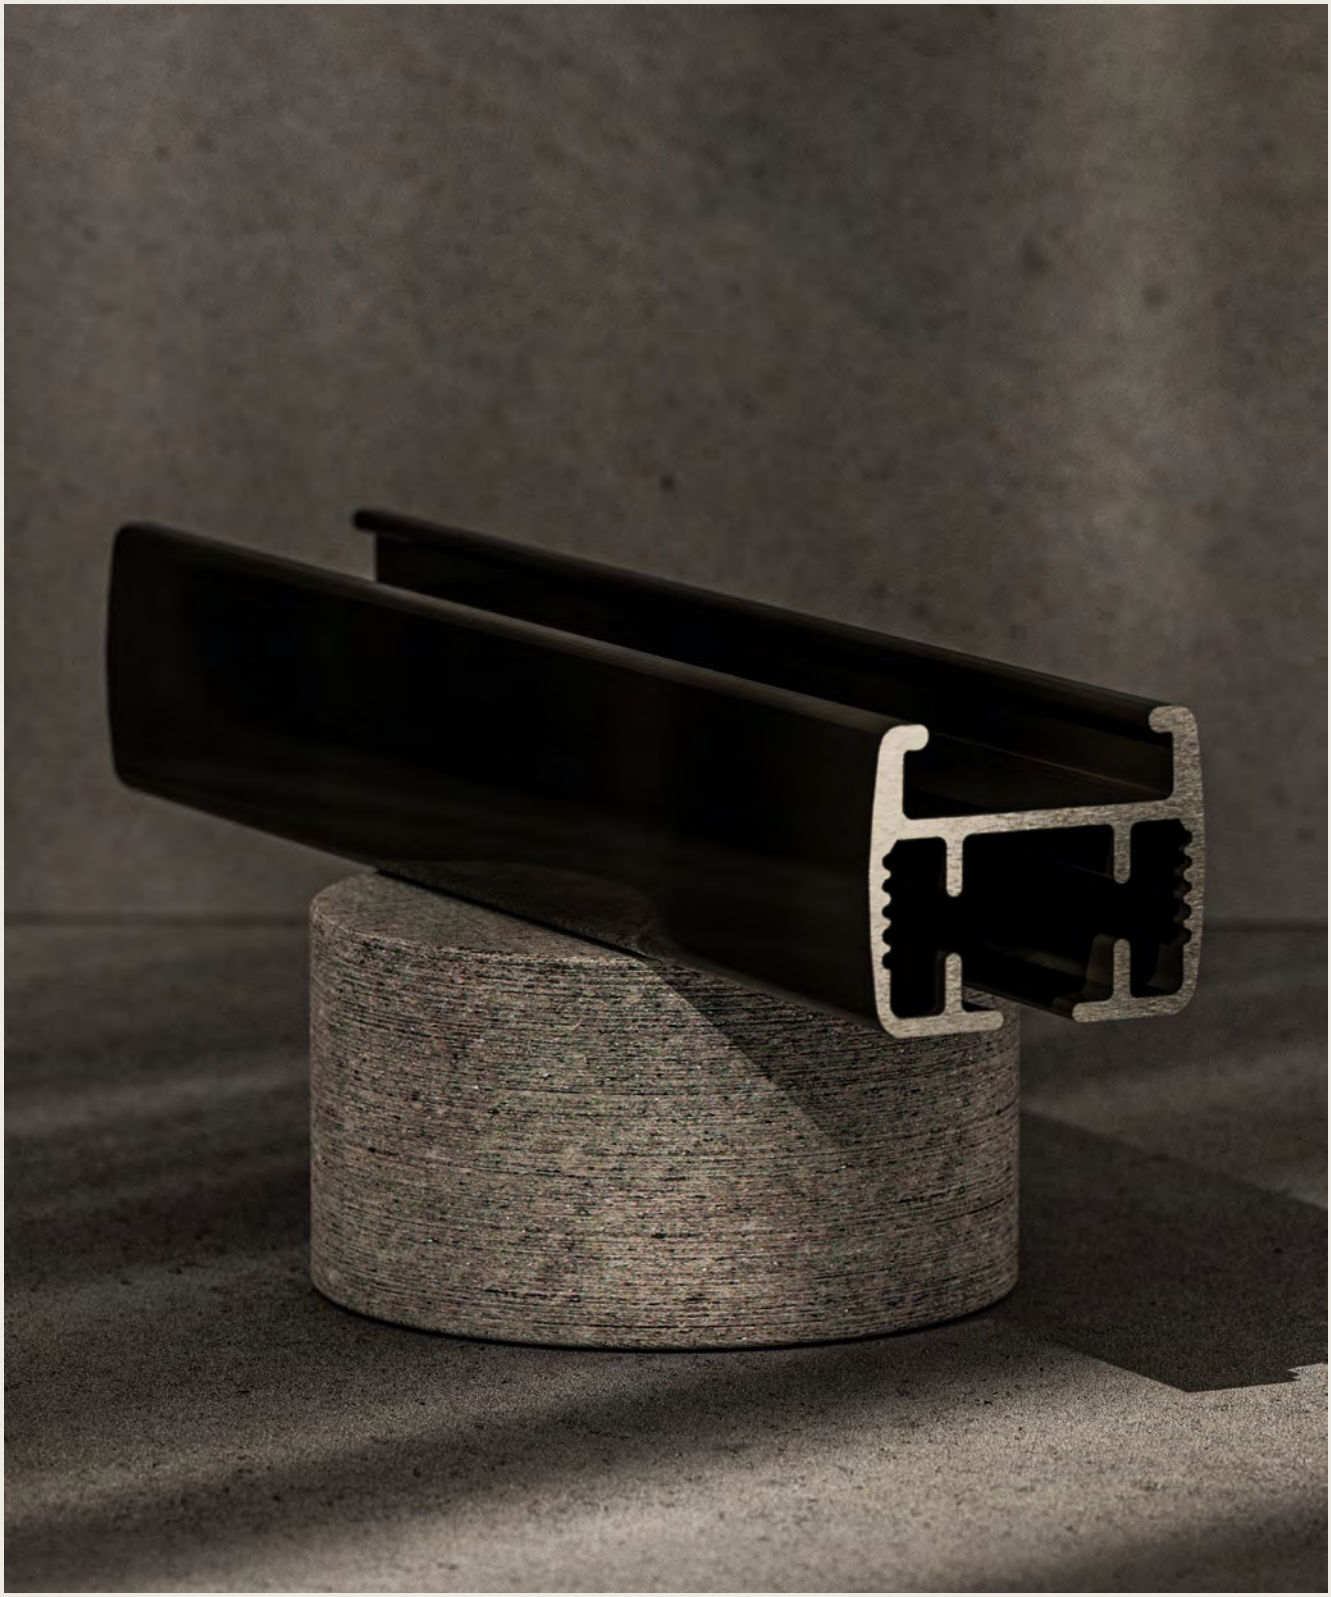
ELECTRIC CURTAIN TRACKS

With Stilling you will find a wide selection of motors for your electric curtain track, each with its own special qualities and price. In addition to a wide range from Somfy, we also supply a budget-friendly alternative in our own Stilling® motor series.

GLYDEA

MOTORISED CURTAIN TRACK



SUSTAIN

GLYDEA is a versatile and functional electric curtain track, which is available with a standard 230V motor or battery motor from, among others, Somfy. Can be controlled via remote control or integrated into the main control system via WT or DCT switch control. Exclusive roller gliders ensure smooth movements.

CHOOSE FROM OUR RANGE

With Stilling you will find a wide selection of motors for your electric curtain track, each with its own special qualities and price. In addition to a wide range from Somfy, we also supply a budget-friendly alternative in our own Stilling® motor series.

230V OR BATTERY?

When you choose a motor for your track, you can generally choose between either a 230V motor which must be connected to the electrical installations, or a plug 'n play battery motor which is charged with the purchased charger. While a battery motor is an easier solution in terms of mounting, a 230V motor never needs to be charged. Therefore, be careful not to sell battery motors for windows that cannot be easily accessed.

SMART HOME SOLUTIONS

If you want to connect the motor track to a smart home system, we recommend choosing a Somfy motor (Glydea & Movelite) combined with a TaHoma® Switch hub. This enables operation via the TaHoma® app and can be connected to e.g. Google Home and Amazon Alexa for voice control.

