# Rediscovering the future

Archivio is a collection taken from the Alessi catalog and is based on the designs kept in the company museum. The Alessi Museum, established in 1998 at the Crusinallo di Omegna factory, has collected objects that embody more than a century of research in the field of applied arts and have been produced by the company from 1921 to the present day. With more than a thousand authors represented in its collection, the museum offers an impressive cross-section of 20th and 21st century design. It is a rich reservoir from which Alessi can draw to open up new terrain, as in early 2025

with the new edition of the Arran tray by Enzo Mari and the Maya basket by Giulio Confalonieri.

DESIGN BY ENZO MARI

DEDICATED TO

**Those who want to surround themselves with inspiring objects for the home or rediscover the iconic shapes of Italian design.**

# Surprising perspectives

In the early 1970s, a group of Italian graphic designers turned their attention to the overlap between graphic design and industrial design. The collection of baskets and trays designed by Silvio Coppola, Giulio Confalonieri, Franco Grignani, Bruno Munari and Pino Tovaglia for Alessi - known at the time as "Exhibition Design" - was one of the most important results of this research. Among the designs proposed by Giulio Confalonieri, the Maya basket was an essential and at the same time mysteriously reflective line. A true graphic design that evolved in three dimensions and

was translated into sheet steel by cold forming, it features the sharp angles typical of the 1970s, with the fine joining details refining and softening the whole. In this edition, the elegant original version in polished stainless steel comes to life as two new, complementary, iridescent color versions that move between the color poles of green and violet. It is dynamic game that interacts with the viewer's perspective and enables a different perception of the forms.

## BIO

Born in Milan in 1926, the designer and graphic artist was one of the leading representatives of the “Swiss School” in Italy in the 1950s. He worked in editorial, advertising and corporate graphics and is characterised by a style with a strong visual impact and dynamic composition based on the contrast between positive and negative elements. He helped shape the image of important companies and institutions. His numerous honors include the gold medal of the 11th and 15th Milan Triennale and the Typomundus Diploma of Honor in New York, awarded “for an outstanding contribution to the development of 20th century graphic art”. His works can be seen in various international art museums. He passed away in 2008.

**QUOTE** “A collection of objects of high formal quality, especially [...] trays and baskets that are a document of the aesthetic research carried out jointly by the protagonists of the Exhibition Design group from 1973 onwards: [...] the exemplary document of an important historical epoch of Italian design, the last phase of the so-called Bel-Design, which had its peak in the 1960s and 1970s and was characterised by famous names. There is probably no other group of steel objects that has worked out the relationship between form, material, technology and function so consistently.”  
Paesaggio Casalingo, Alessandro Mendini, 1979

# Basket

## BASKET

Steel basket. Available in polished 18/10 stainless steel and in two new versions in epoxy-painted steel in the iridescent colors green/purple and purple/green (Greenpurple and Purplegreen). Manufactured in diameters of 20 cm and 25 cm.

## DESIGN NOTES

**Infinite perspectives**

The complementarity of the colors achieved by the iridescent surface enchants the viewer and enhances the play of light and reflections in the basket.

**Industrial high quality**

The fascination of this object lies in the mastery of the cold forming of sheet steel, which has characterised the history of Alessi.

**The value of the archive**

A design that transcends aesthetic conventions and fashions and has been selected from the extensive Alessi archive because it has retained all its expressive power.

## SUSTAINABILITY AND SAFETY

**Made in Italy, in the Alessi factory in Crusinallo di Omega.**

**Made entirely of steel, one of the most durable and resistant materials that exists, eco-sustainable throughout its life cycle and completely recyclable.**

## USE AND MAINTENANCE

EASY TO CLEAN

**Use a soft cloth and avoid abrasive products.**

PACKAGING

**Box made from recycled cardboard with black and silver print.**

# The high formal quality of steel

The Arran tray was designed by Enzo Mari for Danese in Milan in 1961 and follows in the footsteps of an industrial design predecessor by the same author: the Putrella centerpiece (1957). The tray is one of the best designs of the time and was put back into production by Alessi in 1997 - an outstanding testimony to a happy era of Italian design. Arran is now available both in the original polished stainless-steel version and in two new iridescent versions in shades of green and purple. A subtle analogy emerges between these colors and the time that Arran passes through: if you look at the

tray from different perspectives, the color changes continuously, in an elusive movement of shades and reflections. The time that has passed since the first edition has also changed our perspective and thus our perception of the forms of this object, which nevertheless continues to demonstrate its expressive power.

DEDICATED TO

**Anyone looking for an exclusive and sought-after gift. Those who appreciate the indelible mark that Mari's projects have left on the design scene.**

# Enzo Mari

## BIO

Born in 1932 in the province of Novara, the artist began his work with research into visual perception and later turned his attention to children's games, graphics, design and architecture. The five-time Compasso d'Oro award winner has been described as "the critical conscience of design" and is regarded as one of the leading theorists in this field. His works are exhibited in the world's leading art and design museums; he is the author of several essays, including "Project and Passion". He worked with leading design companies. He developed some of his most popular and radical designs for Alessi, such as Ecolo: flower vases that you can also make yourself by recycling plastic bottles. He passed away in 2020.

## QUOTE

**"The overall quality of an object is always determined by its form ... if the form corresponds to the essential meaning of the object ... i.e. the behavior in relation to use together with the behavior in relation to production. Form is nothing other than that." Enzo Mari**

## DESIGN NOTES

**Essential**

An uncompromising and iconic shape by Master Mari, which emphasizes the cold beauty of steel.

**Iridescent**

The special lacquer used for the two-color versions contains two color poles in one lacquer. Depending on the viewer's perspective, there is a dynamic transition from green to violet, which emphasizes the folds and curves of the tray in a surprising way.

**Industrial high quality**

The fascination of this object lies in the mastery of the cold forming of sheet steel, which has characterized the history of Alessi.

**The value of the Archivio**

A design that transcends aesthetic conventions and fashions and has been selected from the extensive Alessi archive because it has retained all its expressive power.
