Ø ***ZERO DUTY ON IMPORTS TO USA FROM MEXICO***

DROP SHIPMENT POSSIBILITIES

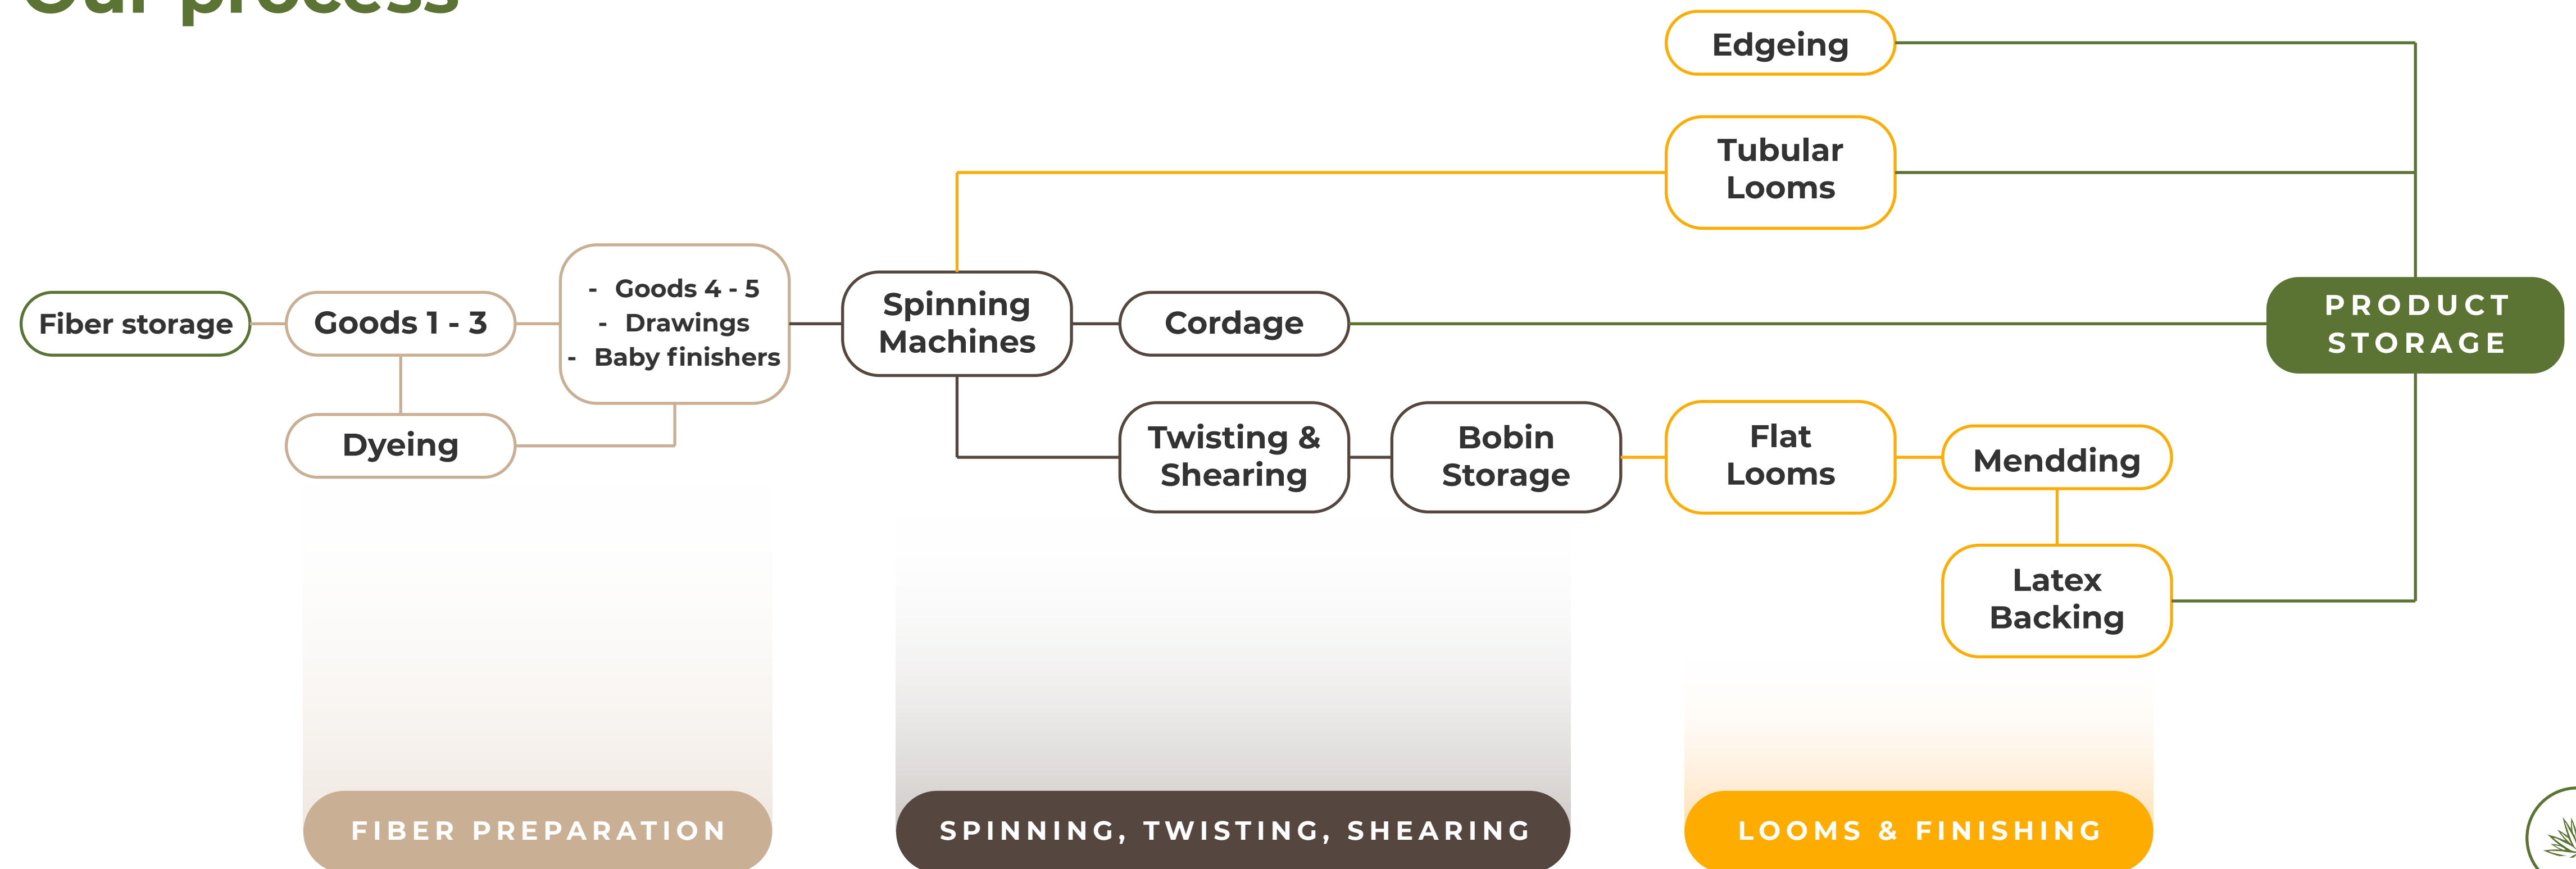

VERY LOW TRANSIT TIME

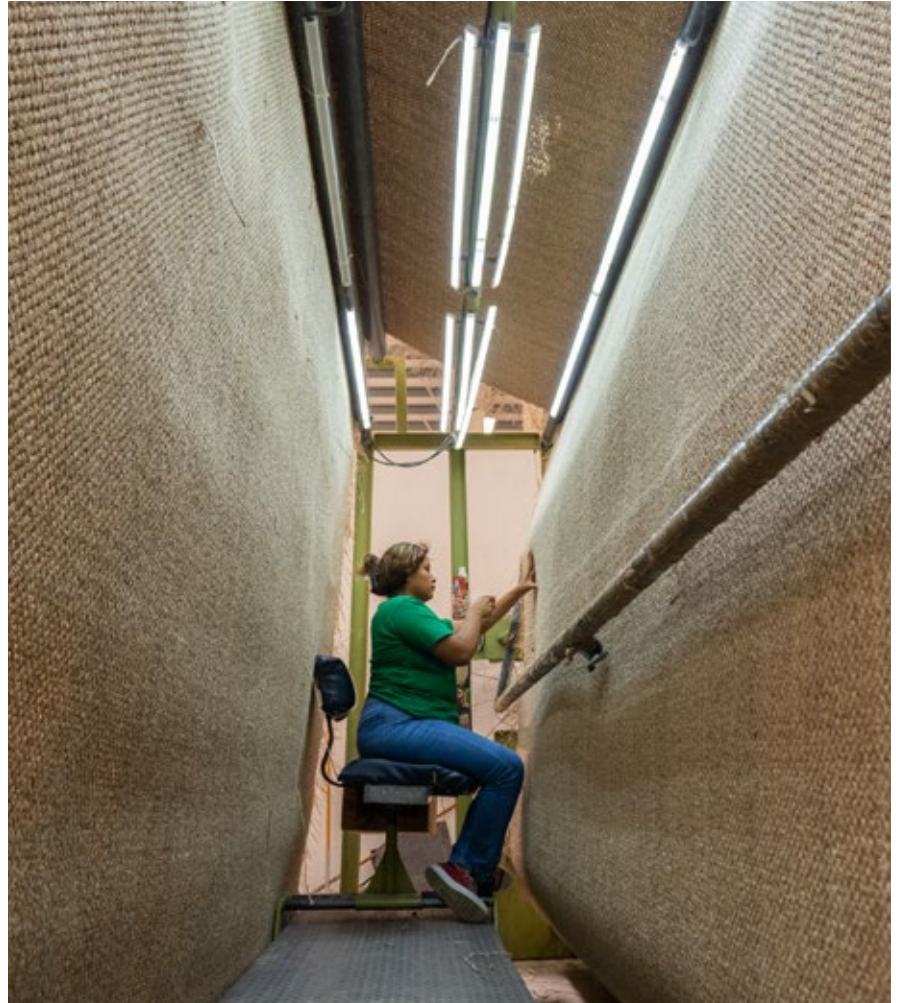

Our process

Galery

Our goal: To be self-sufficient

We are promoting the plantation of 1,700 hectares of Sisal plants. Now we have an advance of **843 hectares planted.** Sisal is a native Yucatan plant because our land makes it easy to grow.

Sisal Fiber has been declared as one FUTURE FIBER by the Food and Agriculture Organization (FAO).

Sisal plants can survive on minimal water and are well-suited to dry, semi-arid regions. The plant's adaptations allow it to store water in its leaves, making it resilient to periods of drought.

Social Responsibility

Absolute 100% environmet friendly

Strict enforcement of labor legislation

Hired people with different capabilities

Donation of essential goods at special events

Energy Responsibility

We have a commitment to the environment and corporate social responsibility, using not only fibers of natural source, but also contributing to the use of renewable energy.

At Sisal Tejidos Yucatán, **we installed 1,090 solar panels that supply clean electricity to the entire factory,** allowing its optimal operation while reducing our carbon footprint.
