3.4. With Effect

4. Terracotta

4.1. Pots & Pot Covers

4.2. Jars

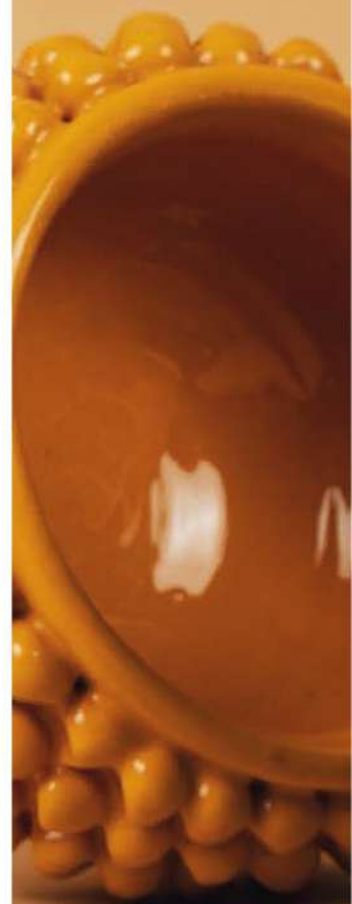

4.3. Lamps

5. Traditional pottery

5.1. Pots & Pot Covers

5.2. Jars

5.3. Lamps

1. A walk back to history

The first potter's wheel was invented in Mesopotamia between 6,000 and 4,000 BC.

This ushered in a new era in the ancient world's ability to build products out of clay.

Potters were no longer limited to the time-consuming process of hand molding clay, giving them more opportunities to experiment with new forms and aesthetics.

The arrival of the potter's wheel further altered the procedure. It now serves artistic as opposed to utilitarian goals.

By 6000 BC, the Middle East, China, and Europe had developed a diverse spectrum of architectural styles.

Ceramists attained extraordinary ability and aptitude, from precisely painted decorations that traced the history of a Pharaoh's rule to finely polished bowls and plates to detailed sculptures.

2. Presentation

The art of pottery is the oldest human invention, preserving this culture for the next generation is a must.

For that, we, the Hand Made Craft Group, gathered to bring the traditional and the modern models straight from the hands of passionate Tunisian artisans originating from Moknine, Monastir.

3. Glazed Ceramic

This ceramic collection style has been a popular choice among interior design enthusiasts.

With its smooth lines, basic textures, minimal furnishings, and simple materials, it adds a touch of sophistication and simplicity to your decor, in addition, it's ecological and durable.
