

DOMINGOS
DE SOUSA

Innovating, Evolving and Achieving

SINCE 1961

More than 60 years in the textile Industry

1961

Founded

“How hard it was to achieve a tiny piece of this factory ! We evolved into something greater, but it was slowly and very carefully. Once a step is done, there is no turning back, so you better be sure where you put your feet on.”

Domingos de Sousa, Founder

More than 60 years in the textile Industry

Domingos de Sousa & Filhos, S.A., is a Portuguese family business working in the textile industry since 1961. The experience acquired during these 6 decades makes it a reference in the production of jacquard towels.

Domingos de Sousa was born under the name of its founder and it's been a family business for three generations. Domingos de Sousa & Filhos, S.A. always had the conscience of passing along, the values that it considers essentials:

- Honesty - establish relationships based on trust and transparency
- Quality - reach and even surpass the client's requirements;
- Responsibility - respect for people and the environment;
- Efficiency - be competitive and capable of delivering on time;
- Innovation - invest in new trends and technologies;

Mission, Vision and Business Sustainability

We believe in only being successful when our technical capabilities are interwoven with an intense commitment to sustainable practices that ensure the well-being of our customers, employees and the community around us.

Twenty years ago, our vision was to be recognized as a reference in the production of home textiles. Through our clients positive feedback we know that this milestone has been achieved. The path we made to attain this was mostly related to flexibility, quality and customization, which are now our 'modus operandis'.

Nowadays, the world demands different ways of trading goods, and our lives demands different products, so we have to think of new solutions to adapt ourselves to these changes and also to feel motivated and compelled to achieve new goals. That's why our vision and mission are being rethought.

Fátima Sousa, CEO and Commercial Manager

Compliance and Certifications

For almost 20 years, we have been trying to integrate environmentally friendly practices into our processes, periodically setting goals that will lead us to a more sustainable performance.

From the implementation of water capture systems, which allow us to reuse millions of liters of water a year, to the use of energy from our solar panels, to the installation of a forest biomass boiler, which in addition to promoting the use of natural resources, has reduced greenhouse gases by around 62.2%, all these investments reflect our commitment to sustainability. Reducing our environmental impact, promoting the conservation of natural resources and implementing more sustainable processes in all areas of production are part of our concerns and responsibilities.

Currently, we have more than 12 certifications, which ensure our commitment.

Domingos de Sousa & Filhos is a GRS, OCS and RCS certified company. Only products which are covered by a valid Transaction Certificate are GRS, OCS and RCS certified.
