Sustainable Style, Lasting Comfort

ATEJA® × **CiCLO**®

UPHOLSTERY FABRIC COLLECTION

CiCLO® Technology: Innovative, Eco-Friendly Upholstery

Introducing our new line of sustainable upholstery fabrics, crafted with a focus on durability, exceptional softness, and environmental responsibility, these fabrics offer unparalleled comfort without compromising the planet or your health.

Unlike traditional upholstery materials, our fabrics incorporate patented CiCLO® biodegradable technology, which enables any fibers that release and end up in the environment to break down more like natural fibers, reducing microplastic pollution caused by textile. This means that even if synthetic microfibers do enter the environment, they won't persist as harmful fiber pollutant forever.

CiCLO is also certified safe by OEKO-TEX® ECO PASSPORT, tested rigorously for bio-degradation by third-party labs using ASTM and ISO test methods, and proven non-toxic to marine and plant life.

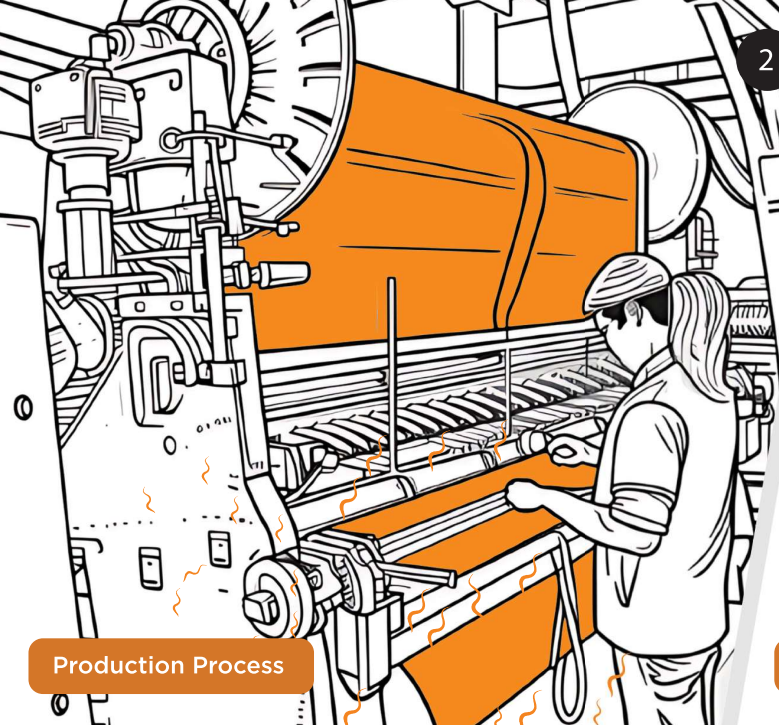

Experience the perfect blend of luxury, sustainability, and safety. Our upholstery fabrics are soft to the touch and durable, ensuring long-lasting beauty for your home that is made to leave less behind.

CiCLO® is a registered trademark of Intrinsic Advanced Materials, LLC.
