LARS MAIER, MANAGEMENT

KNOWLEDGE AND
INNOVATION – INSPIRED BY

4 GENERATIONS

OF EXPERIENCE

What is the first thing that strikes you in a particularly beautiful sofa? Is it the well-built wooden frame, the comfortable upholstery or the sumptuous padding? Or do your eyes notice what Höpke does best: the choice of an exceptional fabric which elevates a space to a room you want to live in?

We are one of the leading German fabric wholesalers with a reputation for reliable quality management, integrity, excellence in business processes and impeccable customer service for more than 30 years.

A successful family-owned company, we have clear values and a real focus on blending tradition and innovation in everything we do. Our textiles, ultimately, always live at the heart of our attention. With a continuous stock of 2M meters of fabric styles, we are ready to meet our customers' most demanding expectations.

WE HELP YOU CREATE YOUR DREAM FURNITURE.

ACTIVE LINE

Active Line is a range of innovative textiles that do a lot more than make your upholstery pretty to look at. These fabrics incorporate versatility, easy care and genuine everyday suitability. This is what makes them so perfect for the most important place in the world – your home.

RECYCLE LINE

Recycle Line furniture fabrics are made from 100 % recycled PET-bottles. They not only meet our requirements of modern living, they also give lots of plastic waste a second life. In doing so, we maintain our uncompromising quality standards while prioritizing our focus on providing sustainable products.

Q2

Brand name fabrics from Q2 combine creative design with the highest standard of quality: Easy-care and with no chemical treatment, Q2 stands out thanks to our “Made in Germany” commitment and a 5-year warranty. Fabrics from the Q2 second life line combine these advantages with sustainable design. They are made from recycled PET bottles, and can be recycled once again to support the circular economy.

TEMPOTEST

Tempotest stands for high quality, cutting-edge functionality and avantgarde design. These fabrics feature an unprecedented light and color fastness to guarantee brilliant colors and lasting durability for your outdoor living dreams.

SAFETEX

Modern, versatile, durable and highly stain- and water-repellent: SafeTex – the upholstery fabric developed to meet the distinct specifications of health care facilities.

400,000

METERS OF COLLECTION
FABRICS IN STOCK

Over 100 upholstery fabrics collections including more than 7,000 individual articles – our product range speaks for itself. Our selection of woven and pile fabrics, suedes, microfiber materials, synthetic and genuine leathers as well as outdoor textiles offer you enormous creativity for residential and commercial applications.

A DEDICATED
PARTNER TO
**INTERIOR
DESIGNERS.**

We mean it: Our customers are our top priority. Known for our quick and customer-centric service, we are ready to assist – in-person with our local sales agents or via telephone and online with our outstanding account managers.

There is a reason Höpke is valued for our “no-worries-ever” ordering process: We never ask for minimum product or order values, minimum quantities, or surcharges for small orders. All orders are reliably delivered within 24 hours.

HÖPKE AND MONTBEL – A UNIQUE COLLABORATION.

Montbel is a manufacturer of high-end seating furniture which is “100 % Made in Italy”. The company has produced more than 3 million upholstered chairs since its inception in 1959. A strong sense of tradition and pride in craftsmanship combine with Montbel’s strict quality standards without ever discounting comfort nor style of their seating programs.

Complementing this level of know-how with our curated selection of textiles is what elevates the finished piece of upholstery to the highest quality seating option in its class. As the premier German wholesaler, we are able to elevate our partnership with Montbel to integrate our collection range and configuration skills with Montbel’s extensive selection of seating options. Harnessing just the right material to suit a client’s personal needs ensures that the result is tailored and occasionally, one-of-a-kind.

HÖPKE CONTRACT.

Whether your current project is about out-fitting hotels, offices, cruise ships or another application – we set up specialized contract collections for your commercial interiors that can accommodate high traffic and is functional for various types of users. These materials will also meet most European and international flame resistance standards.

WE HAVE PLANTED 5,500 TREES.

SUSTAINABILITY: THE ONLY WAY TO BUILD OUR FUTURE.

To us, sustainability is a key component of our business strategy. Helping preserve nature and animal habitats means helping sustain our own livelihood in the long run. We focus on reducing our ecological footprint early in our processes and therefore implement innovative, environmentally-friendly technologies in our supply chains whenever possible.

PHOTOVOLTAIC MINI PLANT

An essentially infinite natural resource, solar energy has become a more and more prevalent driver of renewable power generation worldwide. We switched gears early: Our very own photovoltaic mini plant has provided our headquarters with green electricity while producing basically zero carbon emissions for over 10 years.

WIFI SCANNER SYSTEM

We view gentle and yet efficient approaches to our natural resources as a key competency in our economic activities. Our state-of-the-art Wifi scanner system enables us to operate a virtually paperless warehouse. This has not only improved materials, energy and water efficiency in our own processes but furthermore helped us avoid unnecessary waste.

PACKAGING

Packaging fulfills essential functions: Primarily during transport and storage it protects the product. Further, it facilitates efficient and space-saving handling of our goods. In order to lessen the impact packaging can have on the environment, we implemented eco-friendly packaging standards years ago and use only 100 % reusable packaging materials.

In collaboration with the organization PLANT-MY-TREE® we have planted 5,500 trees. In doing so, we respond to specific reforestation needs by helping plant a variety of trees in close coordination with local forestry authorities.

Over the coming decades, our principled efforts will support the reemergence of natural habitats for insects and other animals. The reforested areas are protected from clearing for at least 99 years, a time span underlining our long-term commitment towards climate control.

Our regional mixed deciduous and coniferous forests do not just please the eye, they play an important role in our ecosystem: Through the process of photosynthesis, CO₂ from the atmosphere is being converted to carbon and oxygen. Indeed it is our goal to keep growing and expanding our own "Höpke Forest" over the coming years.

SUSTAINABLE COLLECTIONS

We are always adding new upholstery fabrics to our collection portfolio that meet sustainability criteria. This selection includes our Recycle Line and Q2 second life brands: upholstery fabrics made of 100 % recycled PET bottles. The Sunset collection consists of recycled textiles which save almost 100 % of the water required for the fabric manufacturing process.
