PLAST

Reduce, Reuse and Recycle

ITP- Plastic Transformation Industry, S.A. is an enterprise of injected plastic products for the segment B2B with over 40 years of existence.

Our products are focused on 7 different areas: Garden, Storage, Kitchen, Cleaning, Eco-friendly, Kids and Technical.

We work daily to develop innovative and sustainable products that ease up a normal family's day to day life. Since the design and development to its sustainable production, promoting the reduction of residues, the reusing of recycled materials. The circular economy is present in every process and its very important for us. In this sense we work with raw materials of BPA-free and 100% recyclable. We keep on searching for credited suppliers with the FSC certificate for our labeling and packaging.

We pretend to diminish to the max our carbon footprint, in 2024 we've managed to hit an autonomous energetic production of 50%, through a very strong bet, for the past 5 years, with photovoltaic energy and 100% electric machines.

At the start of 2024, ITP, S.A., compromised with the 10 principles of the United Nations Global Compact as an integral part of its business strategy and with 6 ODS (Sustainable Development Goals).
