Opal Glass Pioneer

Opal glass has a distinctive, milky-white appearance that gives a unique and elegant look, which is made primarily of silica (SiO₂). The glass is melted in a furnace at 1400°C and then formed into a desired shape. After shaping, the glass is annealed and gothrough a special strengthen process, the result is a beautiful and versatile material that is excellently resistant to chips and thermal shocks.

SHULOPAL is the pioneer to bring this wonderful material to the tableware, storageware and kitchenware, with so colorful decoration.
