At Resto we are passionate about food. We love to eat it! We love to cook it!

With the consumer at the heart of everything we do, Resto products are manufactured to the highest quality standards using innovative technologies and materials and combine the best of design with outstanding performance.

From stovetop to ovenware, coffee and tea, bakeware to accessories, Resto Kitchenware gives you the tools to cook with confidence. Whether it is creating favourite family meals, inspiring you to create culinary masterpieces or entertaining guests at home, we have something for every lifestyle and every kitchen.

The company is headquartered in Frankfurt am Main, Germany.

WHAT IS RESTO?

Life is a blend of public and private moments, but where does the private side truly begin? Is it in the style of the clothes you wear? The furniture in your home? Or maybe it's in the small, personal details — like your kitchenware — that define your individuality. At Resto, we believe the kitchen is the heart of self-expression, where cooking becomes more than just a task. It's a passion, a labor of love, and sometimes even an art form.

Every masterpiece is unique and personal, and while you might not always know the exact steps that lead to greatness, Resto is here to help you achieve it effortlessly. With the right tools, even the routine becomes inspiring. Like the perfect outfit or a well-crafted chair, Resto cookware is an essential element of your home, designed to make every moment in the kitchen satisfying and enjoyable.

INNOVATION MEETS TRADITION

Though new to the market, Resto combines fresh perspectives with decades of experience. We've infused our passion, expertise, and knowledge into every product we offer. From innovative die-cast and TRI-PLY frypans to reimagined everyday cookware, our goal is to elevate your kitchen experience.

Before launching any product, we do our homework — conducting extensive research to understand your needs and preferences. This allows us to deliver solutions that seamlessly blend practicality with style.

COMMITMENT TO GROWTH

At Resto, we strive to be pioneers in the kitchenware market, embracing challenges and learning from our mistakes.

We're transparent in acknowledging errors and take pride in turning setbacks into opportunities for growth. Through passion, innovation, and determination, we're building a network of trusted partners and loyal customers.

WHY RESTO?

We care deeply about your satisfaction, privacy, and the quality of your experience. Every detail in our products is thoughtfully considered:

BUILT TO LAST: With extra-durable layers, our cookware ensures that your culinary successes can be repeated for years.

VERSATILE AND RELIABLE: Whether you're cooking on a gas stove, induction cooktop, or using a dishwasher, our range of fry pans and cookware adapts to any kitchen setup.

SAFE AND PRACTICAL: Our ergonomic handles are engineered for a secure grip and maximize kitchen space, keeping safety and convenience at the forefront.

SUSTAINABILITY MATTERS: We use recycled aluminum to create our products and actively contribute to environmental initiatives like Grow My Tree, donating monthly to protect nature.

UNCOMPROMISING QUALITY: Our rigorous quality control system ensures every product meets the highest standards, right down to protective measures for packaging.

Let Resto be your reliable friend in the kitchen for years to come — a brand that grows with you, supports you, and inspires your culinary journey.

COLLABORATION WITH GROW MY TREE

At Resto Kitchenware, we are on a mission to fight climate change by planting trees with our official climate partner, GROW MY TREE! We believe that businesses have a critical role to play in creating a more sustainable future, and we're committed to doing our part by taking responsibility for our CO₂ emissions. To achieve this, we proudly contribute funds to GROW MY TREE on a quarterly basis. Our goal is to create environmental awareness and invest together to save our planet.

How does tree planting work?

Our partner GROW MY TREE works with local operators in countries in the Global South to plant trees where the environmental, social and economic leverage is greatest - ensuring all plantings are fair, sustainable and certified.

Why plant trees?

Every tree can absorb ~ 22 kg of CO₂ per year, year by year, to fight climate change. We want to motivate our customers to first minimize their CO₂ emissions in everyday life and then offset CO₂ emissions by planting trees. At GROW MY TREE, individuals and businesses can easily plant or give away trees with just a few clicks. If each person planted approx. 440 trees, they may offset almost 100% of their yearly CO₂ emissions.*

*This is an average value and depends on individual CO₂ consumption and the CO₂ sequestration time of the trees planted.

Want to know more?

Check out the GROW MY TREE website for more information about planting trees and their role in fighting climate change.

TOGETHER, WE CAN CREATE A GREENER PLANET!

