

KozziECO

BUILDING A FUTURE FOR PEOPLE WITH PEOPLE

We optimize our production every day, with flow and **CIRCULAR ECONOMY** in mind. We develop products for continuous everyday use, with **BPA FREE** raw materials.

50% of our production comes from our photovoltaic energy source.
85% of our industrial park is made up of electric machines.

We take advantage of all non-con- formed parts and introduce them into our production process, guaranteeing **ZERO WASTE**.

Under the brand **KOZZIPLAST**, ITP - Indústria Transformadora de Plásticos, S.A. is a Portuguese enterprise of injected plastic products for the segment B2B with over 40 years of existence.

Our products are focused on 7 different areas:

Garden, Storage, Kitchen, Cleaning, Eco-friendly, Kids and Technical.

We work daily to develop innovative and sustainable products that ease up a normal family's day to day life. Since the design and development to its sustainable production, promoting the reduction of residues, the reusing of recycled materials. The circular economy is present in every process and its very important for us. In this sense we work with raw materials BPA Free and 100% recyclable. We keep on searching for credited suppliers with the FSC certificate for our labeling and packaging.

We are commitment with the United Nations Sustainable Development Group, to transform our business strategy day-to-day operations and organizational struture, into a better world. The 17 Sustainable Development Goals inspire us to define the 6 ITP S.A. goals for a responsible growth that impacts people's lives and planet.
