

Eco Non-Slip Cork

If you are looking for a durable, dishwasher-safe, Eco-friendly and long-lasting tray with a non-slip surface on the front and with customizable graphics on the back, our full coverage Eco Non-Slip cork trays may be what you are looking for.

These trays, just like all other trays we make- are made using the finest birch veneer, we are very picky with our materials, our suppliers know this because they are chosen based on the high quality of the materials they are able to provide.

We have been working on supplying a non-slip solution to our customers for a long time, along the way we have encountered issues with materials being too non-friendly to the environment or bad smudge-resistance. Finally we have found a solution in natural cork material!

We are now able to offer full cork or partly cork on the front of trays depending on your need and preference.

Eco Non-Slip Cork Is available in all of our tray models, these trays have been developed and optimized for the restaurant and bar-sector.

- Food and drink is held in place.
- Industrial dishwasher safe
- Sturdy and strong construction.
- Light-weight, but can hold a heavy load
- Shock-resistant
- Stains should be removed immediately.
- Due to the natural material used in this product, material discolouration may occur over time.
