**ALDA**

# Introduction

The ALDA brand has been present on the market for over 40 years, consistently delivering high-quality small household appliances. Our drive for growth and commitment to excellence has led us to specialize in the production of metal waste containers. Today, ALDA bins are available in almost every country in Europe and form a cornerstone of our product offering.

CEO of ALDA Poland

Wojciech Maziarz

# Our Mission and Values

We are changing the world to a cleaner one

Ambition

Responsibility

Environment and Partnership

We encourage proper waste management and the circular economy

# Milestones in Our History

Since the establishment of our organization and the production of our first aluminum kettles, we have come a long way, with proper waste management guiding our future path.

**1978**

## **The Founding of ALDA**

During the very challenging years for Polish industry and the economy, we aimed to offer products that were sorely missed in everyday life.

**1998**

## **First Bins and Ashtrays**

With our experience in producing kitchenware, we applied it to creating our first waste container designs.

**2013**

## **Pedal Bin Production**

We became the first brand and manufacturer whose pedal bin was entirely produced in Poland.

**2015**

## **Recycling Bin Production**

The growing awareness and responsibility of bin users became the driving force behind the development of new product lines for waste segregation.

# Our Structure

Where we are today was once beyond our wildest dreams. We now operate production facilities that process plastics and metal products. We continue to expand our team and develop new markets.

## Headquarters Ząbkowice Śląskie

A facility producing plastic components is located next to our headquarters

## Production Plant Sławków

The production facility in Sławków processes steel, manufactures our bins, and handles shipments across Europe

## Employees +150

Our team is continually growing and expanding its skills. We surround ourselves with people who share our values

## Markets +23 Countries

In the past, domestic sales were our only market; today, our bins are available in almost every country in Europe

# Service Efficiency

We value our partners and customers, believing that respect, partnership, and positive relationships are among the greatest values in collaboration. We place a strong emphasis on providing the best shopping experiences for our customers.

