The Now MT35 Built-in Motorized Wave
Curtain Poles by Elementi Powered
feature:

A compact rear-driven patented design
allowing a wide choice of end finals.

<https://youtu.be/nh9FwdLvup8>

NOW 35 MM COLLECTION

It is simple and stylish featured which also makes simple lifestyle window furnishing easy.

At Elementi Powered we believe that curtain poles are not just functional items, but also an essential styling element for home décor.

Now Collection Poles are oriented to blend with simplicity home interior styles.

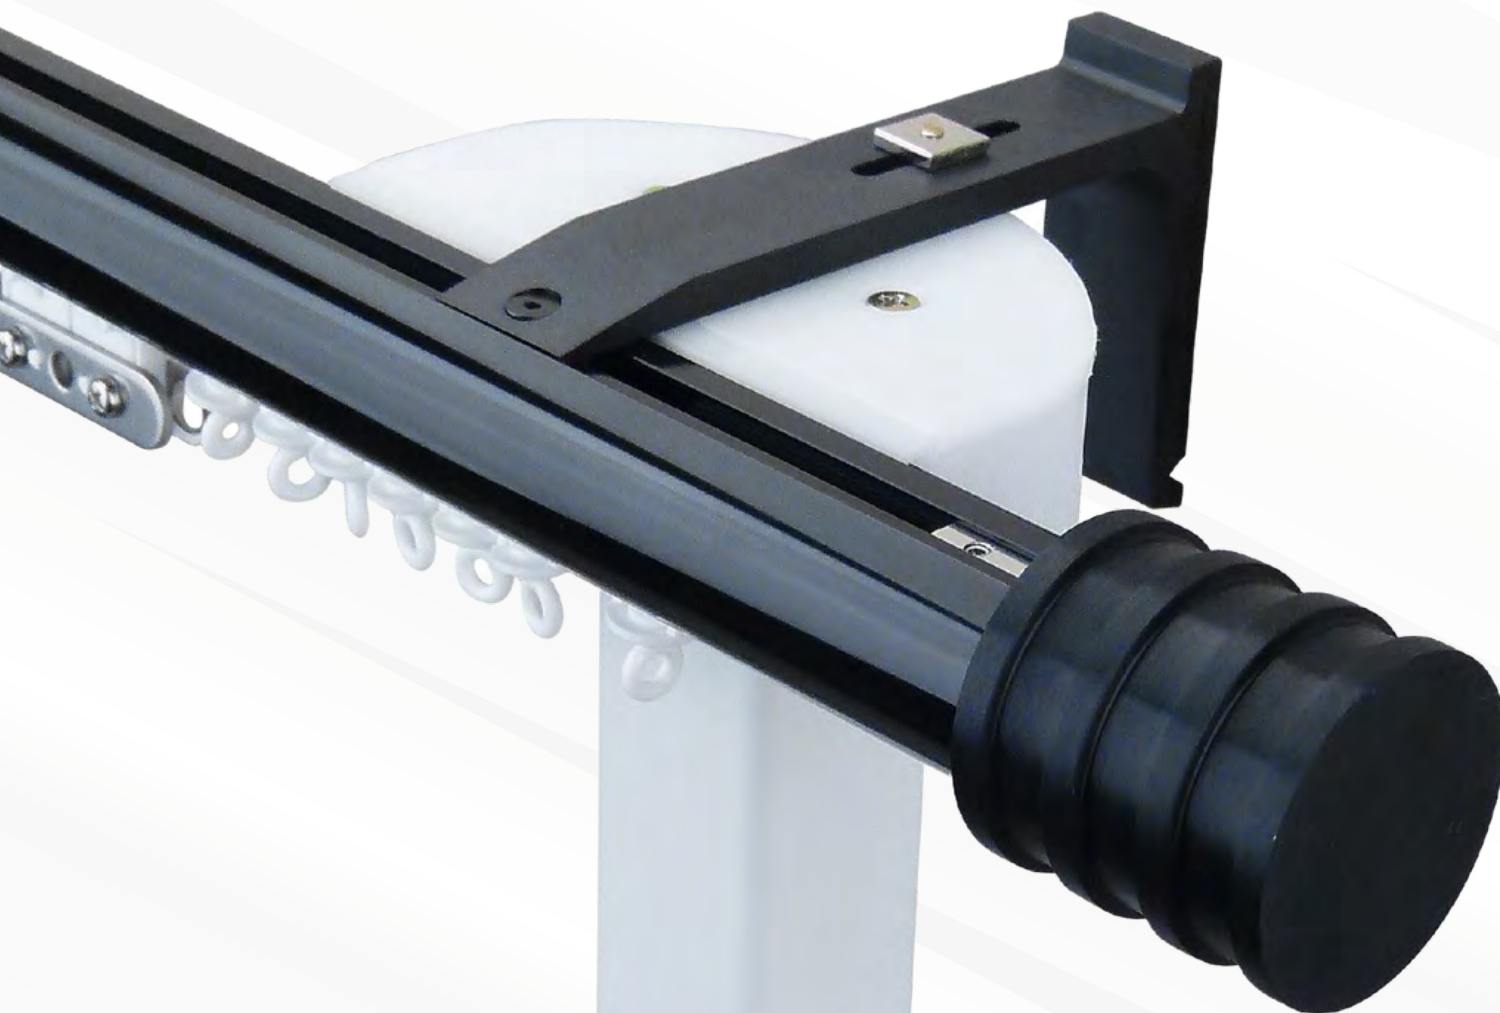

“Challenged to combine the best features of both a motorized track and a pole...”

+

“...we developed the first fully rear-driven motor design in the market.”

“A patented design unique to us.”

