

Sustainability

In 2021 Edmund bell joined the Climate Pledge joining over 300 companies globally in pledging to be carbon neutral by 2040.

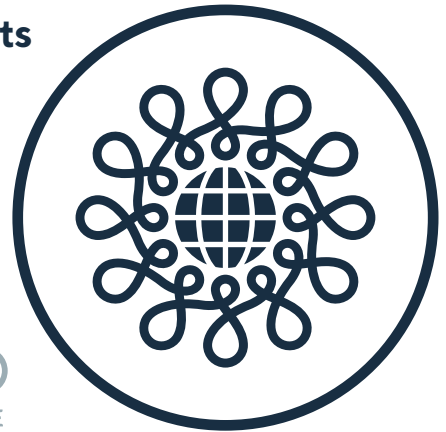

Over
80%

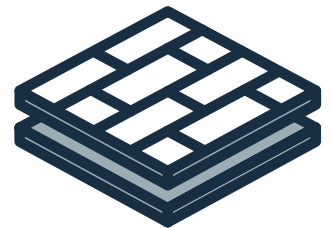

of our product range is now recyclable and we are aiming to increase this number year on year.

Most of our products are certified to STANDARD 100 by OEKO-TEX and we are continuing to add more.

OEKO-TEX®
INSPIRING CONFIDENCE

Rather than be sent to landfills, our fabric waste is recycled and remade into other products used within the flooring industry.

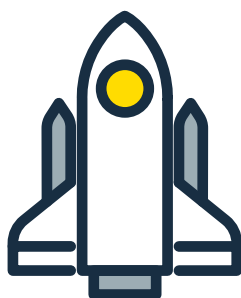

In 2021 we locally coated enough fabric to cover the length of 10,058 football pitches, saving over 408 tonnes on our carbon footprint. That's equivalent to:

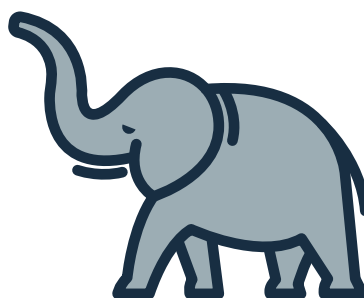

4

blue whales

5.5

space shuttles

65

elephants

60,000

bowling balls
