Himalayan Natural, Unrefined and Organic Salt Crystals

Himalayan Natural Pink Salt is not only prized by gourmet chefs and health food fanatics for its unique flavour, but also for the many benefits it provides. The salt's pink colour comes from traces of iron oxide - a naturally occurring mineral also found in grape skin extracts. The high mineral content makes Himalayan pink salt a much healthier alternative to table salt as Himalayan pink salt contains 80 minerals that are essential for maintaining good health. This salt is healthy for you. Himalayan salt is an unrefined salt that comes from the purest form of salt on earth, it's also one of the oldest forms. **It contains over 80 natural trace minerals** including iron, magnesium, calcium, potassium, chromium, copper zinc, sulphur and iodine. These are just some of the many minerals which help to promote healthy cells in your body.

We are a Authenticated and Certified supplier of Himalayan Pink Salt with 16 years of Manufacturing experience.
