CATALOGUE

Our company pays high attention on product R & D investment with a professional R&D team.

At the same time, it can firstly master the industry trends, and its product research and development capabilities are in a leading position in the industry.

Product development speed is industry-leading

Strictly follow the new products trends of OEM

Verify trial production

Project development

Product launch

Our company has a professional testing team

that strictly tests in accordance with ISO standards to ensure that each batch of products.

100%
pass the tests
before delivery

Our company focus on the quality of its products.

In order to ensure the quality of the products, we purchased more than
3,000 printers from various countries around the world.

We have verified the quality of the products to ensure that every product on the product line is qualified after passing the test.

We have complete production quality control procedures to strictly control each production line.

Products can be shipped only after 100% inspection is qualified.

04 | WAREHOUSE AND CHIP UPGRADE IN EU AND AMERICA

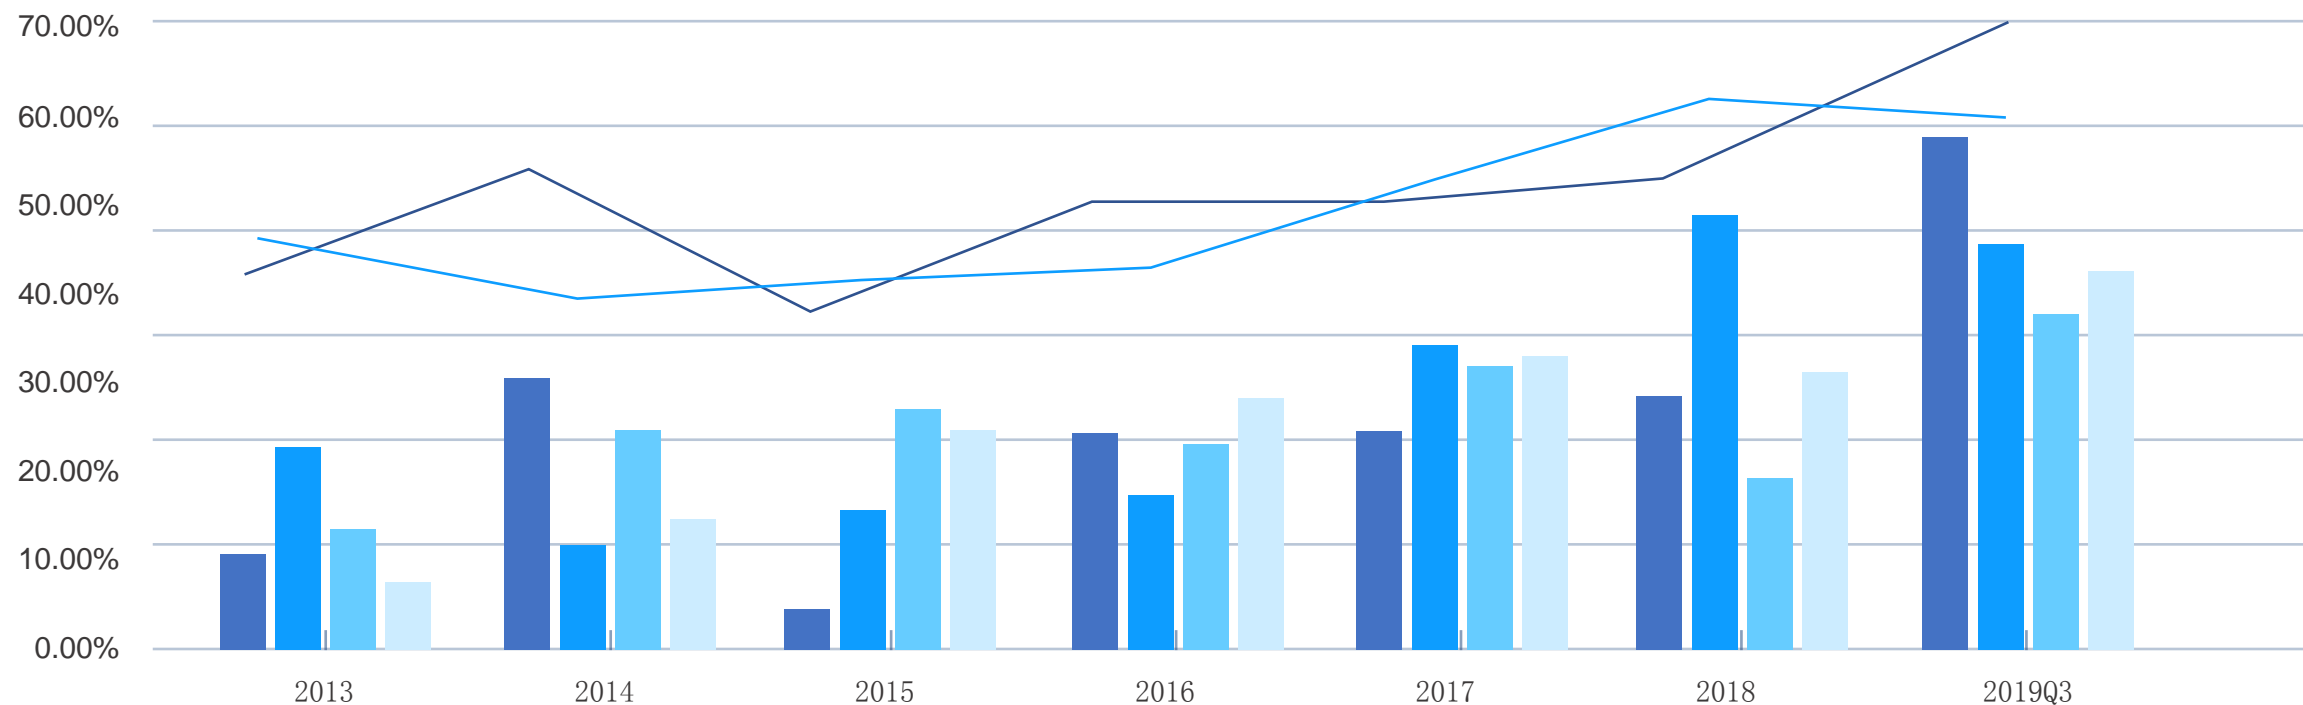

WAREHOUSE AND CHIP
UPGRADE CENTER IN
EUROPE AND AMERICA
FOR FASTER DELIVERY
AND BETTER AFTER-
SALES SERVICE

Cooperation with IDC to sort out the most complete printer shipment data in the industry

Based on these data, we can specifically guide customers to sell products locally, and to help customers understand market trends in order to improve customer sales competitiveness.

PAY ATTENTION ON MARKET TRENDS AND REDUCE RISKS