COOK RESPONSIBLY WITH RESTO KITCHENWARE

Harnessing the Power of Recycled Materials

At Resto, we believe in the power of kitchenware that not only enhances your cooking experience but also contributes to a healthier planet. As a socially responsible company, maintaining an ecological balance and protecting the environment is at the core of our values. We recognize the pressing need to improve the environmental situation and preserve our world's unique natural heritage.

That is why we proudly utilize recycled materials in the production of our cookware. Our cookware is crafted using 100% recycled (and recyclable!) aluminum, minimizing the impact on the environment without compromising on performance. Additionally, we also incorporate recycled plastic, ensuring that every piece of our kitchenware contributes to a sustainable future.

ADVANTAGES of recycled aluminum cookware

CLEANING AND CARE

Cleaning our products is a breeze. Simply use a soft sponge, warm water, and a mild liquid dishwashing detergent. Avoid using abrasive detergents with high hardness, as well as metal sponges and brushes, as they can cause damage to the pan's surface. With proper care, our high-quality products will maintain their technical characteristics for several years.

DURABILITY

Aluminum is widely known as one of the most durable materials, ensuring that our cookware maintains its technical characteristics even after many years of use. Moreover, when handled with proper care and in accordance with quality guidelines, our frying pans are designed to withstand prolonged usage and resist overheating.

VERSATILITY

Cooking with our pans, made from recycled aluminum, is possible on various types of hobs such as gas, electric, glass-ceramic, etc.

RELIABILITY

Recycled aluminum frying pans are suitable for use in major food corporations due to their exceptional reliability and stability. They maintain their shape without bending or melting even when exposed to high temperatures for extended periods.

ECO-FRIENDLY

Aluminum is 100% recyclable without losing its unique properties.

SAFETY

Recycled aluminum is completely safe, as it does not release any toxic substances. This makes it suitable for use in contact with food products.

CORROSION RESISTANT

Experience enhanced performance with our corrosion-resistant products, ensuring that your cooking experience is always top-notch.

By choosing Resto Kitchenware, you not only equip your kitchen with high-quality products but also join us in our commitment to a greener tomorrow. Explore our catalog and discover a range of beautiful and functional kitchen essentials that align with your values.

SAGITTA

ANTLIA AQUILA ARIES ATIK
CARINA LEO MON SAGITTA

FORGED ALUMINIUM

FORGED ALUMINIMUM provides even heat distribution and is corrosion resistant making it an ideal substrate for cookware. Uniquely shaped thicker base evenly enhances heat distribution of the cookware with no hot spots so you can be sure of perfectly cooked dishes every time. Aluminium also offers a light weight option for your cookware and can be used on all hob types: induction, gas, electric, ceramic, halogen. All Resto forged aluminium pans are easy to care for, easy to clean and dishwasher safe.

Our products have been thoroughly tested by TÜV Rheinland and meet all their requirements and standards.

A specially designed external heat-resistant coating protects the surface from carbon deposits, facilitates maintenance and maintains its original appearance for a long time. It differs from press aluminium pans with thicker walls and a multilayer bottom. All of these factors combine to massively optimise the cooking experiences, so you can depend on your robust Resto pans for years to come and long into the future.

Resto Kitchenware opposes activities like deforestation and resource depletion that pose threats to forest ecosystems. By sourcing from verified suppliers and promoting the use of FSC-labelled products, we prioritize high-quality, sustainable materials and support responsible harvesting strategies to contribute to environmental and social standards.

Innovative four-layer Pfluo non-stick coating is durable and highly abrasion and scratch-resistant, allowing you to cook without adding oil and providing long-lasting non-stick performance and service life.

DIE-CAST ALUMINIUM COOKWARE

ASCELLA
CAPELLA
MERIDIANA
RAN
SADR

DIE-CAST ALUMINIUM

Die-cast aluminum is the ideal material for cookware, thanks to its excellent thermal conductivity and durability. The unique production process gives cast aluminum cookware thicker walls and bottoms compared to forged and stamped aluminum options. This allows it to heat evenly and distribute heat consistently, enhancing both the quality and flavor of your dishes. Additionally, die-cast aluminum cookware is resistant to deformation, making it more robust and heavier than other types of aluminum cookware.

Die-cast aluminum offers several advantages, including high resistance to corrosion and exceptional durability. Cookware made from this material is scratch-resistant and maintains its

beautiful appearance over time. With a special non-stick coating, cooking becomes easier and healthier, allowing you to use less oil while preserving the natural flavors of your ingredients.

