

Natural Dye Series

Natural dyes and recycled dyeing methods
Organic cotton from America (sustainable and high-quality cotton)

Tea Dyed Organic Gauze & Pile

We used pigments extracted from **tea** to carefully dye unbleached organic cotton, weaving this to a double face combining gauze with terry loops respectively on the front and back. The tones gradually evolve with each wash to give it depth.

Wine Dyed Organic Gauze & Pile

We used pigments extracted from **grapes after they have been squeezed of wine** to carefully dye unbleached organic cotton, weaving this to a double face combining gauze with terry loops respectively on the front and back. The tones gradually evolve with each wash to give it depth.

Coffee Dyed Organic Gauze & Pile

We used pigments extracted from **bean grounds after brewing coffee** to carefully dye unbleached organic cotton, weaving this to a double face combining gauze with terry loops respectively on the front and back. The tones gradually evolve with each wash to give it depth.
