

The Solutions Award Winner 2025

Removing crumbs the stylish way

**solutions
2025**

The triangle crumb collector is an innovative and elegant tool for quickly and discreetly removing crumbs from the table and tablecloth.

Crumbs are pushed together with the stainless steel blade and can be removed without detracting from the guest's dining experience. Design-oriented and with a fine plum wood handle, it does not break with the aesthetics of the evening.

PRESS RELEASE

Solingen in February 2025

The slit in the blade allows the crumb collector to be attached to the waiter's apron or pocket like an accessory, so that it is always at hand.

Developed, designed and manufactured in Germany with raw materials of regional origin.

The crumb collector comes in a gift box and is therefore also a perfect gift for the ambitious amateur chef and host.

The crumb collector was awarded the Solutions Award 2025.

triangle Item no