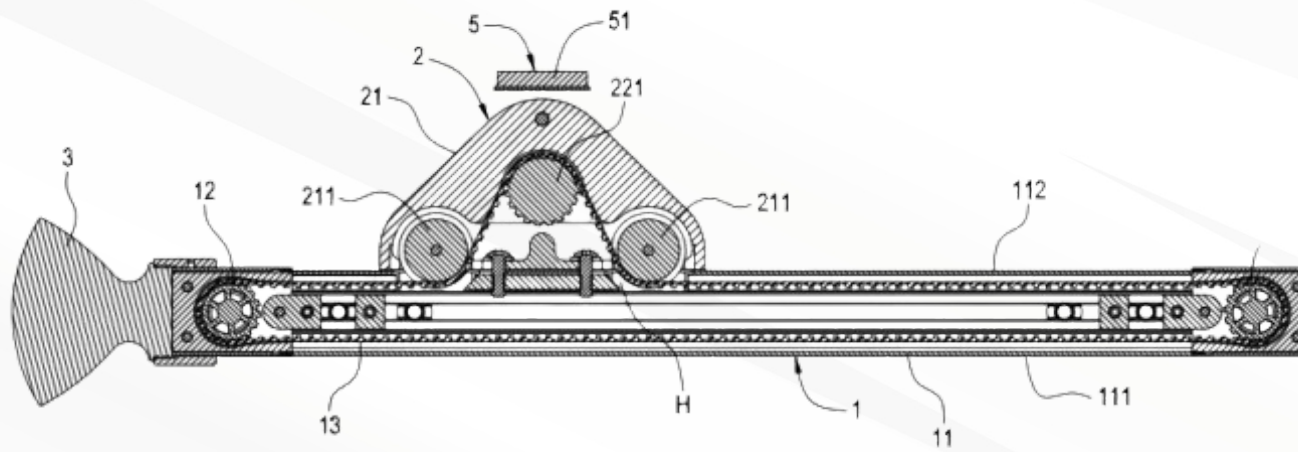

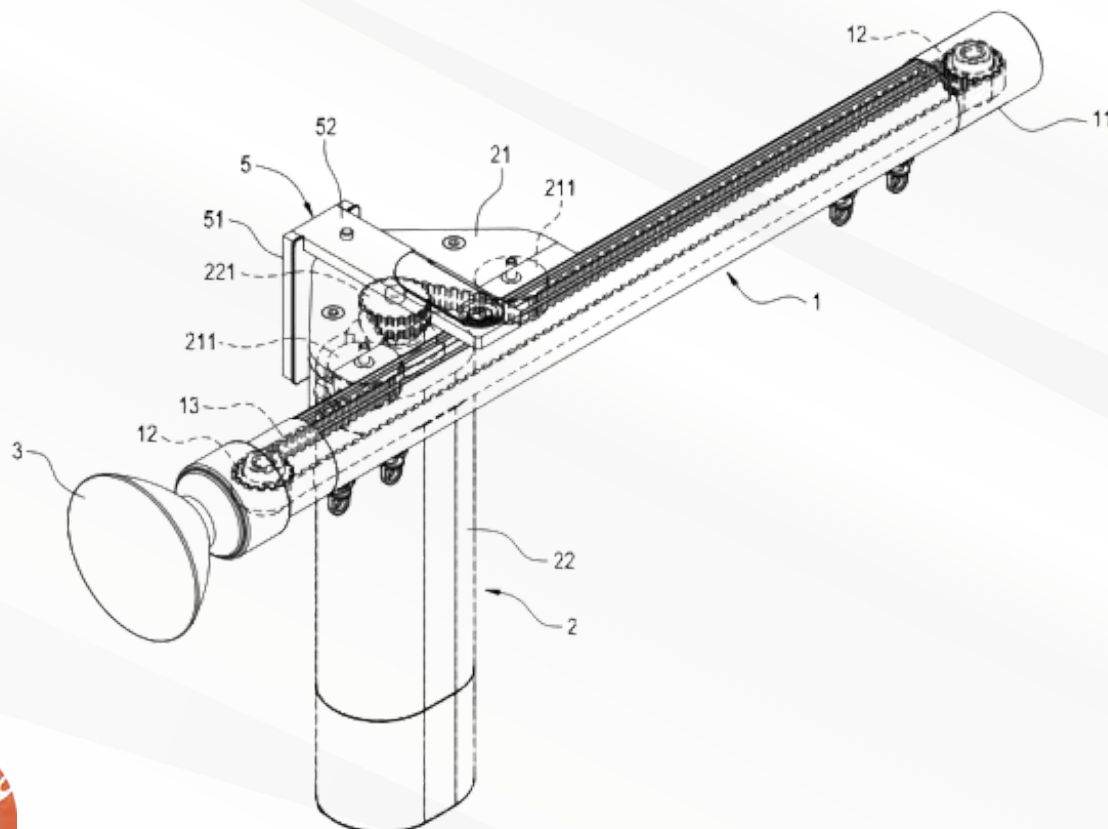

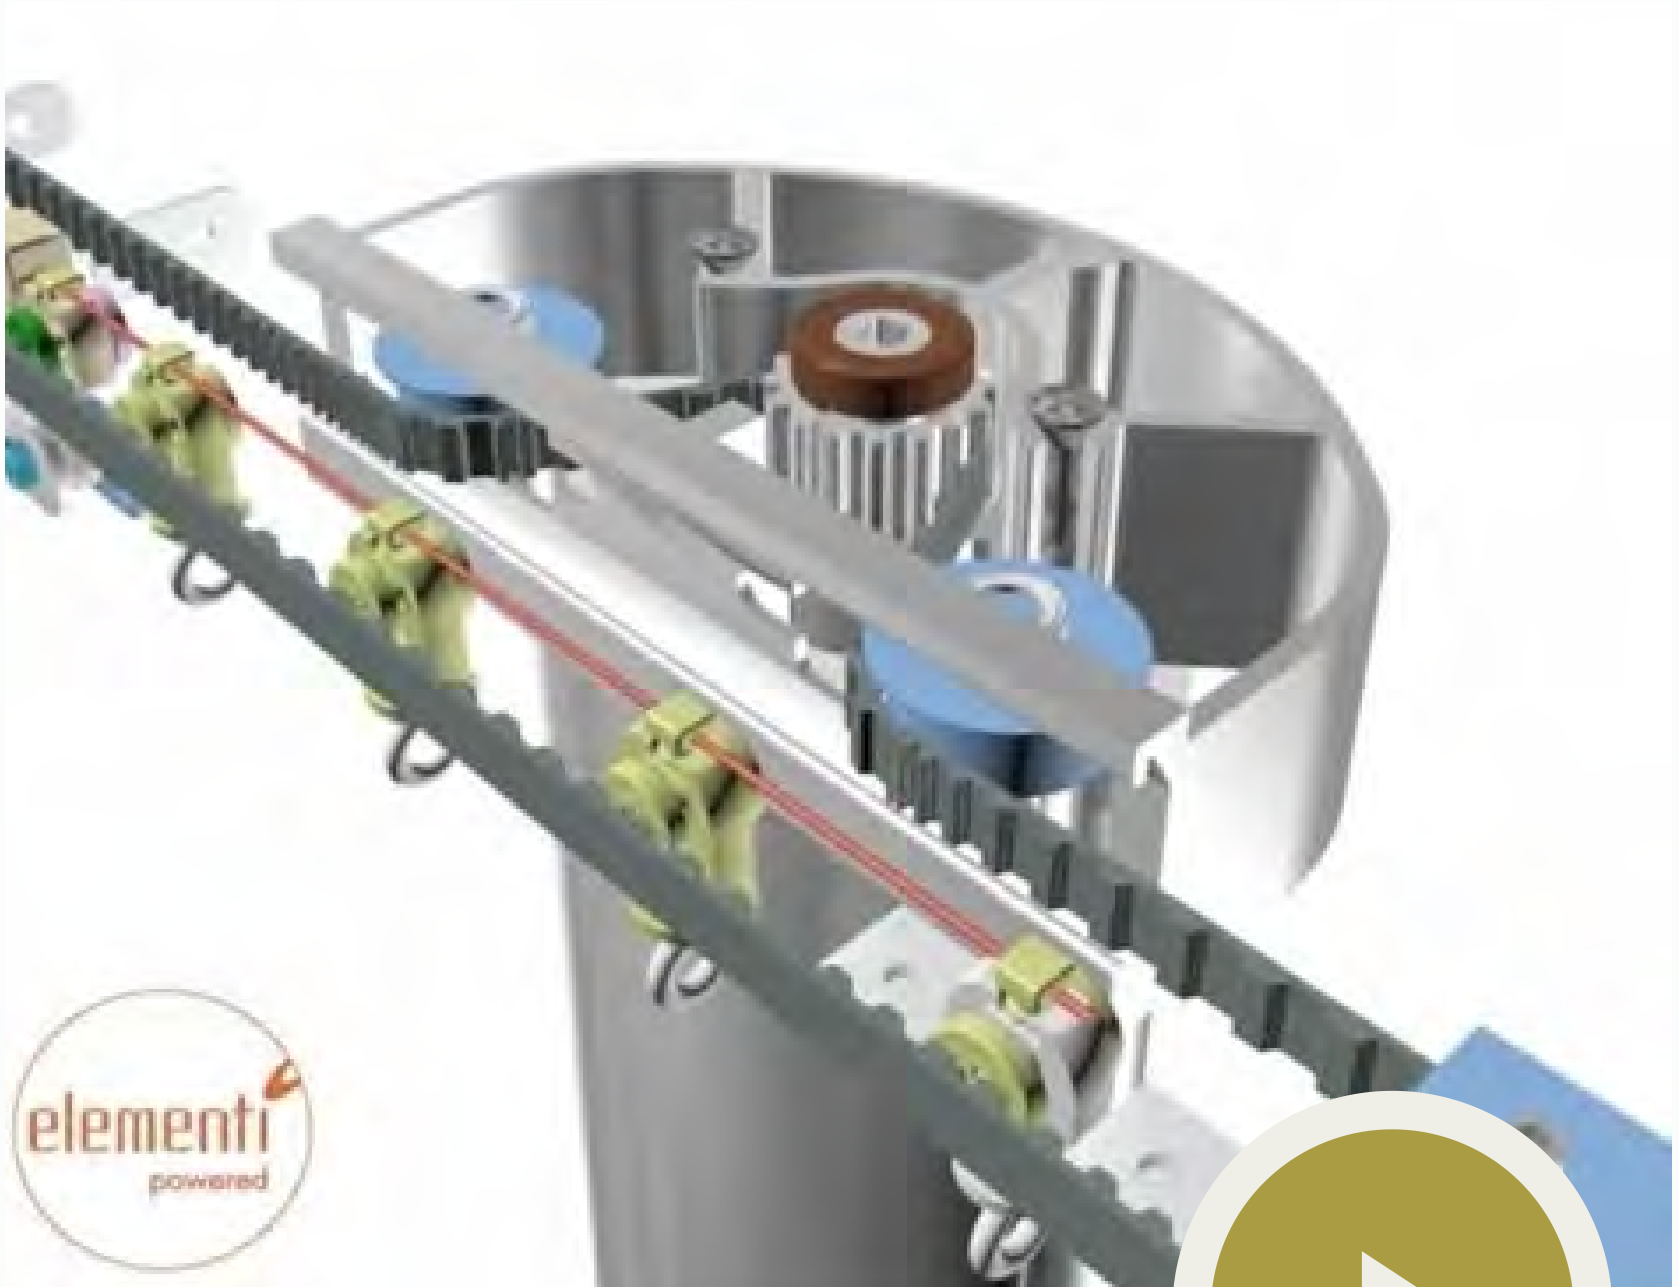

FIG. 4

“Designed in the UK by Neil Harrison.”

COLOURS

Combine our three pole colours with exquisitely styled finial designs – simple and stylish featured.

- NATURAL
- BLACK
- WHITE

The MT35 Now collection is accented by 5 finial designs that are carefully crafted from aluminum.

The Concealed Bracket offers virtual invisibility, with neatly concealed fixings.

The MT35 Built-in Motorized Poles for Wave Curtains by Elementi Powered feature:

- A compact rear-driven and built-in motorized design allowing wall surface fitting and a wide choice of decorative pole end finals.
- The most compact design of motorized decorative curtain pole on the market.
- The Coulisse motor is one of the most popular by far to fit our pole system, but we are flexible if you prefer to use your own source too. There are other adapters available for mass users upon request.

