

Waf

DESIGN FOR WINE SINCE 1970

CORPORATE PRESENTATION

Brevetti Waf was founded by mechanical designer Walter Fortunato in 1970 on the outskirts of Vicenza, the city of Palladio, in the heart of the northeast Italy. For more than 50 years the company, starting from a simple design, has been creating, producing and exporting all over the world the culture of beverage and the personality of Made in Italy.

Wineries + B2B	3670 clients

WHY CHOOSE BREVETTI WAF?

Whether you are a professional or a wine enthusiast, buying and using a Brevetti Waf product gives you the assurance that you have in your hands an excellent tool for enhancing your product and experience. We believe that without passion there is no evolution and without research there is no innovation. That is why we arrive at innovation starting from the passion that drives us, through research that never follows roads already explored, but always evolving and looking to the future.

TECHNOLOGY AND QUALITY

At Brevetti Waf, growth and development pass through technological innovation, automation of production processes, logistics organization and service for our customers; guaranteeing the best quality/price ratio and maximum professionalism.

All thanks to the perfect mix of know-how, the passion of great Italian artisans and the production capacity of a dynamic company.

SPECIALIST IN PMMA PROCESSING

The company, in its three European production units, processes 120 tons /month of polymers, 50% of which is **VEROGLAS®**, ultrapure methacrylate, transparent or colored.

ASSORTMENT

We aim for an assortment that meets and possibly anticipates needs, that extends 360°, in which all factors play a role: product families, occasions of use, form, function, material and color... Through this assortment we promote freedom of choice.

OUR PRODUCTS

CHAMPAGNE STOPPERS

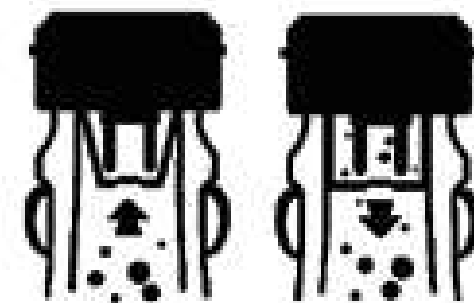

Since the creation of the stopper to the present day, the company has produced more than 70 million super stoppers!

Drawn from the great tradition of Brevetti Waf, our line of super stoppers enhances the meeting of aesthetics and technological knowledge.

The Block WAF System® represents a brilliant invention for the preservation over time of the precious characteristics of wines, sparkling wines and champagnes.

Thanks to Pascal's principle, the seal is more than 6 ATM forever!

Each super stopper is individually tested.

BOWLS & BUCKETS

Our dedication has led the company to become a leader in Europe in the transformation of polymers for the production of buckets and ice bowls (over 80 different models), unmatched in terms of transparency, resistance and design.

The items turn out as elegant and precious as crystal objects but practical and lightweight, thanks to **VEROGLAS®**, a material treated with exclusive techniques and subjected to piece-by-piece quality control.

SUSTAINABILITY COMES NATURALLY TO US

HIGHLY SUSTAINABLE PRODUCTS

Brevetti Waf is trying to pander to the growing green trend for a more harmonious relationship between man and nature.

In fact, in 2023 the company, unique in the sector, launched the RECYCLE Line with products that are highly sustainable, thanks to a totally innovative material: PET.

Being 100% recyclable, it does not lose its fundamental properties during the recovery process, and can be repeatedly transformed to make other new products.

Tecnoglas® STEMGLASSES

A totally innovative technique gives birth to the **TECNOGLAS®** collection, an excellent alternative to classic glasses in all outdoor, as well as indoor, situations where safety is the priority.

The glasses are unbreakable and reusable because they are made of Tritan, a high-quality technopolymer.

Their added value is the production technology that involves a blowing stage, almost a recovery of the traditional one operated, once by mouth, on real glass.

The fusion of quality and technology leads to a result of transparency and brightness that makes them unique and unmistakable.

UNBREAKABLE TUMBLERS

For the mixology and beverage world, Brevetti WAF has created **TECNOGLAS®** tumblers, which are perfect for safety without sacrificing contemporary design.

They have features that are usually common of real glass such as brightness and transparency and pleasantness to the touch.

A collection that has been enriched over time with shapes, decorations and sizes for all needs, even the most particular and refined of new trends.

ONE-LIGHT LED LAMPS

M'illumino d'intenso

Exclusively from Brevetti WAF the ONE-LIGHT LED lamp, for outdoor and indoor use, portable and rechargeable.

Why did we design and produce a table lamp?

