

PRODUCT OVERVIEW

2024

LET'S ROLL!

WE LOVE MARBLES!

Everybody loves marbles.

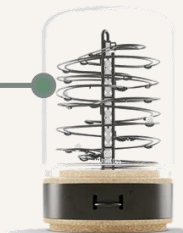

That's why we re-invented the classic marble run as an interactive 360° object, which brings you childlike fascination in a design that is all grown up.

MARBOLOUS comes in two editions.

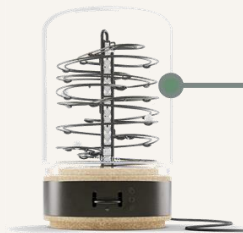

The **Classic Edition** is a fully mechanical homage of your beloved marble run. By a gentle push on the lifting lever the marbles start to roll.

Classic Edition

ElectRoll Edition

(with motion sensor and interval mode)

The **ElectRoll Edition** is the identical twin but with an electrical twist. Equipped with a motion sensor and interval mode it let marbles run magically.

The **motion sensor** detects any movement within a range of approx. 4m and releases randomly one to eight marbles. In **interval mode** every minute 5 marbles roll automatically down the metal track – perfect in use as minimalistic time keeper.

PRICE LIST

Black

White

Birch

Walnut

Be Careful!

MARBOLOUS has an almost hypnotizing effect on the user, which nobody can resist. Watch the trailer, if you dare.