The chip upgrade is the main way for the OEM to combat compatible products. In order to reduce the upgrade risk, our company has invested in a professional team to monitor the update of the OEM; it can be immediately discovered whether the original factory has been upgraded, minimize the cost to customers due to upgrade issues

SOLVE THE UPGRADE PROBLEM FOR CUSTOMERS IN THE FIRST TIME

If it is confirmed that the product has an upgrade problem, the customer's product can be sent to our factory. Our factory will cooperate with the customer to solve the upgrade problem (including production, rework, chip program update, etc.) and then send the qualified product to customer.

CHIP UPGRADE CENTER IN EUROPE AND AMERICA

In order to reduce the cost of product delivery and faster the upgrade, we have chip upgrade center both in Europe and America.

UNISMART REMOTE SOLUTION

In order to respond to the upgrade, we can provide customers with Unismart upgrade equipment. In case of upgrade problems, we can send the package to the customer remotely. After the customer updates the device program, the device can update the product by yourself to solve the upgrade problem

WE ALSO PROVIDE PATENTED SOLUTIONS FOR EACH MARKET

1

JAPANESE MARKET

For the Japanese market,
we provide solutions to
avoid patent structures and
chips

2

EUROPEAN AMAZON

For European Amazon
platform sales, we provide
patented solutions for product
chip evasion.

3

NORTH AMERICA EPSON

For EPSON compatible
product distribution in North
America, we can provide
solutions for recycled products.