THE KINFOLK TABLE

ROMAN BLINDS

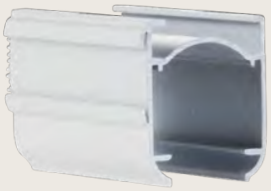
The roman blind is a timeless classic and is often made in combination with curtains, using the same fabric for both. It also works great for blackout curtains. We offer a wide range of roman blind systems, which are easy to install, safe and highly functional.

ROMAN BLIND SYSTEMS QUICK GUIDE

AP 8900 / CLOSED HEADRAIL

AP 8900 is a closed headrail system, which together with the open headrail 8901 system are marketleading in roman blinds. AP 8900 comes with patented low-noise cord rollers and chain operation. Weight capacity up to 8 kilo.

AP 8901 / OPEN HEADRAIL



AP 8901 is an open headrail system which together with the closed headrail 8900 system is marketleading in roman blinds. AP 8901 comes with patented low-noise cord rollers and chain operation. Weight capacity of up to 8 kilo.

AP 8990 / SMARTLIFT™

The AP 8990 is our most premium lift system, operated with a smart pump function called Smartlift™. One of the advantages of Smartlift™ is that the cord is always the same length. Always right side operation. Weight capacity of up to 4.5 kg.

AP 2002 / VELCRO SYSTEM

AP 2002 is our open lift system without a cassette, which is operated by cord. The system is very popular as a do-it-yourself solution and is easy to assemble. Weight capacity of up to 4 kg.
Max. 6 cords.

AP 8900

SUSTAIN

AP 8900 is a closed headrail system, which together with the open headrail 8901 system are marketleading in roman blinds. AP 8900 comes with patented low-noise cord rollers and chain operation. And with a weight capacity of up to 8 kilo.

