Adjustable Wine Rack

We create wine racks which allows you to adjust its size depending on the number of bottles and the space in your room. It is very simple to use, you just need to extend the rack when you buy a lot of wine, and you can just decrease its width as you drink it. It can adapt to the space available so you can use your space more efficiently. Moreover, having a wine rack which is half empty is not really nice to look at and our product lets you display your bottles nicely no matter the number of bottles left. The adjustable wine rack is made from Japanese cypress which has a characteristic smell. The smell creates a relaxed atmosphere almost as if you were bathing in a forest. The Hinoki type is made only from Japanese cypress. It has a warm appearance and a simple design. The Walnut type is made from Japanese cypress and walnut. The feature of this wine rack is that the walnut adds a nice contrast to the Japanese cypress which makes it very stylish. These wine racks combine the best properties both design and functionality. Also, it has a high-end appearance so wouldn't you like to enjoy your gracious wines with a top of the notch wine rack?

Adjustable Hinoki Wine Rack 2x3 shelves

(Materials : Japanese Cypress . Laquer-Finished)

The three-shelf rack holder 12 bottles

What is Japanese Lacquer?

Japanese lacquer, called Urushi in Japanese, is a natural resin paint, which consists primarily of Urushiol.

Features

- 1. Natural material** / Since Japanese lacquer is made from natural tree sap, it respects the environment-friendly and does not use any harmful chemicals.
- 2. Antibacterial property** / It has a natural antibacterial effect, so it is very hygienic and it can prevent the growth of bacteria.
- 3. Resistant to acids and alkalis** / It has an excellent chemical resistance to acids and alkalis. It is stain-resistant and easy to care for.
- 4. Beautiful finish** / It has an elegant shiny surface.
- 5. Long history** / Japanese lacquer has a long history, it has been used for more than 5500 years.

FSC® Certified Hinoki Cutting Board

The grooved cutting board boasts an innovative design that enables more effective use of the available surface area compared to conventional rectangular cutting boards. The bottom of the board is not round, but cut making it easier to move ingredients a round the board and allowing for easy storage. The board also has a smooth surface and a grooved surface so that a different surface can be used with meat/fish and fruit and vegetables etc.

FSC® Certified Hinoki Serving Board (Materials : Japanese Cypress . Lacquer-Finished)

Enhance your mealtime with a serving board made of Japanese cypress. Reach new heights of refinement just by serving bread, cheese, or one of your specialty dishes. A gentle breeze of hinoki wood will surely bring about soothing time to your table. Why don't you try using a serving board, carefully polished by the hands of our artisans, on some special moments in your daily life? The backside of the edge is inclined for easy serving and picking up from a table. What's more, the handle has a hole for hanging the board on the wall, as well as storing it like a stylish decoration. Thanks to clear coating (lacquer that complies with the Food Sanitation Law) there is no need to worry about things like fruit colors or oil soaking in, and it's easy to clean. When cleaning, use tableware detergent, and after washing leave it to dry in vertical position. Direct sunlight can cause the material to crack and warp, so let it dry in the shade.

FSC® Certified Hinoki Bread BOX (Materials : Japanese Cypress . Lacquer-Finished)

Item No. 910023 W43.5×D23.5×H16.5cm

This box for storing bread is made of Japanese cypress. It was designed to add the warmth and color of wood into your everyday life. The box uses wood paneling techniques that have long been a traditional feature of Japanese architecture, achieving a style that could only come from Japan. The rounded design created using these techniques combines with the grain and hue to convey the warmth and color of wood. The lid can be turned over for use as a cutting board. Grooves on the surface help prevent crumbs from scattering. In addition to bread, the box can also be used to store vegetables, snacks, pasta and other foods. The box is finished with a clear coating (in compliance with the Food Sanitation Act), ensuring that the scent of cypress does not transfer to the stored food.

“ A new plastic made of Japanese cypress ”

Hinokinopla® is a mixture of the powdered wood of the Japanese cypress with a biomass plastic. The Japanese cypress powder kneaded into the biomass plastic provides long-lasting antimicrobial and deodorizing properties.

