FONDANT

AP

your daily dose of **conviviality**

“combine the  
mood lights with  
the wooden trays.”

# Fondant

This unique Fondant collection is designed to bring people together, combining functionality of the serving trays with an intimate glow of light. The gentle curves of the lamp and warm wood tones of the trays are subtly alluding to melted chocolate. Together, they create an inviting atmosphere, bringing conviviality to both indoor & outdoor settings.

Fondant is the perfect result of a collab between designers Paulien and Louise. Paulien designed the elegant table lamps, while Louise added the touch of functionality with matching serving trays.

Made in Europe from 100% FSC wood, these trays are perfect for serving shared dishes and treats.

Pair the mood lights, designed in recycled material, with the trays, or switch them up with the bowl for added versatility.

With their tap-to-dim function offering four dim levels, they effortlessly set the mood with adjustable brightness.