Round Profile Ceiling Fix Bracket

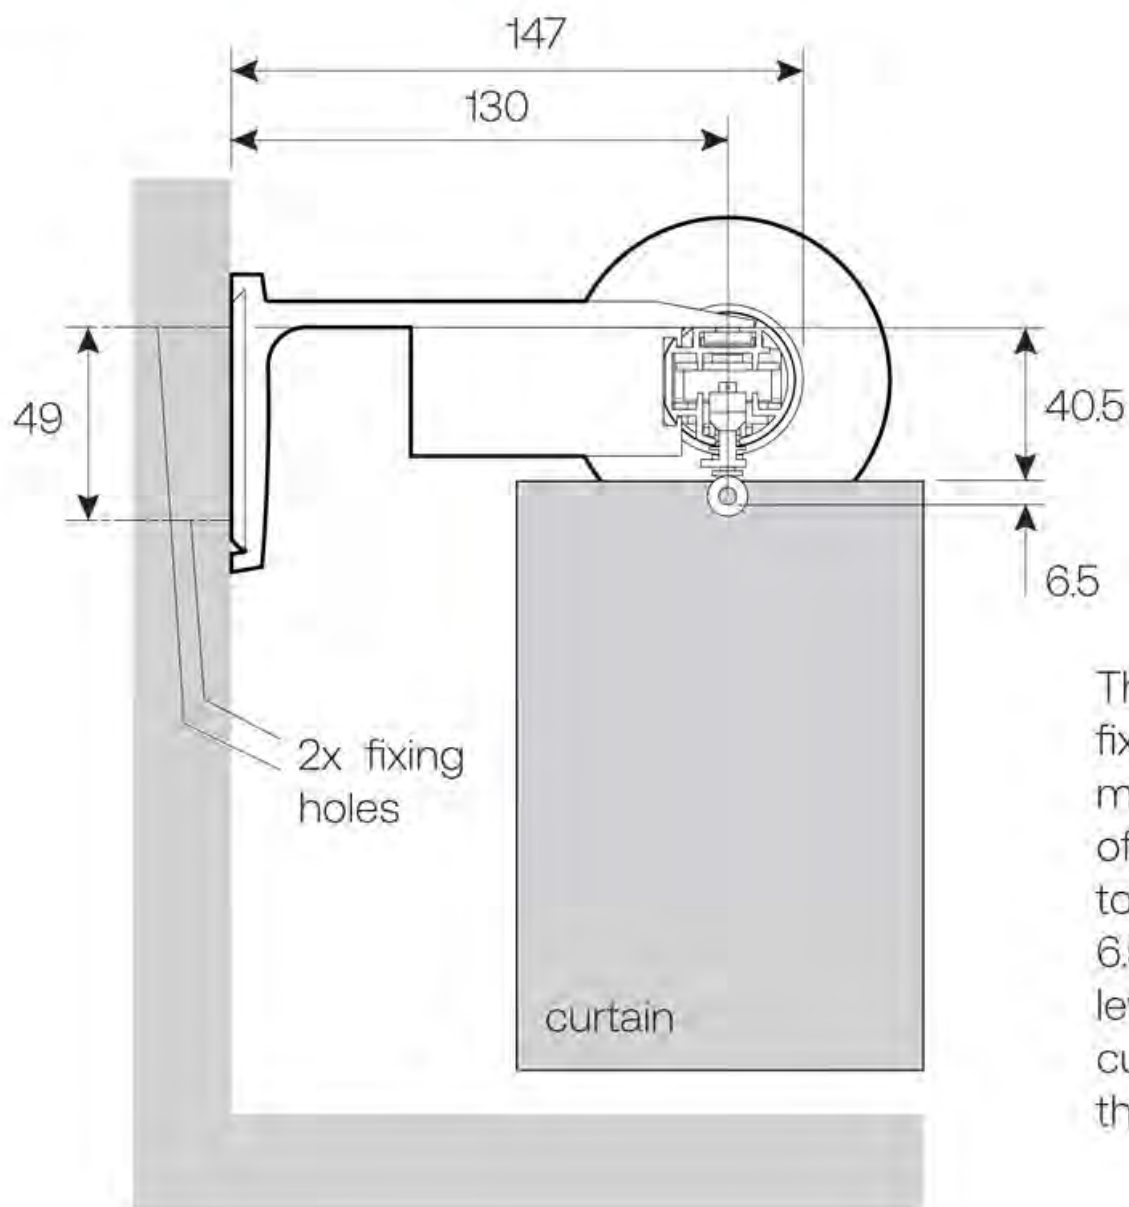

There are separate detailed illustration brochures for measuring, installation, and workroom information. The brochures will be available soon. Followings are examples to be shown.

For high window outside of frame installation, the curtain or sheer covering size are suggested to be 150 mm wider each side and 15 mm above floor.

60 mm or 80 mm wave gliders are available – please see our detailed planning instructions to work out exact sizes for poles and curtain fabric with ease.