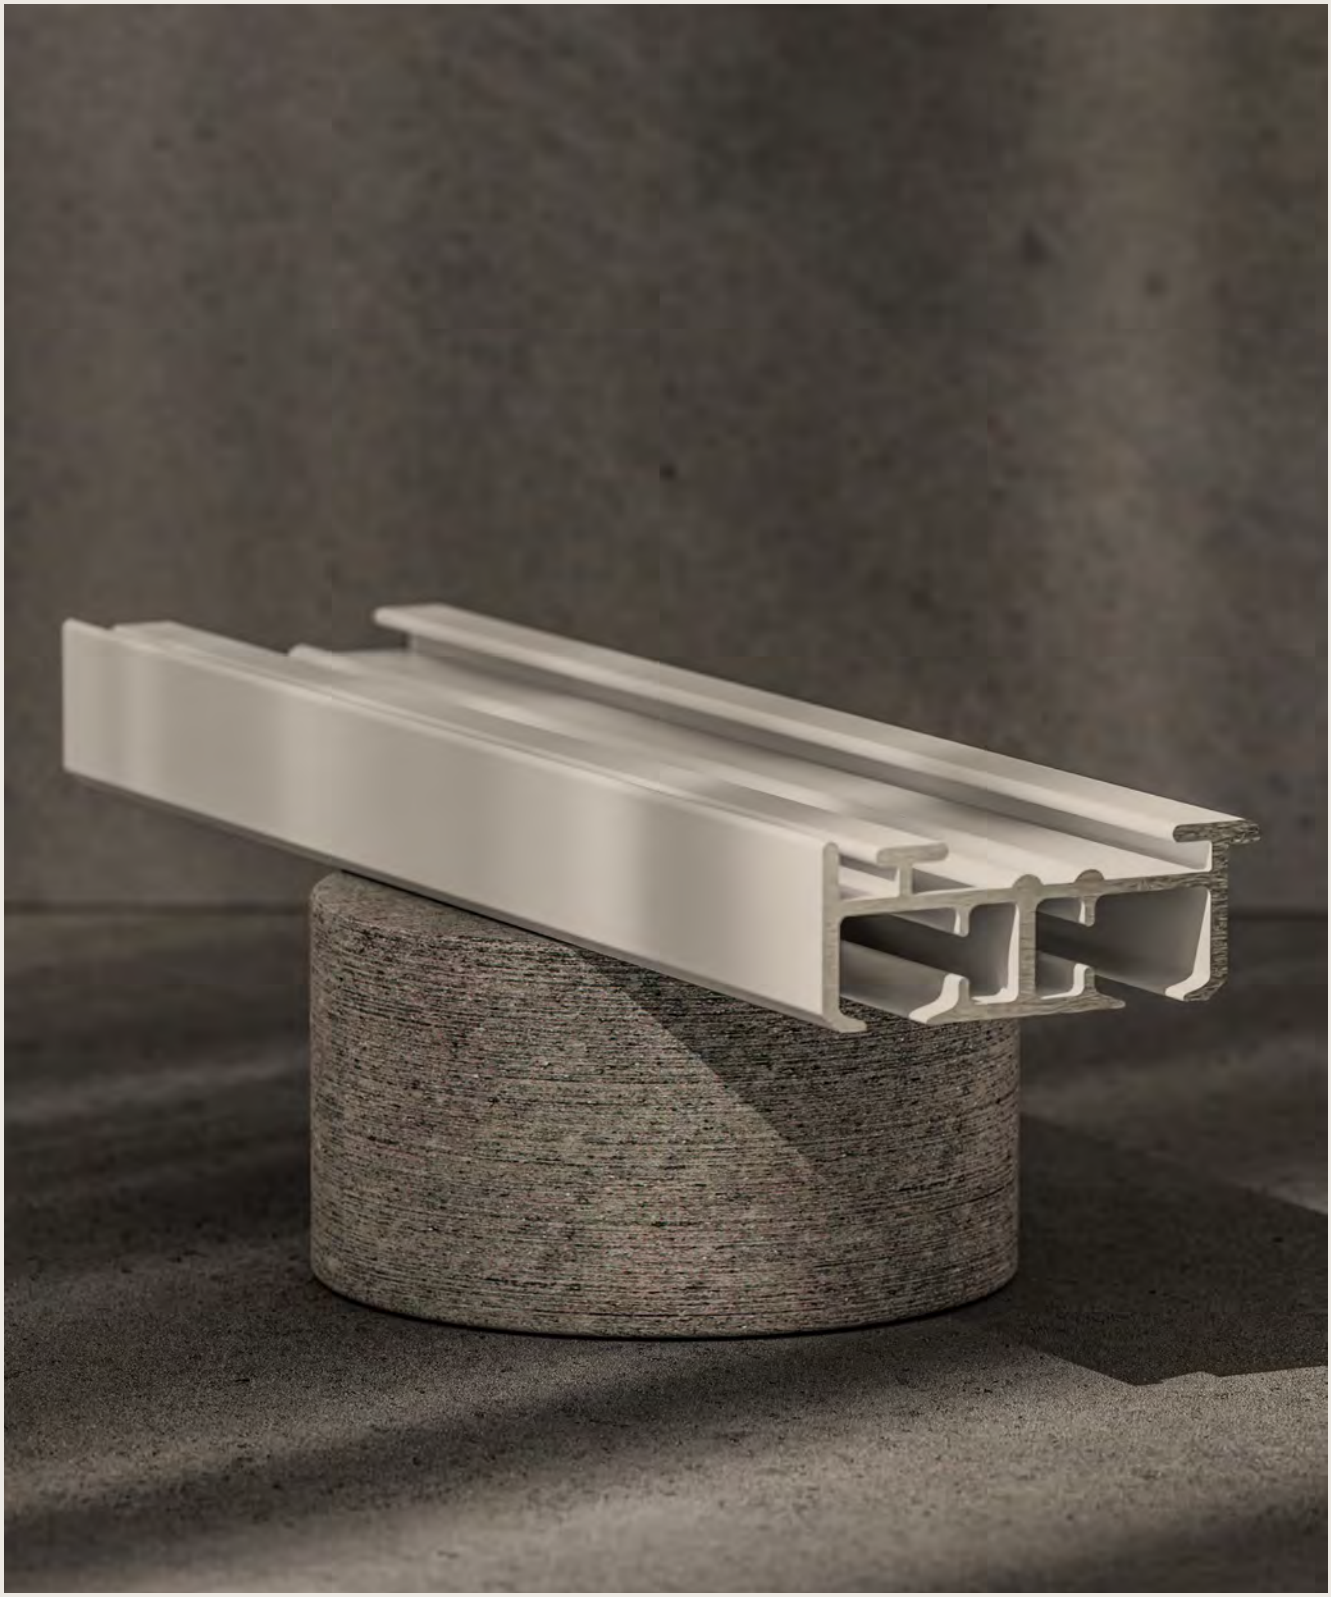
PANEL TRACKS

Panel tracks offer a variety of solutions for both beautiful and practical interior design. They can be used as sun protection for large window panes or as room dividers, both in private homes and in offices. Our panel tracks can be operated either by hand or by cord.

