

Nature

Swiss tradition, newly defined

Our «Nature» wood range combines Swiss precision with an uncompromising commitment to nature. It stands for careful processing of raw materials, supported by innovative technologies, and offers you a sustainable product range for a wide variety of cleaning purposes.

The advantages at a glance

- High-quality materials: FSC®-certified Swiss beech wood, arenga, bassine, fibre and pure horse hair guarantee durability and efficiency.
- Sustainable and environmentally friendly: a range completely without plastic.

- Robust and ergonomic: ideal for any application.

Sustainability at the POS:

With the «Nature» line, you not only offer your customers ecologically convincing products, but also outstanding functionality and ergonomics. A range that impresses across the board - practical, robust and environmentally conscious.

Set an example for sustainability and make the «Nature» line a highlight in your range.

FSC® certified Swiss beech wood with metal thread

natural trim materials such as arenga, bassine, fibre or pure horsehair

the new shape fits even better in the hand

particularly ergonomic handle

double-row ring punching on the scrubber for a proven better cleaning performance

gentle and natural cleaning of stubborn dirt