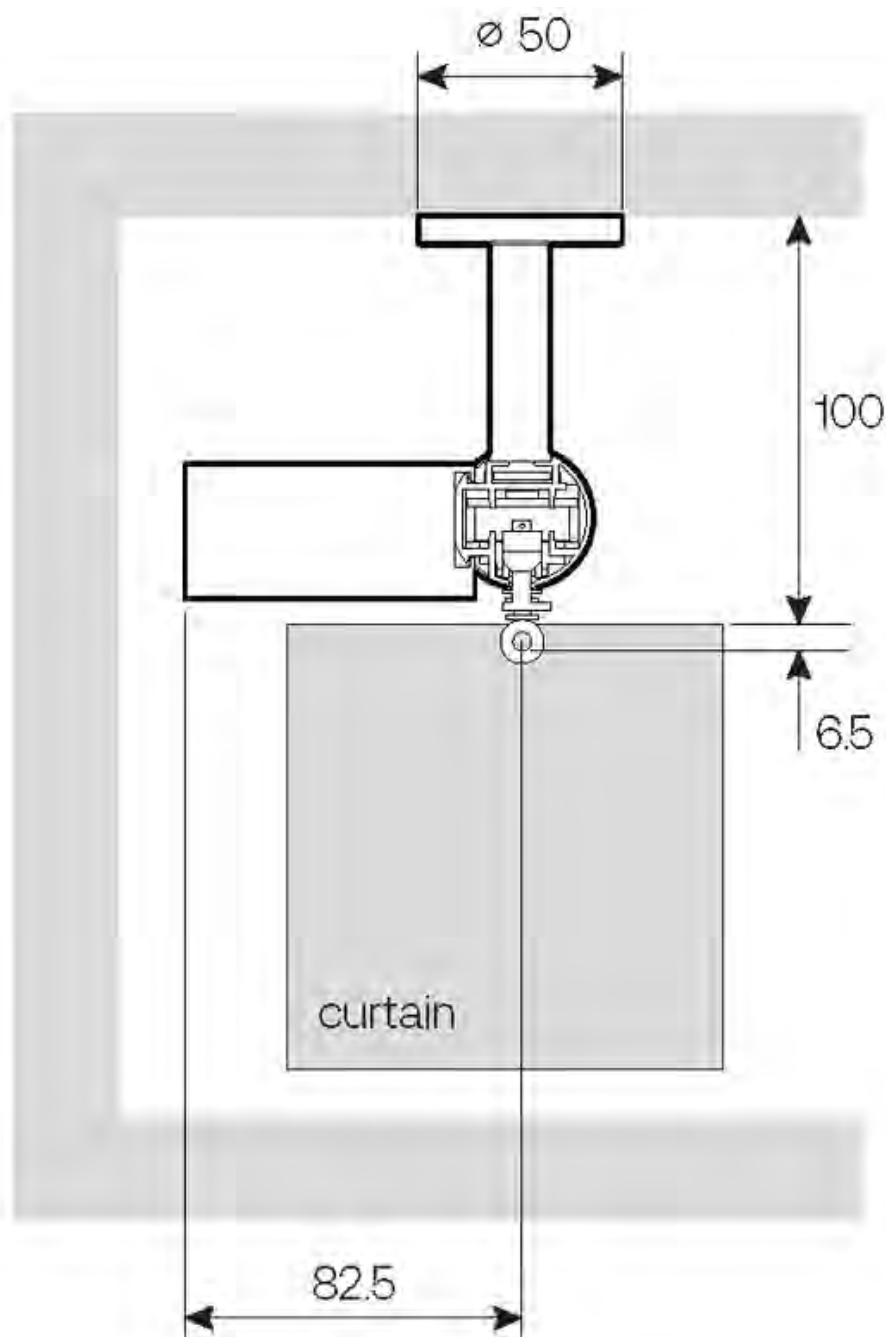

The upper wall fixing hole is 40.5 mm above the top of the curtain. The top of the curtain is 6.5 mm above the level where the curtain hook sits in the glider.

