PRODUCT

CHILD SAFETY

J&J
STAMINA

Selected ideal child safety devices like chain holders and chain connectors which are able to fix up the chain or cord and prevent children from tripping or strangling.

To ensure your window blinds are child safe, we have the following solution for your check.

Use the chain break connector for the chain, the loop chain will break apart under undue pressure.

Use the safety tassel for the cord, the loop cord will break apart under undue pressure.

← Use the cord/chain holder to fix up the cord or the chain

Use the cleat to fix the cord →

← By Cordless/Chainless System:

The design of crank roller blind system, spring roller blind, wand control vertical blind, remove the need for operating chain or cord.

Wand control vertical blind

Crank roller blind

Spring roller blind

By Safety Devices for Roman blind →

- ♦ Automatically loosened: Once the loading weight is heavier than 3kgs, the device will be loosened automatically to remove hazardous loop
- ♦ Rapid re-installation function: After loosened, the clip is easy to reassemble to save time
- ♦ Anti-UV treatment: Since the item is set at the back of Roman blind, it would be exposed under UV for long time. It has the Anti-UV treatment to extend the availability.