Simple, because it can be easily housed on top of any bottle! Whether capped or open!

Brevetti WAF knows how to interpret and narrate everything that revolves around the world of wine.

ACCESSORIES & CORKSCREWS

Brevetti WAF has thought of every act dedicated to the discovery and pleasure of wine tasting. Since 1970 it has been exporting the culture of good drinking and the personality of Made in Italy all over the world. Whether you are in one of the world's major capitals or in a country location, in a wine bar in Milan, a winery in Bordeaux or a club in Berlin, you will always notice a Brevetti WAF object. Just try to pay attention to it...

CUSTOMIZATIONS: YOUR BRAND IN EVIDENCE!

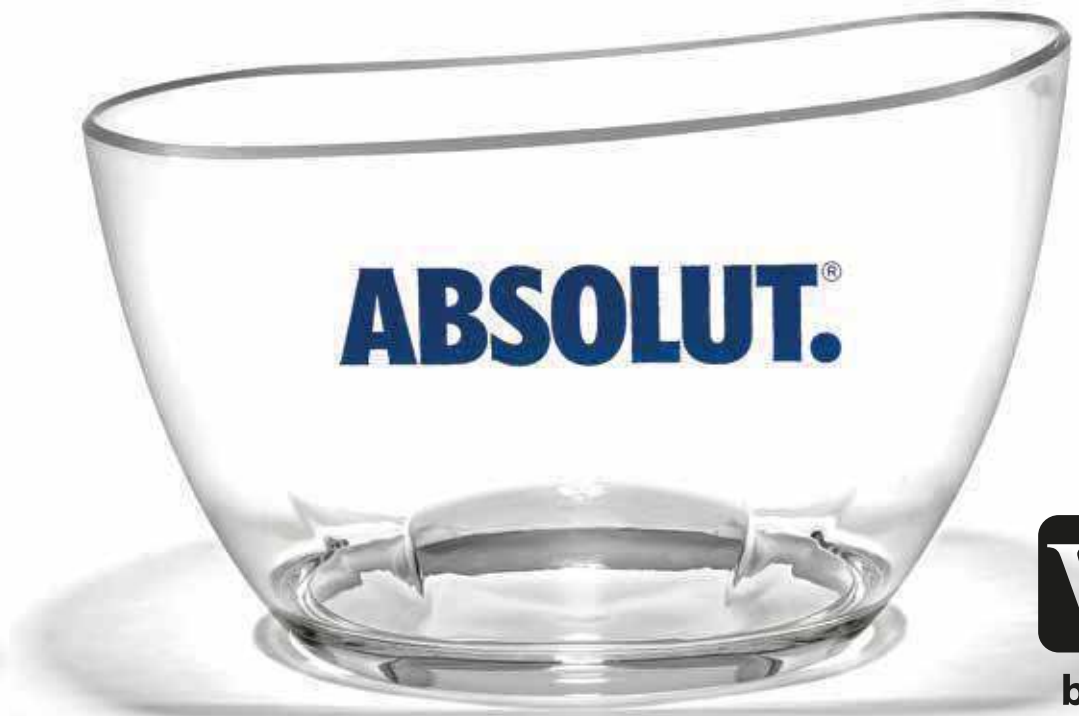

At Brevetti Waf, we are experts in personalizing every object.

From pad printing to hot foil stamping, from screen printing to quadrichromies on digital printer, from metallization to varnishing.

At Brevetti Waf we have the solution for every need.

Our graphics and customization department are ready to reproduce any logo and desired effect.

In addition, upon request, we can also produce our items in Pantone colors!

UNIQUE PROJECTS

THE ART AND KNOW-HOW OF CREATING AN EXCLUSIVE OBJECT, JUST FOR YOU.

The ability of Brevetti WAF has always been to interpret and relize the customer's needs: it is not "just" about branding an object, but about creating exclusive items, tailor-made to meet the needs and convey the customer's image.

We have achieved this in many projects and our goal is to ensure that these opportunities continue and expand over time.

ETHICAL CERTIFICATION

We have always paid close attention to ethical issues and principles, which is why we wanted to obtain the SMETA 4PILLAR by Sedex certification. The goal is to regularly update our certification through audits by a certifying agency.

FOOD CONTACT CERTIFICATION

Our products are certified suitable for food contact. For this, we use only high-quality materials and refer ourselves to primary laboratories for migration testing. We also have sensory tests approved for the glasses by subjecting the simulant to the same treatment in glass cups, making sure that there is no differences.
