Back to the Roots.....✍

One fine day, our father Shri O.P. Mathur thought to kick start a project during his lay days in 1978. The project intended & had a far-sightedness to bring in employment for his folks. He started Manufacturing Brass Beer Mugs due to its huge demand, back then on a 150 sq. feet land we possessed. Production of Beer mugs required simple procedure of Casting, Filing, Brazing & Finishing. Finishing included Polishing and Silver Plating.

Gradually, this craftsmanship and fervor to discover further, he managed to expand with more items like goblets, planters, charger plates, trays etc. Myself and my brother were of 6 & 2 respectively, when our destined future was being sketched. To gain a better perspective about economies of market, fluctuations in the trends & rapid changes in demand due to Globalization more closely, we decided to pursue Master of Business Administration with specialization in International Business.

In 1997, with prudence & anticipation, we envisioned our company Sanghavi Exports to reach out to international market through our products & services.

Sanghavi in Sanskrit stands for 'new beautiful things'. Living up to its name, Sanghavi is Manufacturing & Exporting beautiful Innovations with added flavor of Skills and Modern Designs.

In an extraordinary course of 42 years, we have outpaced to evolve as per applied business experiences, establishing two big factories with adequate capacity, working religiously & endlessly gratifying requirements of our esteemed patrons globally.

Co-Owner: Nitin Mathur

Sanghavi Exports
