

RATAN TEXTILES

Pvt. Ltd.

ABOUT US

Welcome to the world of Ratan Textiles.
We merge a contemporary, unorthodox outlook with rich tradition.

Ratan is at the forefront of aesthetically designed & handcrafted home fashion. We manufacture and export home furnishings for prestigious international buyers. We use natural materials such as cotton, linen and blend and use sustainable techniques such as hand-block printing, hand screen, digital screen amongst others to manufacture our products. All our techniques, processes and dyes are AZO-free and REACH compliant.

Designed in line with global trends and 100% made in India.

OUR MISSION

It is easy to just sell cheap but hard to raise the bar and set quality expectations, and we at Ratan prefer the hard way. We not only like working but also enjoying our everyday work process while exceeding our customers' expectations with alluring designs and products.

OUR HISTORY

Established in 1985, and still growing, we are always struck with the bug to keep on trying new things. The rich experience of the founding family is being carried forward translating into slick & contemporary designs under the leadership of the third generation. Sticking to our roots and traditions, we do not shy away from experimenting with the desires of the market, creating our own trends.

We aim to set global benchmarks with our quality standards not compromising on using sustainable & traditional arts such as hand-block, hand-screen and digital screen printing to our advantage. With us, the journey has always just begun.

We are a socially accountable manufacturer and exporter of the finest home textiles and continue to successfully cater to several international buyers. Our facilities provide a livelihood to many skilled artisans and continually comply with various global certifications and standards with sustainability at the core of all things.

PRODUCTION

We at Ratan not only print fabrics but impressions too. Be a part of our modernization journey where the traditional work goes hand in hand with the present-day printing techniques. Where on one side the forever-versatile Digital printing speaks loudly of our contemporary approach, the block printing adds to the forever-evolving traditional method. The handcrafted products then made, bring to light the impeccable talent stored with the artisans.

We also outsource techniques like Rotary Printing and Flat Bed as per the customers' needs.

SUSTAINABLE TECHNIQUES

UPCYCLING

SUSTAINABLE ENERGY RESOURCE

WE GO SUSTAINABLE !

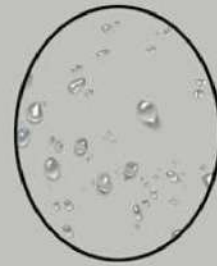

Reduce, Reuse and Recycle is a mantra that we at Ratan practice. Sustainability runs through our production process where we not only employ simple, time-tested and energy efficient methods like hand-block and hand-screen, but we also come up with innovative ways to use the fabrics, rejects, discards and paper scraps.

All the waste water from our processes goes through our water-purification plants, and the recycled water is re-used for other processes.

Our factories are equipped with solar panels & largely run on clean energy.
