

PROWEAVE

DOBBY WEAVING JACQUARD WEAVING STRUCTURES

Jacquard weaving

JACQUARD MODULE
INCLUDES NUMEROUS
GRAPHIC TOOLS AND
WEAVING FUNCTIONS

Dobby weaving

DOBBY MODULE CONTAINS
ALL CREATION AND
SIMULATION TOOLS FOR ANY
TYPE OF DOBBY FABRIC

Loom export

INTERFACES WITH ALL
DOBBY WEAVING LOOMS,
ALL JACQUARD HEADS,
ELECTRONIC PUNCHERS,
PAPER CARD READERS,
DRAWING-IN MACHINES AND
WARPING MACHINES

POINTCARRE TEXTILE & SURFACE DESIGN SOFTWARE - WWW.POINTCARRE.COM

JACQUARD WEAVING

As easy as a Jacquard in Pointcarre

The Jacquard software enables you to create and modify any kind of Jacquard fabric.

The advantages of Pointcarre

To choose the structure associated to each color of the design, you can:

- * Open a weave from a library of 4000 weaves
- * Drag and drop a weave on the design
- * Customize a basic weave (twill, plain weave, satin)
- * Customize a multiple weave and describe the motion of each warp with each weft by applying basic weaves.

Once a cloth quality is set up, it is easy to drag and drop a new design onto the jacquard pattern and immediately have a new jacquard cloth.

Pointcarre gives you a complete technical sheet of the cloth that can be customized to your needs. It can also be exported to fit into your production sheet program. Pointcarre Jacquard CAD control all weaving looms (Staubli, Bonas, Grosse, Muller etc...)

Plaids and amazing stripes on Pointcarre

Pointcarre enables you to create and modify any kind of dobby fabric.

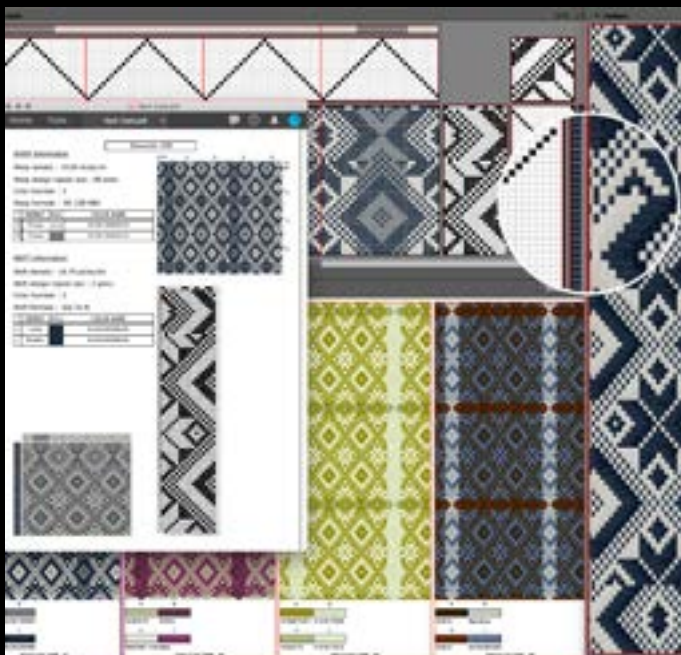

Extensive creation tools

Dobby module helps you to create and modify any kind of dobby fabric. This handy tool makes it quick and easy to create multiple weaves and double weave fabrics.

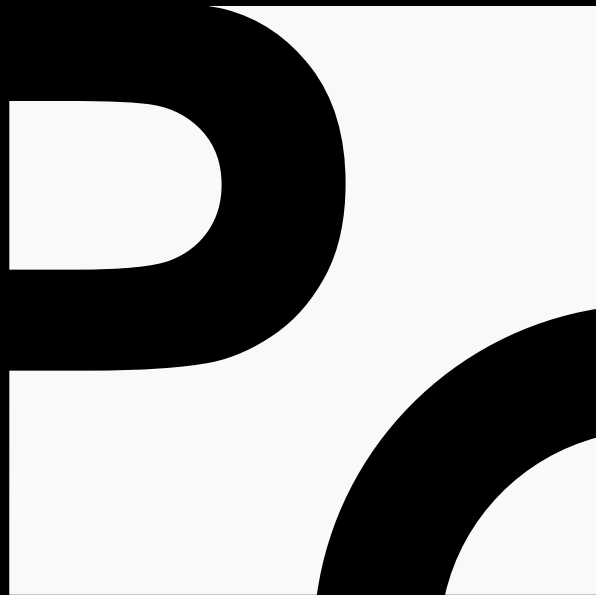

The warp yarn layout can be drawn directly on the cloth, or coming from a weave formula : quickly create plaids and stripes. The Dobby software allows you to check for warp and weft floats. Make corrections directly on the cloth diagram.

Dobby weave software comes with a library of 4000 Dobby weave structures that you can customize with your own weaves. Weaves can be used as new pegplans just by dragging and dropping them onto the peg-plan diagram. The software also comes with a yarn library and the Pantone® Textile Library and CSI Colorwall™. You can reference the colours of your yarns and use them directly in your designs.

It is easy to create simulations using any kind of yarn (boucle, chenille, slub, twisted...). Irregular densities are taken into account when simulating. The quality of Dobby weave simulation is recognized by major textile manufacturers and converters. Simulations can reduce sampling costs. Pointcarre Dobby CAD can control all weaving looms (Staubli, Dornier, Picanol, etc...).
