The Motorized Oslo MT35 Built-in  
Motorized Wave Curtain Poles by  
Elementi Powered feature:

A compact built-in patented design  
allowing a wide choice of end finals.

<https://youtu.be/nh9FwdLvup8>

# OSLO 35 MM COLLECTION

A perfect combination of functionality and style, designed to complement urban luxury and other décor schemes.

At Elementi Powered we believe that curtain poles are not just functional items, but also an essential styling element for home décor.

Our style and design oriented collections provide easy-to-blend features for most interior designers.

*“Challenged to combine the best features of both a motorized track and a pole...”*

+

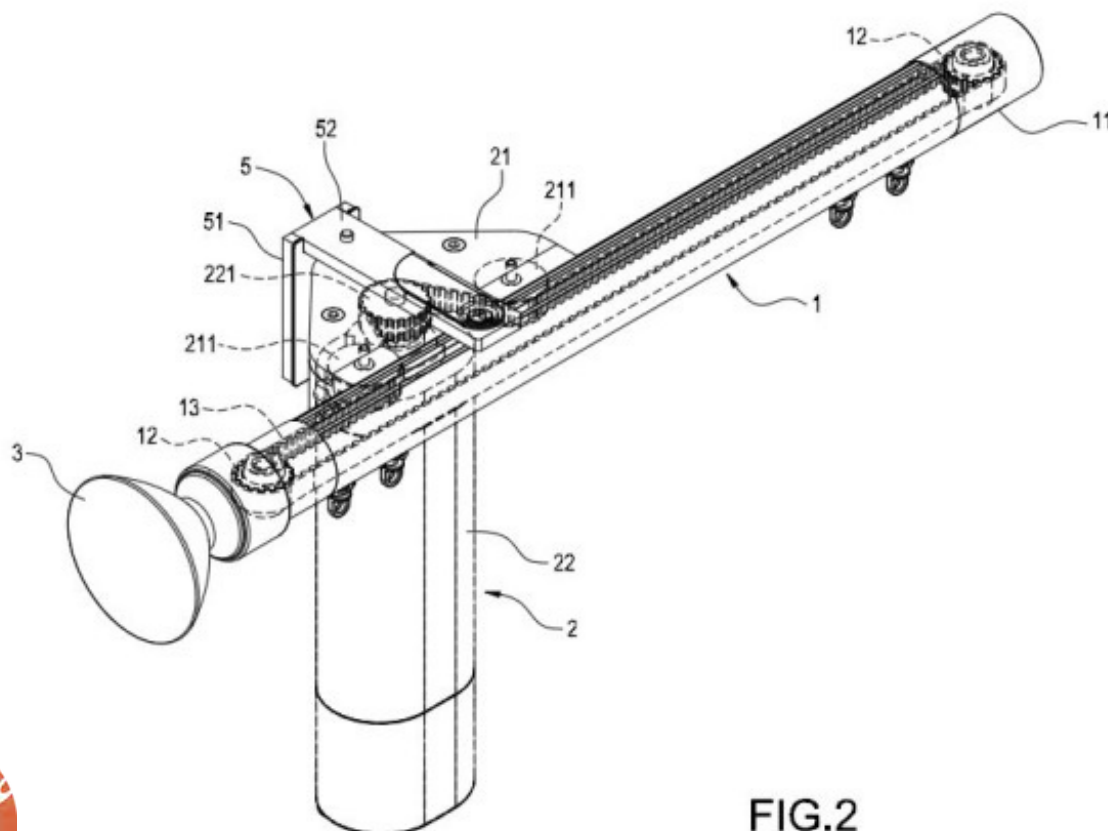

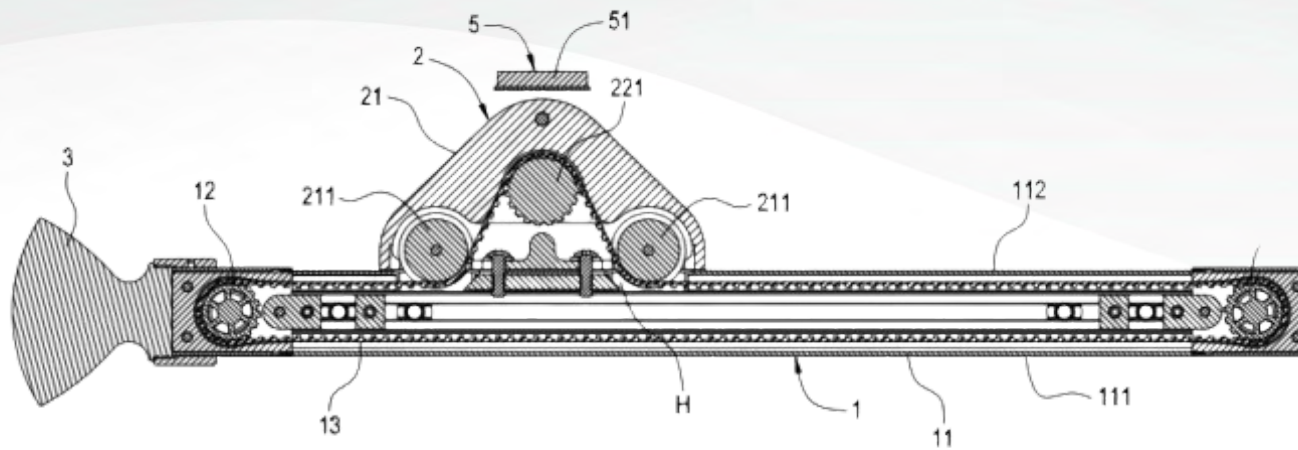

*“...we developed the first fully rear-driven and built-in motorized design in the market.”*

*“A patented design unique to us.”*

*“Designed in the UK by Neil Harrison.”*

Both pole sides available

# COLOURS

Combine our three pole colours with exquisitely styled finial designs – the crystal-clear acrylic accenting a luxury modern lifestyle.

- NATURAL
- BLACK
- WHITE

The MT35 Oslo collection is accented by 6 finial designs that are carefully crafted from acrylic and aluminum.

The Concealed Bracket offers virtual invisibility, with neatly concealed fixings.

The MT35 Built-in Motorized Poles for Wave Curtains by Elementi Powered feature:

- A compact rear-driven and built-in motorized design allowing wall surface fitting and a wide choice of decorative pole end finals.
- The most compact design of motorized decorative curtain pole on the market.
- Flexible supply in any quantity of custom sizes to most cities worldwide in 14 days.
- The Somfy motor is the most popular by far to fit our pole system, but we are flexible if you prefer to use your own source too. There are other adapters available for mass users upon request.

ROUND PROFILE  
CEILING FIX BRACKET

For high window outside of frame installation, the curtain or sheer covering size are suggested to be 150 mm wider each side and 15 mm above floor.

60 mm or 80 mm wave gliders are available – please see our detailed planning instructions to work out exact sizes for poles and curtain fabric with ease.

