The logo for SalleMa is a light gray, horizontally-oriented rectangle with rounded corners and a decorative, slightly irregular border. Inside this rectangle, the words "SalleMa" are written in a large, white, serif typeface. The "S" is particularly large and elegant, and the "Ma" is also prominent.

SalleMa

About SalleMa

by Livingicon, Global Total Kitchenware supplier

A room filled with warm-hearted mother care, always towards health & happiness of our family. That's the kind of kitchen we believe in. Kitchen is a meaningful room where mothers' hearts stay caring for family's welfare & happiness which Livingicon Co., Ltd. cares about. We hope all our consumers enjoy a happy & healthy kitchen life with our SalleMa.

TPU Cutting Board

Sterilizability

SalleMa Cutting Board is made of TPU material with 150°C heat endurance. Thus, it can be simply sterilized either putting it in a boiling water or by pouring hot water within 30 secs.

Antibacterial

Bisphenol-A, DEHP, BBP Non-Detection Test Passed.

Less scratch

With its high degree of density and elasticity helps to be used with less scratch, less color and odorless compared to other cutting board.

High Flexibility

TPU material with its great elasticity reduces knife noises and knife shock and enables to provide a smooth and stable cutting feeling.

So far, the conventional cutting boards made of various materials, such as wood, PP, PE, glass & silicone, have had their limitation in terms of sanitariness, durability, weight, washing & storing. But the TPU material adopted to SalleMa's cutting board has remarkable features of excellent heat resistance, wear resistance, flexibility & restoration and enabled to create the most evolved cutting board.

TPU Material

FDA test passed
RoHS test passed
SVHC test passed

TPU Cutting Board

LFGB Certified(Germany)
SQTS test passed(Switzerland)
REACH test passed

- Color : Yellow, Deep Green

Bamboo Kitchen Roll

Environmental-friendly kitchen towel that naturally decomposes.
Made with 100% bamboo fiber extraction.
Exceptional absorbency and washing power; suitable for use throughout
the house, not just in the kitchen.

100% Bamboo FIBER

【Super Absorbent】

Absorbing 20 times more liquid than its weight.
Perfect for wiping surfaces, washing dishes and mopping up spills
as well as using for the kitchen bathroom, office and car.

【100% Biodegradable】

Eco-friendly.
No chemicals, no landfill.

【Reusable Washcloths】

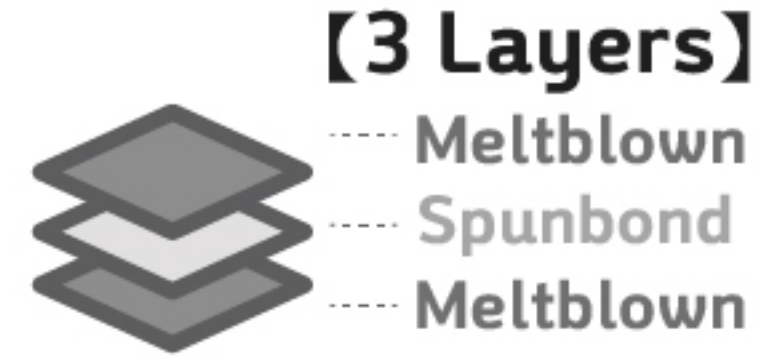

Highly absorbent tissues that soak up spills quickly,
tough, dispenser friendly.

Reusable Wipes

Simply tear and use the wipes.
Outstanding cleaning power with a rough double-sided texture.

Utilizing the Meltblown technique for extra roughness and a 3-ply layered structure, these wipes don't tear easily, allowing for multiple uses instead of single-use disposal.

The rough surface created by Meltblown technique and the resilience from Spunbond technique extend the longevity and versatility of the wipes.

We hope you to cook a little art
