

The HORL® Brand  
Information

01

# Everything begins with a piece of wood.

With a pioneering spirit that drives us forward, we at HORL® create products for eternity. The source of our inspiration is the Black Forest, where our roots are. Here we come up with new ideas for industry-leading products that are unmatched in terms of innovation and quality. Perfectly devised, precisely made and forever by your side.

## **Precision from the Black Forest.**

High standards of quality and regional sourcing play an important role at HORL®. The wood and metal are processed in the Black Forest and the laser engraving and final assembly is also carried out by partner companies located nearby. HORL® and its manufacturing partners are experts in wood processing and assembly technology. The close proximity of our partners means that developments, new ideas and prototypes can be discussed in person and implemented immediately in the shortest possible time. This enables the development team to constantly optimise production and quality and to expand the product range.

## **One Family. HORL® Brand.**

The founders of HORL® believed in their concept for a simple knife sharpening system and developed the first rolling knife sharpener in 2016. Ever since, the father-and-son duo have been inspiring people all over the world with their invention.