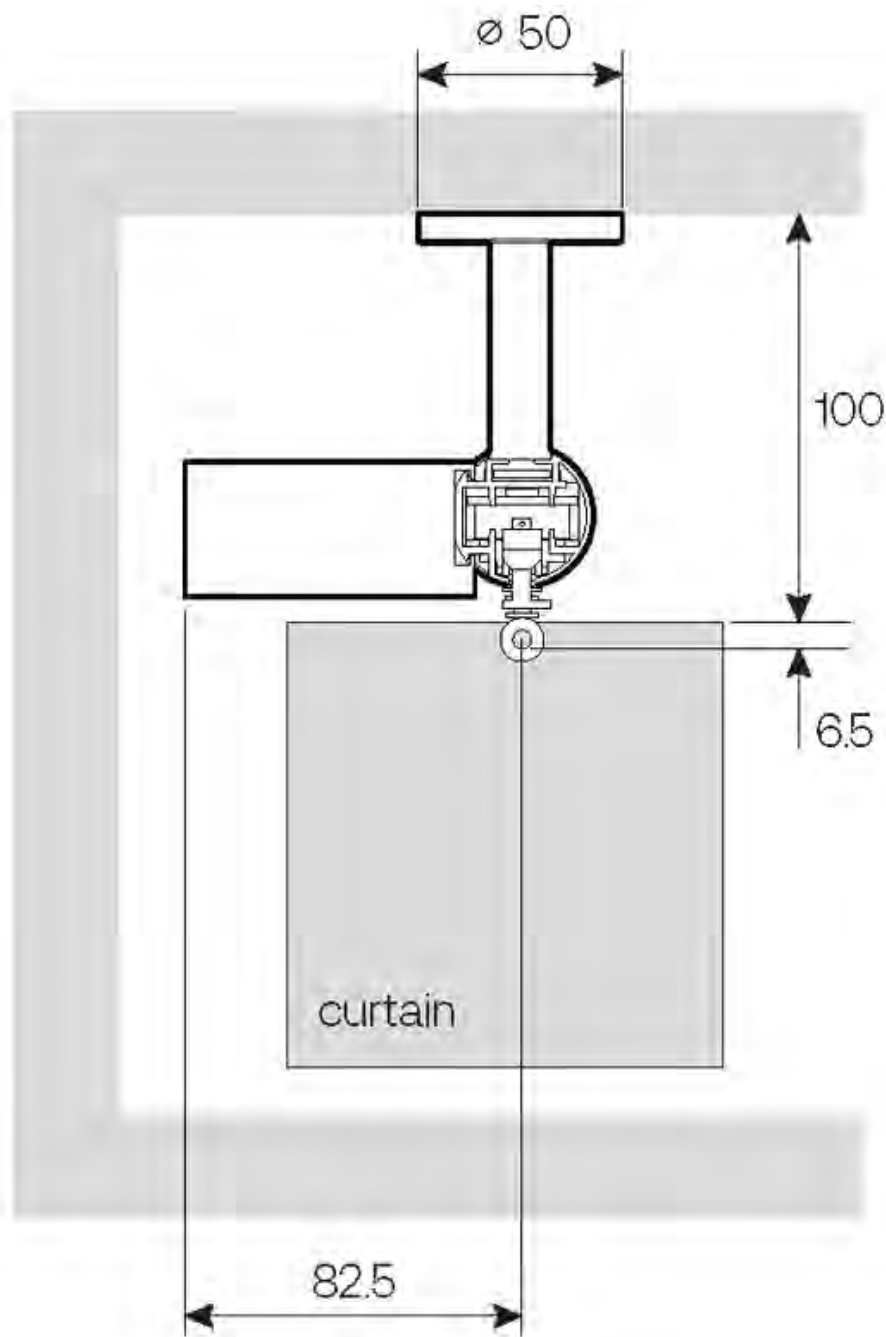

The upper wall fixing hole is 40.5 mm above the top of the curtain. The top of the curtain is 6.5 mm above the level where the curtain hook sits in the glider.

