

## Presseinformation

### **ENGELS KERZEN - perfection, craftsmanship and innovation for more than 90 years**

Welcome to the world of ENGELS KERZEN - a candle manufacturer that has been setting standards with passion, top quality and craftsmanship for more than 90 years. As a family-run company based in the Lower Rhine region, we stand for excellent manufacturing quality and style-defining innovations. Our range extends from classic stick and pillar candles, tea lights and outdoor candles to unusual object and scented candles, all of which arouse emotions and become a decorative highlight both indoors and outdoors. Whether elegant, modern or timeless - ENGELS KERZEN creates special moments of light.

### **Trust in quality - a reliable partner**

Our customers, both national and international, know this: Anyone who works with ENGELS KERZEN is relying on a partner who pays uncompromising attention to quality and perfection. We choose our raw materials carefully, test our wicks thoroughly for optimum burning and use sustainable materials. Wherever possible, we do not use kerosene wax and instead use renewable raw materials such as sunflower or rapeseed oil from European production. In addition, many of our candle containers can be reused later - whether for storage or as a stylish planter.

### **Trendsetter in the industry - creative and sustainable**

As pioneers in the industry, we stand for creative designs and innovative solutions. Our aim is to always be at the cutting edge - with collections that inspire and set trends. Our close collaboration with designers, trend scouts and interior architects enables us to constantly develop new, unique creations. One example of this is our globally innovative NORA & WEAVE room fragrance concept, which heralds a new era in fragrancing.

### **Private label - Made in Germany with added value**

Our expertise goes beyond our own brand: with our private label service, we offer companies the opportunity to develop exclusive candle collections according to individual ideas. While many brands have relied on production in Asia in recent years, it is now becoming clear how valuable production in Germany is: shorter delivery routes, precision craftsmanship and reliable adherence to delivery dates. ENGELS KERZEN stands for quality "Made in Germany" - a decisive advantage for strong brands.

### **Tradition meets modernity - our vision for the future**

As a long-standing supplier to important churches - including Aachen Cathedral and Essen Cathedral - we combine traditional craftsmanship with state-of-the-art technology. Our production processes are characterized by a high proportion of manual work, which is reflected in the aesthetic perfection and high quality of our candles. At the same time, we are continuously investing in our future: with expanded production capacities, new machines and additional jobs, we are meeting the challenges of the market.

Candles offer an infinite number of emotional moments, be it on holidays such as Christmas or Easter, at weddings or christenings or even at home on any day, they create a unique, warm atmosphere that warms the heart and soul in equal measure.
