# OUR NEW COLLECTION

BOOTH NO.: Hall 11.1 E78

## WELFORD INDUSTRIAL LTD

Fancy Vacuum Flask

## Revolutionary World FIRST!

### Soil-degradable material

#### Coffee To Go

Without residues of microplastics

Long lasting, only composts with contact to microorganisms

Food- & Dishwasher-suitable (200 cycles) certified by TÜV

Disposal in home compost or in the soil

### Natural Degradation

Plant pots can be completely buried with the plant. This protects the roots of the plant, which do not have to suddenly adapt to a new environment, but can grow into it.

The material is based on the **Biopolyester BioPBS** in combination with a mineral filler.

The BioPBS is obtained through a holistic use of the corn plant.

Our current food contact items  
OEM Welcome!

Cutlery set

Snack box set of 3

Lunch box

Cereal cup

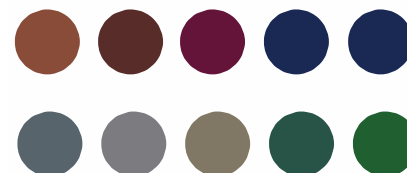

Simple cup

250ml Coffee mug
