

## PRESS INFORMATION

### In trend and yet never out of fashion

Warm candlelight always conjures up a very special mood. With the large colour selection of dinner or pillar candles from ENGELS ORIGINAL, you can also find the right colour for every interior trend. One trend in 2023 is reminiscent of the Hamptons and focuses primarily on maritime accessories, pottery and furniture in a discreet shabby look. Here, discreet natural grey and blue tones are in the foreground. For those who appreciate more opulence and like to mix old and new, who love statement wallpapers and also go for extravagance in art, opt for intensive and strong colours such as Pink, Pazifik or Kiwi for accessories such as candles. Another trend that is becoming increasingly apparent is the desire to live and furnish in harmony with nature. Accordingly, all natural colours are popular here. Our home is becoming more and more important as a wellness oasis and accordingly we set up meditation corners or turn our bathroom into a home spa. And what fits better than an atmospheric ENGELS ORIGINAL candle, hand-poured and coloured throughout, as a pillar candle equipped with the practical ENGELS KERZEN BRENNSTOPP. ENGELS ORIGINAL is available in 30 colours, eight of which are new to the range.

The ENGELS ORIGINAL dinner or pillar candles are available, depending on the size, at an RRP of 2.90 Euro to 21.70 Euro in selected specialist shops as well as in high-quality department stores.