# BRACKETS

Concealed bracket

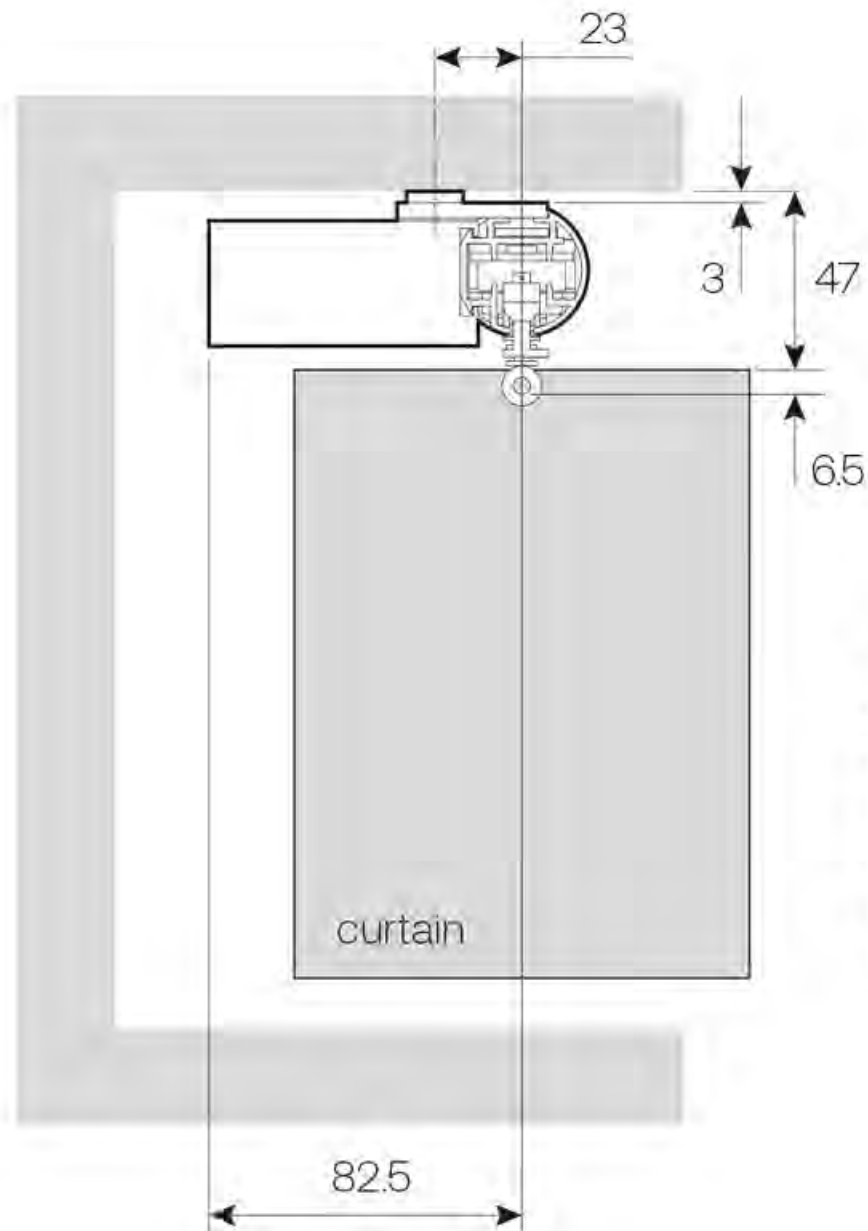

The ceiling level is 100 mm above the top of the curtain. The top of the curtain is 6.5 mm above the level where the curtain hook sits in the glider.

# BRACKETS

Round Profile Ceiling bracket

The ceiling level is 47 mm above the top of the curtain. The top of the curtain is 6.5 mm above the level where the curtain hook sits in the glider.

# POINT OF SALE

## TABLE WALL DISPLAY

Elementi presents the 3-pole display unit.

This beautifully compact sales aid may also be wall hung for a striking interior display.

# POINT OF SALE

Reshippable plastic box  
containing a fully functional  
pole housed in a knock-down  
wood frame. This compact-  
design display unit is  
immediately available for you  
to fit a Somfy motor.

# COMPATIBLE MOTORS

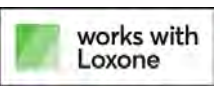

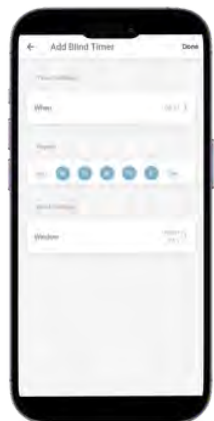

Coulisse motor is one of the most popular by far to fit our pole system, but we are flexible if you prefer to use your own source too. There are other adapters available for mass users upon request.
