

# Penguin

Carton Opener

## Open your packages with the help of a penguin!

Your penguin friend can live by your door to help you open packages. Wedge its beak in and slide towards you to cut through tape with ease. Wait eagerly with your penguin friend for exciting packages from friends or your family.

### Open your packages as soon as they arrive

It is always useful to have something by your front door for opening packages. Sleek and easy to grip, with a sharp edge and a chic form factor, these little penguins are perfect for the job. The beak can also be used to puncture used packaging, or for peeling off the end of tape when you are dealing with a stubborn roll.

### The best materials for the job

Comes in either brass or fiberglass reinforced plastic. FRP contains glass fibers and nylon for unbeatable toughness. Brass, on the other hand, gives the opener a satisfying weight combined with an impressive metallic finish. The beak does not contain a separate blade, so it is safe to leave out in the open, and can also be used for decorative purposes.

### Designer comments

In a time with more home deliveries than ever, it good to have a helping beak at hand. This penguin can be used to open packages. Your penguin friend will stand by your door or on a table, waiting to help you open packages. Always helps to have a penguin watching out for you as you receive what life has to offer.

Yohei Oki

Born in Tokyo in 1984. Studied Spatial Design at Asagaya College of Art and Design. Winner of the Design Plus Award and Red Dot Design Award. After working for design firms such as nendo and id, he established his own company, "side inc." in 2019, where he works on design projects of all kinds.

### Colors and materials of the penguins

There is more to the penguin design than just the shape - the colors and textures were also selected with our favorite seabirds in mind. The brass in particular presents a subtle, uncomplicated beauty. And penguins are social birds - why not collect them all and create your own colorful colony?

#### Penguin

Size: Approx. W40×D30×H80mm  
Weight: Approx. 45g  
Material: Fiberglass reinforced plastic  
Made in Japan

Package size: Approx. W40×D30×H80mm  
Weight (Including package): Approx. 50g

Black / DA-1370-BK / 4582714120039  
Blue / DA-1370-BL / 4582714120046  
Red / DA-1370-RD / 4582714120053  
White / DA-1370-WH / 4582714120060

#### Penguin Gold

Size: Approx. W35×D30×H75mm  
Weight: Approx. 280g  
Material: Brass (Clear coating)  
Made in Japan

Package size: Approx. W90×D50×H30mm  
Weight (Including package): Approx. 300g

Gold / DA-1371-G / 4582714120077