AP 5400 SERIES

5402 / 5403 / 5404 / 5405



AP 5400 is our series of panel systems. Panel tracks are a great solution for large glass sections or as room dividers, both at home and in the office. The AP 5400 series consists of 4 profiles, with two to five tracks. Available as either hand drawn or cord operated.

GUIDING MAX. LOAD TABLE

All Stilling curtain tracks have a maximum limit when it comes to how many kilos of curtain fabric they can carry. To illustrate this, we have created a "max. load" table. Ask your fabric supplier how much the chosen fabric weighs.

If the fabric weighs more than the curtain track is designed to carry, Stilling cannot guarantee functionality and longevity.

PLEASE NOTE

If a curtain track is produced with bending or milling, the recommended max. load is halved. For example, the AP 0589 profile can carry 10 kg on a 6 metre track, but only 5 kg if it has been curved.

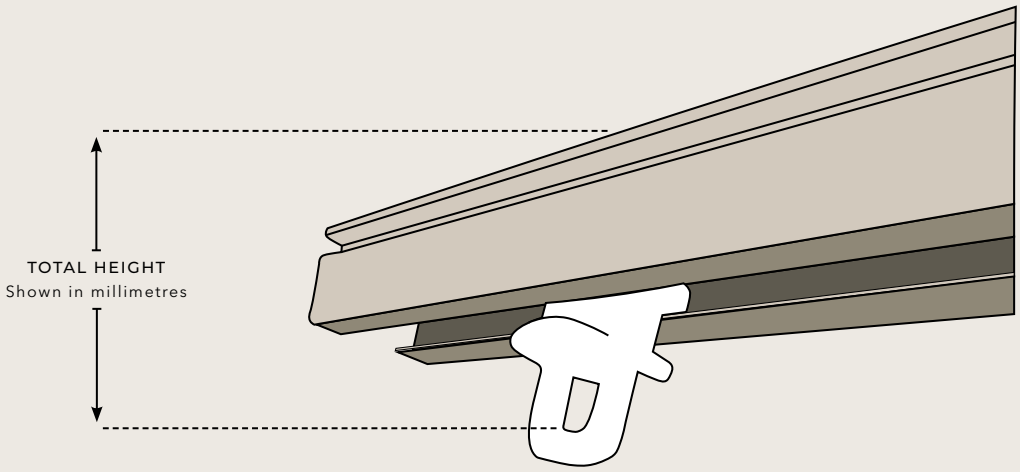
DISCLAIMER

All max. load indications are guiding, as there are many factors that influence how heavy the curtain can be. What type of gliders are used? Is the track mounted in the ceiling or on the wall and on which surface? Which screws and how many brackets are used? Always be aware of these factors when choosing curtain tracks and ask us if you have any doubts.

HEIGHT CHART (NARROW TRACK)

The total height of our curtain trakcs is depending on which bracket and gliders is used. Below is a table showing the total height from the top of the track to the top of the glider loop where the hook is placed.

Please note that the overview is guiding and we make no guarantee in relation to tolerence differences between batches.



Height is shown in millimetres (mm).

CUSTOM LACQUERING

Virtually all of our aluminium profiles can be custom painted in a large selection of colours.

POWDER COATING
Powder coating is the most durable form of coating we offer. The powder coating is electrostatically charged so that the track attracts the powder.

With powder coating, we paint the tracks before bending and curving, as the paint lends itself well to shaping. Choose from all standard RAL colours.

For powder coating, we charge for min. 6 metres profile.

WET LACQUERING
Wet painting is a more budget friendly form of painting than powder coating. We use a special coating which ensures both durability and gliding properties.

With wet painting, we lacquer the tracks after they have been bent or milled. Choose from all standard RAL & standard NCS colours.

For wet painting, we charge for min. 6 metres profile.