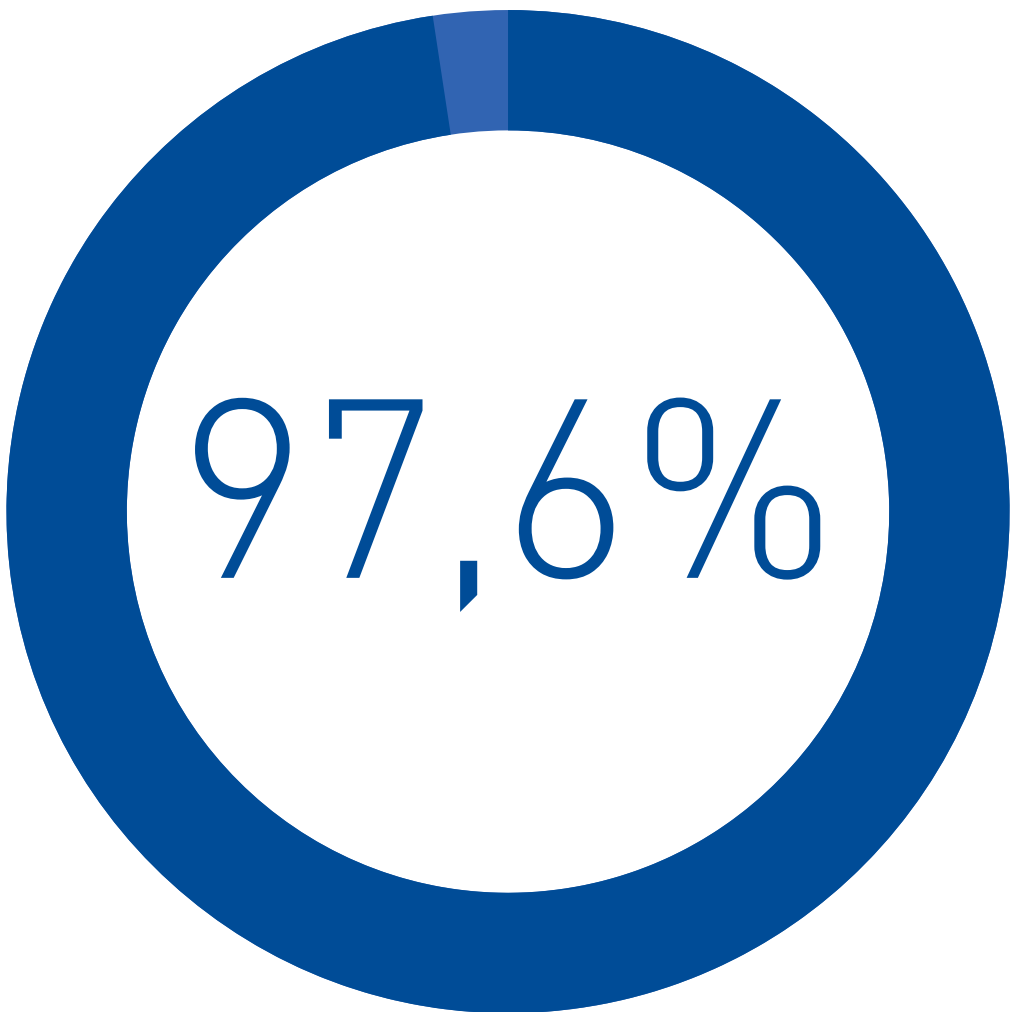

## Response rate in time

## Order fulfillment in time

## Complaints placed

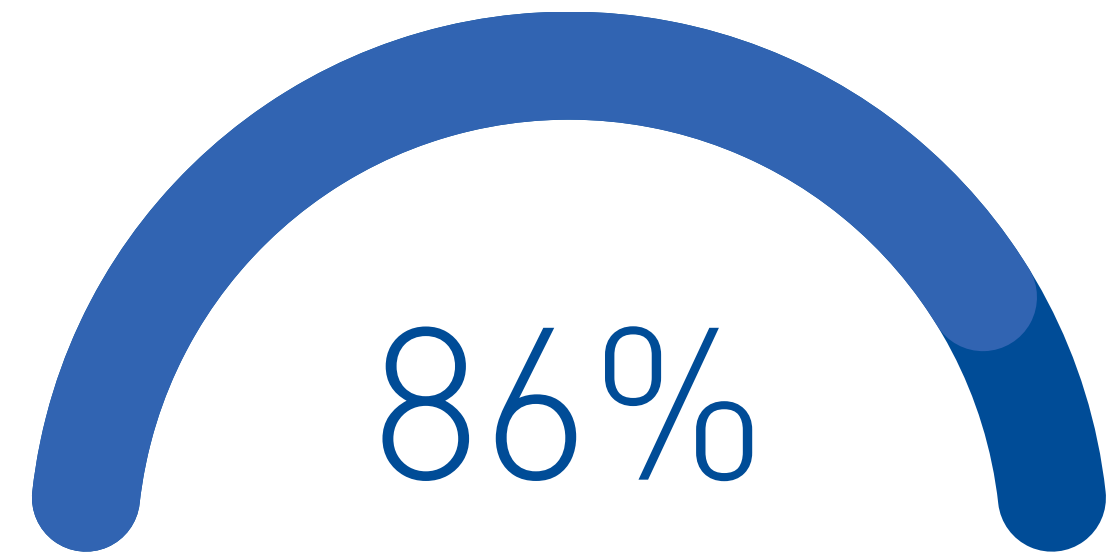

Overall Customer Satisfaction

# Export Sales Structure

Every year, an increasing number of international companies choose to collaborate with us. In the past, we supplied our products only to domestic distributors and customers. Today, export sales account for the majority of our revenue.

Export Sales in 2023

# Export Sales Growth

Each year we grow our distributors network all across Europe. We focus our efforts on markets where recycling and adequate waste management is well practiced.