- Hinokinopla® is a product with antimicrobial properties and excellent heat resistance (heat resistance test and antimicrobial effectiveness tests have been conducted by Kaken Test Center).
- Conforms to the regulations of the food hygiene law for food products and food additives. (conformance test has been conducted by Chemicals Evaluation and Research Institute, Japan)

Bath Living Rest room

Innovative and relaxing cypress air-freshener made from wood shavings and cut-offs. The wood shavings can be hung in the bedroom or car to enjoy the fragrance and can also be reused as mulch around the base of plants around the house. The pellets can be placed directly into the bath, and if you place them in the living room to dry afterwards, they work as a humidifier, retaining moisture in the room. When the pleasant cypress fragrance is gone, you can dry the pellets out and use them to massage your feet and hands or use them as chips around the yard.

Hinoki Aroma Rack (Materials : Japanese Cypress)

Place bottles, such as shampoo etc. on the bottom rack and perfume and other small accessories on the top rack. The shelves can be removed and adjusted.

Item No. 904039 W27.4×D13.5×H33.8 cm

Hinokinokiri

Made in Japan hinoki distilled water [Hinoki-no-kiri]

Made in Japan hinoki distilled water is collected from the steam that evaporates off of Japanese cypress wood during the drying process. Thanks to the extraordinary properties of the components present in Japanese cypress wood, this product is a completely safe and natural deodorizing spray. It has many potential applications, including but not limited to kitchen garbage disposals, cigarette odor, and urine smell during caregiving.

After noticing the deodorizing properties of the Japanese cypress, Toshihiro Okabe, affiliate professor at the Shibaura Institute of Technology led the development and release of " Hinoki-no-kiri " .

We hope that this product can be of assistance to anyone who is struggling with troublesome smells in their home.

● Made in Japan hinoki distilled water

100% pure distilled water taken from the steam released by the Japanese cypress wood during the drying process (Because only the lumber of the Japanese cypress is used, no small branches or leaves, this product is hypoallergenic).

● Excellent deodorizing properties

The natural components of Japanese cypress are able to trap odorous molecules and change their molecular structures, resulting in extremely effective deodorization.

This product can be of great assistance to anyone struggling with unpleasant odors in a variety of areas including nursing homes, hospitals, pet-related places, restaurants and more.

※ Verified through a deodorization test conducted by Japan Food Research Laboratories to be effective against trimethylamine (rotten fish smell) and ammonia (urine odor).

Japanese Cypress

Japanese cypress has a very strong vital force and trees that are several hundred years old still exist in natural forests in Japan. In fact, it has been used as timber for building shrines and temples from old times and it is well known that Horyuji Temple, which is said to be 1,300 years old, is made of Japanese cypress. This wood is excellent for controlling humidity and preventing mold, and it has antimicrobial and bactericidal properties. Its fragrance is said to have a relaxing effect as well. Experience life with Japanese cypress a wood with many good features.

What is FSC® ?

The mark of
responsible forestry
FSC® C014816

FSC® is a global not-for-profit organization that sets the standards for what is a responsibly managed forest, both environmentally and socially.

When timber leaves an FSC®-certified forest we ensure companies along the supply chain meet our best practice standards also, so that when a product bears the FSC® logo, you can be sure it's been made from responsible sources. In this way, FSC® certification helps forests remain thriving environments for generations to come, by helping you make ethical and responsible choices at your local supermarket, bookstore, furniture retailer, and beyond.

About us

KODAI is a Japanese company that makes wooden houseware products such as cutting boards, trays, and bath mats. We mainly use Japanese cypress, which has a beautiful polish, calming fragrance, and warm appearance to provide you with the ultimate in comfort and coziness.

KODAI strives to care for the environment. With FSC® accreditation, we are working to create safe, trusted materials through sustainable forests. By adopting a “zero emission” concept, we seek to eliminate emissions into the environment as part of efforts to protect our natural world.

Our aim

The warmth of Japanese cypress brings comforting color to people's daily lives, offering material and emotional enrichment. Through initiatives that care for the environment, we bring people and nature closer together.

By sharing the KODAI mindset with people in Japan and around the world, we seek to enrich the lives of many, helping forests, nature and harmony grow to encompass future generations.
