Performance Fabrics

Just imagine – clearing your mind, you are taking in each moment, one at a time.

Performance Fabrics

Active Line fabrics stand for:

- Maximum simplicity.
- Maximum versatility.
- Maximum functionality.

Active Line is a range of innovative textiles that do a lot more than make your upholstery pretty to look at.

These fabrics incorporate versatility, easy care and genuine everyday suitability. This is what makes them so perfect for the most important place in the world – your home.

The entire Active Line collection consists of modern performance fabrics developed to suit your active life. These fabrics are comfortable, extremely durable and as resilient as they look and feel good. What's more, all Active Line textiles are basically stain and spill-proof, making them a great choice for families and pet-owners.

Enlighten in Active Line fabrics' lasting beauty and high performance every day.

Providing you the best in comfort, style and durability for years to come.

At Höpke, we are committed to offering products that are engineered to just get it right. Our fabrics deliver an uncommon variety of design and versatility. Form and style always follow function.

Prior to entering the market, our textiles undergo rigorous testing in order to ensure they not only meet but exceed our ambitious functional and aesthetic quality standards.

Active Line boasts a wide array of fade-resistant colors, textures and designs, ranging from **classic to on-trend**, while demonstrating **multifunctional performance** with regards to **stain-resistance, breathability and softness**. This is uncompromised quality you can see, feel and experience.

Active Shield

Positively spill-proof

As a result, our fabrics comply with the stringent requirements of the “Eco-Tex Standard 100”, providing you with the performance you seek, without compromising your health or the environment.

These fabrics feature an impressive abrasion resistance as well as the proven “Clean Active” shield by Höpke: extremely robust in contact with soils including oil-based liquids, usually a moistened towel is sufficient to clean stains. The shield's integrated protection also repels water and prevents bacteria from entering the fabric.
