**Porcelains shaping the future in
the pursuit of sustainable design.**

We are aware of the importance of design and longevity in sustainability, aiming to leave a more livable world for future generations, going beyond conformity to trends. With this awareness in our sustainability journey, we have reshaped porcelain to utilize global resources in a sustainable way. While contributing to a circular economy in the fight against climate change, we consider it our duty to minimize environmental impacts in our business processes and add value to nature.

Environment Management.

As Porland Porcelain, we consider the environment as a valuable treasure and believe that it should be preserved in the best possible way for future generations. In line with this belief, we are among the founders of the Yuvam Dünya Association, which is dedicated to raising environmentally respectful generations for potential challenges that may arise in the future. In our efforts to combat climate change, we aim to develop environmentally friendly and efficient production in areas such as energy, greenhouse gas and air emissions, as well as water, responsible material consumption, waste management, and biodiversity, in order to reduce their negative impacts. We continuously monitor, develop, and improve applicable elements of legal requirements to minimize our impact on society and the environment, while ensuring maximum efficiency and cost savings for the sustainability of production in the future.

Energy and Climate

Climate change, which has the potential to create risks not only in the physical environment but also in social and economic life, is one of the most critical global issues of our time. Considering the upward trend in energy demand and greenhouse gas emissions, we can anticipate that climate change has the potential to pose much greater risks. Porland Porcelain integrates the ISO 14001 Environmental Management System with the ISO 9001 Quality Management System and ISO 50001 Energy Management System. Aligned with our commitment to combating the climate crisis and our sustainability approach, we aim to minimize the environmental impact of our products throughout their life cycle by effectively managing all stages of the value chain. We view efforts to combat climate change not only as a necessity to enhance our quality of life and mitigate risks in the future but also as a crucial method for reducing operational costs and gaining a competitive advantage in the economic life of the future. Activities focused on improving energy efficiency and reducing greenhouse gas emissions constitute a significant portion of our efforts to combat climate change. These endeavors not only decrease emission levels but also contribute to our competitiveness by providing cost advantages. Therefore, we consider energy efficiency as a continuous improvement area and implement improvement projects at every stage of our operations. All other air emission values generated during our production processes, such as greenhouse gases, are also part of our control and improvement efforts. We measure air emission values at all production locations at specified intervals in accordance with legal permits, keeping them well below the limit values.

Waste Utilization

We transform defective or non-compliant white porcelain, both glazed and unglazed, whether fired or unfired, by grinding them to be reused as raw materials. Additionally, the sludge generated from the treatment plant is reconsidered in the recipe to achieve savings. Through this business model, we achieved a yearly recycling of 301.2 tons of raw materials, making an impact in various aspects:

- **The need to extract 301.2 tons of raw materials from quarries was eliminated, reducing the impact on landscaping and the energy required for extraction/treatment.**
- **The transportation of 301.2 tons of raw materials from the points of origin to Porland Porcelain was avoided, resulting in savings in vehicle emissions and fuel usage.**
- **301.2 tons of waste material that would have been sent to the landfill became reusable, reducing the fuel and vehicle emissions generated for waste transportation and minimizing the impact on the landfill site and the environment.**
- **The recovery of 301.2 tons of raw materials prevented the emission of 735.13 tons of CO2 greenhouse gases during the production stage alone.**

With the project "Development of Stoneware Body and Glaze Formulation Using Colored Porcelain Fragments," we utilized 500 tons of colored fragments that were idle in our warehouses by grinding them and incorporating them into the stoneware body recipe developed. Moreover, approximately 12 tons of colored fragments generated monthly in production are used within the scope of this project, contributing to the recycling of about 150 tons of colored fragments annually. With this perspective, we will continue our efforts with the business model we have created, and in the coming year, in addition to raw material recycling, we aim to recycle a total of 650 tons of porcelain. This will have several positive impacts:

