The Fabrics with the H2Oh technology can be cleaned in an easy, Fast and comfortable way. There is no more need to use aggressive products or chemicals, just with water.

H2Oh is a revolutionary treatment incorporated to the last generation of Fabrics in order to ease their cleaning and making the corresponding upholstered Furniture best looking and long lasting.

In only three steps:

Remove the excess of staining product that spilled on the Fabric (in case of ink rub with a dry cloth).

Pour water on the stain directly or with a wet cloth until the Fabric gets humid but not too wet. Wait some seconds.

Press the stained Fabric with the cloth and then rub it softly with circular movements until the stain gets off.

If the stain is not removed repeat the same process as many times as necessary; the Fabric will not get damaged since we are not using any aggressive chemical products.

Machine wash.
Delicate cycle.

Do not bleach.

Do not wring
or twist.

Do not tumble
dry or sun.

Can be dry
cleaned.