Die-cast aluminum cookware is effortless to maintain. It's easy to clean and dishwasher-safe, saving you time and making your cooking experience more enjoyable. Its durable construction means it can withstand everyday use without showing signs of wear, ensuring it stays looking great for years to come.

ACHIRD CRATER

TRI-PLY stainless steel

Resto stainless steel pans with TRI-PLY technology consist of three layers of modern, performance enhancing materials:

■ LAYER 1 is the top layer of a strong 18/10 stainless steel with a coating of honeycomb pattern technology providing extreme scratch resistance.

■ LAYER 2 is the middle layer of aluminium which has excellent thermal conductivity, contributing to the rapid and uniform distribution of heat over the entire cooking surface.

■ LAYER 3 is the final outer layer of stainless steel and forms a full induction bottom to the pan.

WHISTLING KETTLES

There's no sound quite as charming as the whistle of a traditional kettle when it's boiled. It's a reminder you're just moments away from sipping a rewarding cup of tea or coffee. Resto's range of durable stainless steel kettles updates this old favourite, time-honoured, tea-making tradition into the modern kitchen. You can use it with any heat source, including induction. It looks just like the classic stovetop tea kettle you remember, but with a few modern additions.

MULTI-LAYER CAPSULE BOTTOM

We all know that a necessary part of using any kettle is the waiting time for it to be boiled. All our kettles have a multi-layer capsule bottom, which allows them to retain stored heat for longer. This means you will have longer time in-between needing to reheat the water.

VITROCERAMIC

EASY OPENING

Because any kettle presents the obvious danger of moving quantities of hot water, these kettles have been constructed with an ergonomic soft-touch handle to aid handing and with a button for opening the spout of the kettle. This will mean that you will be reliably protected from burns and can easily pick it up or flip up the spout and finish your task safely.

TEAPOTS

When it's time to pour yourself a cup of tea, having the right tools makes all the difference between a tasty treat and a bitter brew. Ask any tea lover and they'll tell you that having the right teapot transforms brewing tea from a chore into a true art form.

Unlock the flavor of your favorite tea with our teapots from the Atria and Keid collections. Gracefully shaped, they are manufactured of clear borosilicate glass, so you can watch the steeping process in action and know exactly when your tea is ready. With its beautiful curved lines and transparent construction, it will blend in with just about any space.

Enjoy cup after flavorful cup thanks to a large stainless steel infuser that provides ample room for loose tea to fully infuse.

Available in 350ml, 650ml, 950ml, 1200ml or 1600ml sizes, Atria and Keid teapots come with their own full-color gift box to help protect them on their journey to you and to provide you with all the information you need making them a perfect gift for any tea lover.

We designed this teapot to be as easy to clean as possible so that it is always in sparkling condition for your next batch. It is completely collapsible and all its parts can be washed in the dishwasher or by hand.

The Atria teapot comes with a stainless steel infuser insert for holding and steeping loose tea.

BAKEWARE

FORNAX
NORMA

FORNAX NORMA

BAKEWARE

OVEN-TO-TABLE STONEWARE

Stoneware ceramic has been the cornerstone of cookware materials for centuries. Stoneware is a tried and trusted ceramic that is extremely durable and a versatile choice for convenient one-step, oven-to-table home cooking.

Our products have been thoroughly tested by TÜV Rheinland and meet all their requirements and standards.

With our Fornax range, we wanted to create the perfect bakeware that could work in any room. It was especially important to us that it looked at home in both the kitchen and also at your dining table. The modern and stylish designs of our dishes mean that you can use them as a serving dish straight after removing from the oven. From la-

sagne to pies, roasted vegetables to hot crumble, use our beautiful Fornax range to cook all of your family's favourite meals.

CARBON STEEL

Along with ceramics, carbon steel is also a perfect solution when choosing bakeware. It is lightweight, non-stick and has an amazing temperature response and exceptional heat distribution qualities ensuring a perfect bake every time! The textured base of the Norma product range gives an additional non-stick performance, allowing air to circulate under your bake, giving a crisp and even cooking result.

A sharp chef's knife is the most important tool in a cook's arsenal – whether you are a home chef or a pro. We have made sure that knives and scissors from all our collections will provide you with the optimal experience when it comes to cutting your food.

