

# Together for a cleaner world

## The Swedish Dishcloth:

- Swedish invention from 1949.
- 100% compostable! 70% cellulose from FSC certified forest, 30% waste cotton\*.
- Washable in dishwasher or washing machine, over and over again.
- The dishcloth absorbs 15 times its own weight.
- Printed with environmentally friendly, water based ink.
- Replaces other cloths that often contains plastics.
- Contributes to reduced use of paper towels. One dishcloth can replace more than 20 rolles of paper towels.
- Throw the dishcloth away with the food waste, it decomposes in 8-12 weeks.
- From forest to earth, the circle is complete.

\* From fiber that are too short for textile industry use.

Dishwasher Safe

Reuseable

Biodegradable

Teko Tryck is a screen printing company, with our own colour lab, where we mix any Pantone colour you want. All colours are of course water based.

*Better safe than sorry,  
always buy the original*

We are the original screen printer  
of the Swedish dishcloth, since 1994.

*The Swedish Dishcloth  
- Our Every Day Hero!*

A Swedish invention from 1949

*You design - We print!*

### Major Discoveries That Has Changed our Civilisation!

Charles Darwin - Theory of Evolution  
Albert Einstein - Theory of Relativity  
Nisse Persson - Theory of Dishcloth

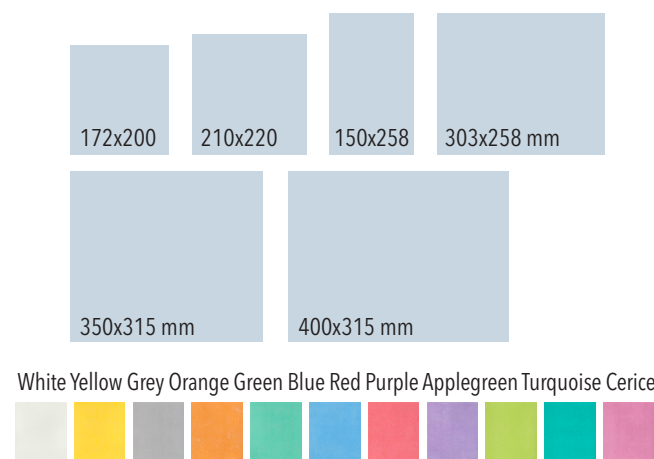

Nisse Persson, the man behind the dishcloth theory: **Printed dishcloths would make life a little more fun!**

### The Swedish Dishcloths

Teko Tryck was first to print on the Swedish dishcloth, already 1994.

Teko Tryck has introduced the printed dishcloth to more than 60 countries. In several of them it is now referred to as "The Swedish Dishcloth".

In Sölvesborg, Sweden, Teko Tryck has a substantial stock of dishcloths, in many different sizes and colours.

We also offer printed kitchen towels and velour towels, in different sizes and colours.
