ABOUT US

COMPANY PROFILE

# Our Journey

Codil, a leading plastic household utilities manufacturer established **in 1978**, specializes in molding, plastic injection and distribution. With a focus on innovation and quality, we serve B2B clients worldwide through our state-of-the-art facility in Portugal. Our ISO 9001:2015 certification reflects our commitment to excellence.

## ABOUT US

# Values that Drive Us

Inspired by innovation and sustainability, we believe that every product has the potential to simplify and enhance people's lives while protecting our planet.

Guided by ethics and social responsibility, our ambition is to leave a positive impact that goes beyond the product, reaching both the community and the environment.

## ABOUT TREND &amp; STYLE

## BeClassic

The BeClassic collection features a simple and timeless design, offering practical and functional pieces that seamlessly blend into modern and contemporary home decor.

## Colors

Add a touch of serenity to your home with our Colors collection. Our pastel palette offers a fresh and modern alternative to traditional home decor.

## Bevid

The Bevid collection features lively and energetic colors, bringing joy to your everyday life.

## ABOUT TREND &amp; STYLE

Stone

The Stone collection replicates marble, Carrara marble (white tone) and Aberdeen (dark gray tone) offering lightweight, durable, and visually stunning pieces.

Vintage

Step back in time with our vintage collection. The transparent pieces with amber or green hues evoke the nostalgic beauty of traditional tableware. Also features meticulously crafted cork components.

# Sustainability

Our commitment to sustainability drives us to innovate and create products that minimize environmental impact. From sustainable materials to innovative designs, our goal is to provide practical solutions that contribute to a greener future.

# Our Eco+ Goals

By producing lighter products, we're optimizing the amount of raw materials used and energy consumed. This helps protect resources and reduce emissions.

Sustainable recycling solutions and the creation of eco-friendly, single raw material products.

Using recycled raw materials, reducing waste and promoting a circular economy.

Through sustainable design and materials, we can close the loop and extend the product lifecycle.

## Our Eco+ Goals

We're creating versatile products that can be used in many ways and help reduce waste.

Sustainable product logistics minimizes material usage and transportation needs, thereby we are decreasing CO2 emissions. In our logistics, we prioritize boxes certified by the Forest Stewardship Council (FSC).

Creating multi-product molds allows us to reduce resource consumption. Repurposing existing plastic components enables us to produce new products.

Our Communication encourages consumers to recycle the product properly at the end of its life and adopt sustainable practices.