They will always stay sharp with our Atlas knife sharpeners featuring two levels of sharpening knives (metal plate for coarse processing / white ceramic rods for fine finishing).

We offer you the best possible option for your knives with our Sham collection of cutting boards that have a specially designed antibacterial surface that acts gently on the blade of the knife.

Finally, when it comes to grating or slicing cheese and vegetables, the Sham graters are the perfect choice for this task.

ERIDANUS

S E R I E S

UNIQUE
Laser Damascus Decal

SPECIALLY
Hardened Steel

This Eridanus knife set is the perfect addition to any kitchen to help prepare that perfect meal. Beautiful ergonomic handle is made with black marble stone texture on full tang bolster. These Damascus steel kitchen knives are handcrafted from extraordinary materials and refined for the highest level of cutting performance, and notable for unrivaled sharpness and striking aesthetics.

Each knife is a unique work of art, styled and crafted by master blade-smiths from the hand-carved edge to the Damascus-pattern blade; it delivers the ultimate protection from heat, cold and moisture, whilst remaining perfectly weighted to aid in both balance and comfort.

SPECIAL SHARPENING

Damascus kitchen knives are made with two different types of steel, allowing them to be incredibly strong and durable. The Damascus process requires high-carbon steel folded over itself, creating dozens of layers. This process makes for a solid blade - the folding allows the high carbon steel to bond together into one solid piece, and it also creates a distinctive pattern that can be seen on the blade, adding an aesthetic flair.

POLIS

COOLER BAGS

Whether you're hitting the beach for the day or planning a picnic in the park, it's important to keep whatever foods and beverages you bring cool. Resto cooler bags are a great option, designed to keep your picnic goodies perfectly chilled and protected while out and about. Lightweight and comfortable to carry with dual padded carry handles or an adjustable shoulder strap, they are easy to tote around and fold nicely into your backpack or beach bag when empty.

These collections of cooler bags optimize everything in the direction of functionality and simplicity. The color of fabric has been especially chosen so that the bag will conduct less heat when placed in sunlight. Reliable fittings and waterproof lining help create a range you can depend on.

Our Felis and Polis collections offer stylish, versatile and capacious cooler bags of varying sizes that are ideal for daily and long-distance travel, picnics and more adventurous activities. With this range, you will arrive with your items perfectly cooled and ready to eat and drink. Also, all models from the Polis collection are foldable and take up very little space in storage.

UPDATED PRODUCT PACKAGING

Resto Kitchenware’s packaging design goes beyond functionality, transforming every shelf into a visual masterpiece for retailers. The sleek and stylish packaging is a testament to the brand’s commitment to marrying form and function seamlessly. In vibrant hues and modern aesthetics, Resto’s packaging catches the eye, creating an instant allure for customers browsing the shelves.

The carefully curated design reflects the brand’s dedication to elegance, making every product a statement piece. Each package is not merely a container but an accessory that enhances the overall visual experience of the retail space.

From the moment it graces the shelf, the packaging communicates a message of sophistication and quality, inviting customers to indulge in a world where culinary artistry meets design excellence. Retailers benefit not only from the practicality of Resto Kitchenware but also from the enhanced aesthetic appeal it brings to their displays. It’s more than just packaging; it’s a visual symphony that elevates the entire shopping experience, leaving a lasting impression on customers who appreciate the fusion of style and functionality.

VISUAL MERCHANDISING REDEFINED: RESTO RACK KITS UNLEASHED!

Enhance your retail space with our exclusive Resto branded racks, designed to elevate the presentation of your products on the trading floor. These all-metal RESTO displays provide a sleek and modern backdrop for your merchandise.

The versatile rack kit includes three shelves and six hooks, offering flexibility in arranging and showcasing your products based on your unique product matrix. This adaptability ensures that you can create eye-catching displays tailored to the specific characteristics of your merchandise.

Transporting and setting up these displays is a breeze, thanks to the conveniently sized transport box. The Resto rack kit is not only stylish but also practical, making it easy for you to transform your retail space with minimal effort.

Create enticing product displays that capture the attention of your customers and make a lasting impression on your clientele.

Size of all-metal RESTO displays:

Height: 2204 mm
Width: 800 mm
Depth: 500 mm

Rack kit:

3 shelves and 6 hooks, which allows you to combine the display of goods depending on the product matrix.

Transport box:

270 x 1070 x 820 mm
Weight: 18 kg