# Industries and sectors that use our solutions

Hotels, Restaurants and  
Caterings

Hospitals and  
Healthcare Facilities

Public Institutions

Office and Public Facility  
Management

Wholesale

Petrol Stations

Schools and Universities

# Product Categories

As a manufacturer of waste bins, we offer bins suitable for any space and all types of waste.

**Pedal Bins**

**Bins  
Open & with Lids**

**Recycling  
Bins & Stations**

**Ashtray Bins**

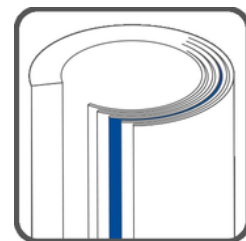

# Main Product Features

MADE  
IN   
POLAND 

## Stainless steel

Products made of stainless steel are available in gloss or satin finish. Stainless steel we source complies with the standard -PN-EN 10088-2.

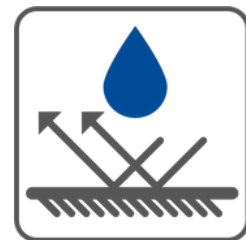

## Organically coated steel

This is pre-galvanized and pre-powder painted steel with high anti-corrosion features and highly resistant to environmental factors.

## Powder painted steel

Using our powder coating plant we are able to use any kind of paint on our products and give them appearance our Customers desire.

## Galvanized & Powder painted steel

Products made of galvanized steel and additionally powder coated have increased durability and anti-corrosion properties.

## Soft Close

We offer Soft Close well designed technology as additional feature. It provides comfort and silence while using the bin.

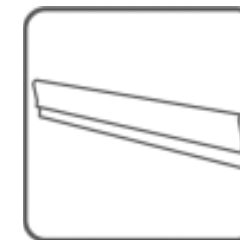

## Antiseptic

The active substance added to paint and plastic parts destroys harmful microorganisms. Antimicrobial protection remains active for years.

## Reduced fire spreading

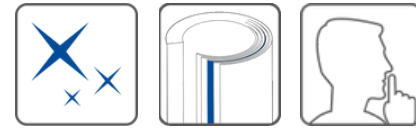

Our selected products, when used in accordance with their purpose, do not contribute to increasing the fire risk in facilities.

## Bag holders

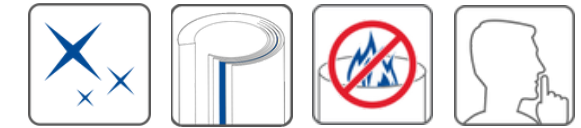

For all our bins, we offer bag mounting systems as a standard solution. With them, there is no need to purchase and use additional inserts.

# Pedal Bins

## Freedom Fresh Standard

Default version of our pedal bin. **Sizes:** 3, 5, 12, 20, and 30 liters. Available with a Soft Close feature.

## Freedom Fresh Hotel Safe

This product variation features a specially designed plastic **inner bucket** with the addition of substances that **reduce the flammability**.

## Freedom Fresh Sherwood

A pedal bin with a **wood-effect lid**. Both lid and body are made of organically coated steel.

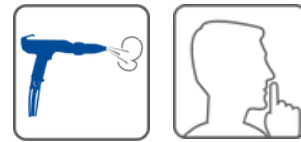

## Freedom Fresh Antiseptic

We have added an **agent that inhibits the spread of bacteria** to both the paint coating on the bin and the plastic components.

# Pedal Bins

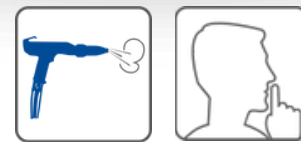

## Freedom Fresh Doman

A pedal bin with a **domed lid**.

**Sizes:**  
**20 and 30 liters.**

Available with a Soft Close feature.

## Hygienic Bin

**Wall mounted waste bin** with pedal mechanism.

**Sizes:**  
**18 and 30 liters.**

Soft Close included by default.

## Sherman

**Large industrial pedal bin**
