

Professional Carpet and Rug Design Solutions

Create and color beautiful carpets and rugs using the wide range of NedGraphics software solutions, such as Texcelle, Tuft, Tiling, and True Coloring. These tools enable realistic simulations and virtual sampling, enhancing the design process.

Texcelle

- Design beautiful carpets, tufts, and prints with versatile tools.
- Freehand draw, edit, or transform existing designs with ease.
- Create color books, recolor patterns, and work with scales, repeats, and layers.
- Access a wide range of color standards with improved accuracy.
- Save time and costs with realistic product simulations.

New in NedGraphics 2025:

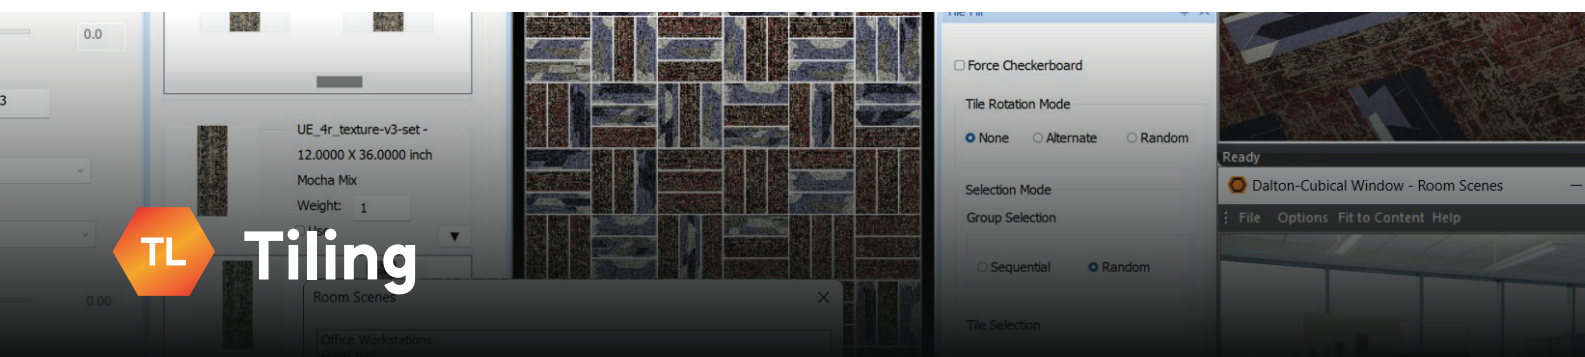

- **Cloud Access:** Collaborate seamlessly across devices.
- **Global Selection:** Shortcut for quick pattern or color changes.
- **Enhanced Printouts:** Detailed yarn placement guides.
- **Snap-to-Guideline:** Align selections for precise placement.
- **'Shuffle' Simulation:** Preview textures before finalizing.
- **Resizable Overlap Table:** Better visibility for complex designs.

- Design and manage the structure of any tuft or carpet pattern with improved precision.
- Get instant alerts for any design errors or inconsistencies, reducing downtime.
- Assign yarns to needles and set high-low patterns with CAM step motion for enhanced control.
- Save time and resources with high-quality simulations and advanced yarn book recoloring.
- Generate optimized production files compatible with a wide range of tufting machines, ensuring seamless output.

New in NedGraphics 2025:

- Sync all yarns with yarn book settings for consistent and accurate recoloring.

- Design floor layouts with diverse tile options, colors, and patterns.
- Suitable for carpet, ceramic, porcelain, marble, LVT, and hardwood flooring.
- View layouts in ultra-realistic room scenes with adjustable tile positions.
- Combine carpet and wood planks in a single layout seamlessly.
- Calculate tile usage in square meters (m²) or square feet (ft²) for precise planning.

- Recolor product visualizations using yarn books or custom color palettes.
- Work seamlessly with multiple patterns at once.
- Create and print custom virtual sample templates.
- Recolor texture simulations made with NedGraphics Texcelle.

New in NedGraphics 2025:

- **Standalone Yarn Book:** Now compatible as a standalone tool for Jacquard and Tuft licenses, expanding beyond True Coloring.

Jacquard

- Auto-generate weft and warp scales directly from your designs.
- Scan and save custom yarns with automatic texture generation.
- Export card views with design colors for streamlined production.
- Visualize weave structures in real time.
- Instantly create production data for efficient output.
- Integrate float checking and correction, both manual and automatic.
- Support multiple Jacquard formats (Bonas, Vandewiele, Stäubli, etc.).

The NedGraphics Advantage

Supports Sustainability

Boosts Creativity

Enhances Connectivity

Accelerates Productivity

NedGraphics is a leading developer of CAD software solutions created specifically for apparel and retail, home furnishings, flooring design and various other textiles. NedGraphics products allow designers to exercise full creative freedom while improving efficiency, productivity and accuracy to create production-ready artwork.
