

### Professional kitchen classics from Solingen: Turner „Spirit“

In professional kitchens, tools are crucial for success - especially when it comes to precision, durability and user comfort. For decades, triangle has been producing professional kitchen classics that make no compromises when it comes to quality and functionality. The classic stainless steel spatula, for example, still sets standards today and is an indispensable tool in restaurants worldwide.

“Our spatula is not just a kitchen tool - it is a classic that has become what it is today through years of experience and continuous improvement: an indispensable utensil for professional chefs,” explains Christine Kelch, General Manager of the Solingen-based manufacturer.

The Spirit spatula combines the tried and tested functional part made of hardened stainless steel with an ergonomic and hygienic polypropylene handle made from plant-based raw materials. This not only saves scarce resources but also makes it easy to clean in the dishwasher.

It is not only indispensable in the catering trade, but also in any ambitious amateur kitchen. With its flexible but sturdy head, it is ideal for turning pan dishes, lifting fried food and serving food. Thanks to its high-quality workmanship, the spatula retains its shape and functionality even with intensive use.

Solingen im Januar 2025

“Our spatula is the perfect example of a product that combines tradition and innovation. It is an indispensable tool for professional chefs who rely on quality and durability,” concludes General Manager Christine Kelch.
