

Buried Magnets

- * In the past, NdFeB magnet or Ferrite magnet are stuck with glue on the backside of product.
- * In this way, as time goes by, the magnets are falling down because the glue gets dry by different temperatures.
- * Now YE YE enterprise adopt Buried Magnets inside the polyresin product with beautiful polished appearance. There is no fear of falling magnets anymore.
- * Adopting Buried Magnets, there is no gap between the polyresin product and the surface board. The magnetic force gets even stronger.
