

Global Recycled Standard

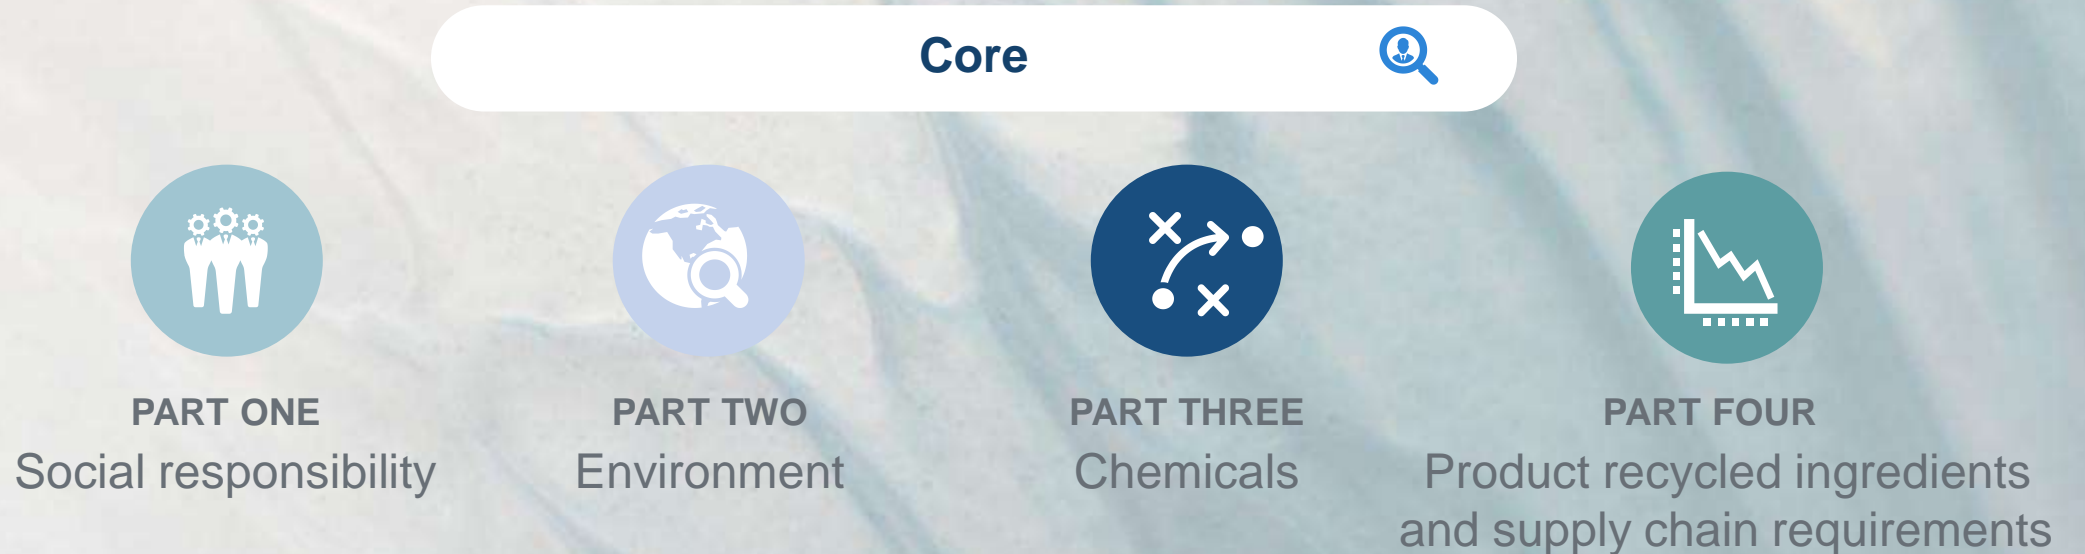

[CLICK TO DISCOVER](#)

What is GRS ?

Originally drafted by the Control Union (the certification body of the International Environmental Management Union), ownership of the standard was later handed over to the Textile Trading Organization. GRS certification is an international, spontaneous, complete standard, through the third-party certification can examine the enterprise's product recovery rate, product status, social responsibility, environmental protection and chemical restrictions and other capabilities, is a practical industrial tool. By obtaining this international certification, manufacturers can enhance the green competitiveness of their products.

GRS is specified for the needs of the textile industry to check recycled products or certain specific products, and more importantly for retailers and consumers to understand which parts of a particular product are recycled materials and how these materials are handled in the supply chain.

About us

HANGZHOU DINGSHENG PACKING CO.,LTD

Our company was founded in 1998, major in producing different kinds of bags for bedding and shopping bags. with more than 10 years development ,we now have more than 800 workers, And our new branch factory: Huangshan Dingxin Packing Co. Ltd has been on production since 2007. Our company has expanded a set of production line of environmental PEVA material, and it could produce PE, LDPE, POE, PEVA, MPE, EVA, etc.

The PEVA material through GRS certification, has a recyclable industrial chain.

At present, we have a variety of environmental protection projects, RPET non-woven materials, recycled PET, recycled cotton, recyclable Oxford cloth, paper materials, recycled paper materials, etc. They're all used in our environmental projects, made into products.

For prompt shipment and good quality we enjoy a good reputation among our clients, more than 80% of our goods are exported to West Europe, Russia, Japan, Southeast Asia and USA markets.
