

SIER PRESENTS REFORK 2.0

It's time for the next step! The Refork factory in Czech Republic has innovated considerably in recent years. The result is the further development of the well-known straws and cutlery.

What exactly has changed? The basis of this sustainable material has been adapted by Refork. Cellulose has now been chosen as the basis for this new material.

Cellulose is made from plant fibers. A completely natural and biodegradable material. In the case of Refork, this specifically concerns residual material from the agricultural industry.

The use of Cellulose has ensured that Refork products are even more flexible and sturdy in use. In short, even better performance for you and your customers and still completely SUP-proof!

Refork products are completely natural, Plastic & PFAS free, made in Europe, SUP-proof and have a pleasant mouthfeel and no aftertaste like you are used to.

NATURAL

Made only from naturally occurring and renewable resources such as plant fibres and natural binders.

PLASTICS FREE & PFAS FREE

Every ingredient is compostable and biodegradable, leaving no trace behind.

DESIGN

Great look and feel, no aftertaste.

MADE IN EUROPE

Manufactured in the Czech Republic.