BRACKETS

Concealed bracket

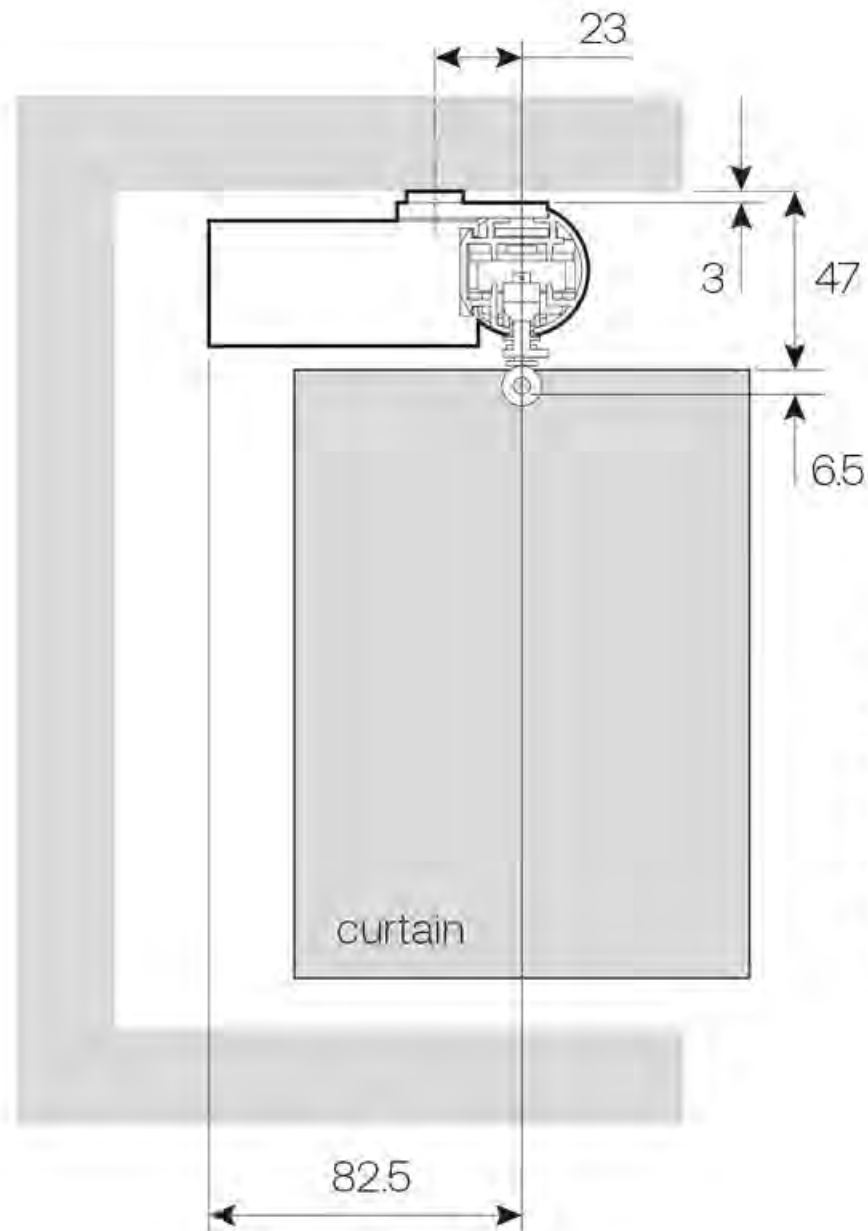

The ceiling level is 100 mm above the top of the curtain. The top of the curtain is 6.5 mm above the level where the curtain hook sits in the glider.

BRACKETS

Round Profile Ceiling bracket

The ceiling level is 47 mm above the top of the curtain. The top of the curtain is 6.5 mm above the level where the curtain hook sits in the glider.