- **Eliminating the need to extract 650 tons of raw materials from quarries, reducing the impact on landscaping and the energy required for extraction/treatment.**
- **Avoiding the transportation of 650 tons of raw materials from the points of origin to Porland Porcelain, resulting in savings in vehicle emissions and fuel usage.**
- **650 tons of waste material that would have been sent to the landfill will become reusable, reducing the fuel and vehicle emissions generated for waste transportation and minimizing the impact on the landfill site and the environment.**
- **The recovery of 650 tons of raw materials will prevent the emission of 1586.4 tons of CO2 greenhouse gases during the production stage alone.**

In 2021, by evaluating our process-based waste:

- 92% of the total 311 tons of waste generated at Porland Porcelain from production processes, equal to 289 tons, was recycled.
- Recycling 40 tons of plastic prevented the emission of 656 tons of greenhouse gases and saved energy equivalent to 640 barrels of oil and 92,384 kWh. The non-disposal of plastic waste saved 368 m3 of storage space and reduced fuel consumption and vehicle emissions for waste transportation.
- Recycling 89.5 tons of paper prevented the emission of 656 tons of greenhouse gases containing carbon dioxide, ensuring the continued production of 1,109,800 m3 of oxygen. This saved the equivalent of the oxygen needs of 3043 people provided by 1521 mature trees, resulted in a monthly water saving of 2864 m3 consumed by 268 families, and saved 156,625 liters of fuel oil consumed for heating by 179 families. Additionally, it saved 366,950 kW/h of electricity, equivalent to the consumption of 1790 families for one month.

Since 2005, we have been contributing to the preservation of natural resources and the reduction of global warming by producing designs with a 100% focus on recycling. Through savings obtained from raw materials, we have increased our recycling volume while conducting activities in line with environmentally friendly production and the zero-waste philosophy, without compromising on quality. With our RE-GEN series, brought to life through the recycling of porcelain fragments, and our Research and Development department creating a unique product range, we have not only reduced our carbon footprint but also pioneered a vision sensitive to climate change. Continuing to set an example for environmental sensitivity, societal benefit, social inclusivity, and cultural sustainability with products developed using up-to-date technologies, from the color used in designs to the application method, we will persist in being a beacon for sustainability.

ABOUT PORCELAIN

Porland transforms porcelain into tableware that has the elegant lines of a graceful ballerina, with the precision of an artist and iterative processes that require patience. With each having a unique and extraordinary design, Porland porcelain displays its elegance at the tables, through its transparent structure and aesthetically pleasing looks. Each porcelain piece transforms meals into feasts and display superior quality thanks to their durable and hygienic build.

White

The pureness of white meets durability...

Modern Style

Crafted from modern shapes, the Bella Collection appeals to many styles with its diverse product variety. Presenting traditional shapes with a modern alternative, the collection brings you unique choices that offer flexibility of use.

ISTANBUL

Innovative Ceremony

With its curved lines, Istanbul transforms feasts into ceremonies where skills are put on stage: it is an elegant and innovative collection where a smart look meets simplicity. Characterised by the functionality in its simple design, Istanbul offers a ground-breaking style.

Noble Stance

This collection which consists of plates and bowls with a triangular shape, is named and designed after the Lotus flower. Known as the symbol of eternal life, the flower reflects its noble look on Porland's Lotus Collection. It is the perfect design for those who would like to present their feasts through the feeling of infinity the nature inspires.

MIX&MATCH BLACK

Independent Style of Independent Choices... Mix&Match

Mix&Match Collection has been inspired by the most popular trends of the recent years: the Mix&Match wave. The design is formed by bringing together geometrical patterns in different shapes on a red and black background. With its ambitious look, it is a source of inspiration to set your creativity free.

THE BOWL RANGE

Glamorous and Special

Porland creates this range of bowls for those who would like to feel special and make their guests feel the same; amorphous and conic shapes of the bowls put their signature on glamorous moments.
