PRODUCT PORTFOLIO

GLASSWARE THAT MAKES WHISKY TASTE BETTER!

SAVU handmade whisky glass makes sensing whisky aromas easy for everyone. SAVU is the only science-proven and patented design glassware.

Try out the first tasting glass that truly makes a difference.

NEED FOR BETTER WHISKY GLASS

Alcohol is an essential part of whisky, but it is by no means the most important part. The character of whisky emerges from sensations evoked by its aromas. These natural aromas are what makes whisky such a special beverage.

Unfortunately, these aromas often remain hidden. This problem persists as long as our noses and our brains are numbed and overwhelmed by the evaporating excess alcohol fumes.

With our noses out of the picture we cannot really taste the whisky! There is a need for a better whisky glass.

THE FIRST FUNCTIONAL GLASSWARE

SAVU glass is scientifically developed handmade design product from Finland. The glass eliminates the disturbing and nose-numbing ethanol fumes allowing a full access to the rich aroma world of whisky.

The functionality of the glass is laboratory proven and patented since SAVU is the first truly functional glass.

EXPERIENCE AROMAS LIKE NEVER BEFORE

Aromas are the most important part of whisky. With SAVU glass everyone can enjoy these aromas freely without being disturbed by the normally dominating alcohol fumes.

SAVU is all about activity, learning and sharing. Enjoy!

FORM FOLLOWS FUNCTION

SAVU glass' unique design features stem from its scientifically proven functionality.

With any traditional glass the atmosphere above the glass - the bloom - is dominated by alcohol fumes.
Only SAVU glass is able to solve this age-old problem.

THE WAIST

prevents the evaporation of alcohol fumes into the nose

THE LEDGES

eliminate the overwhelming alcohol fumes for an optimal tasting experience

SCIENCE

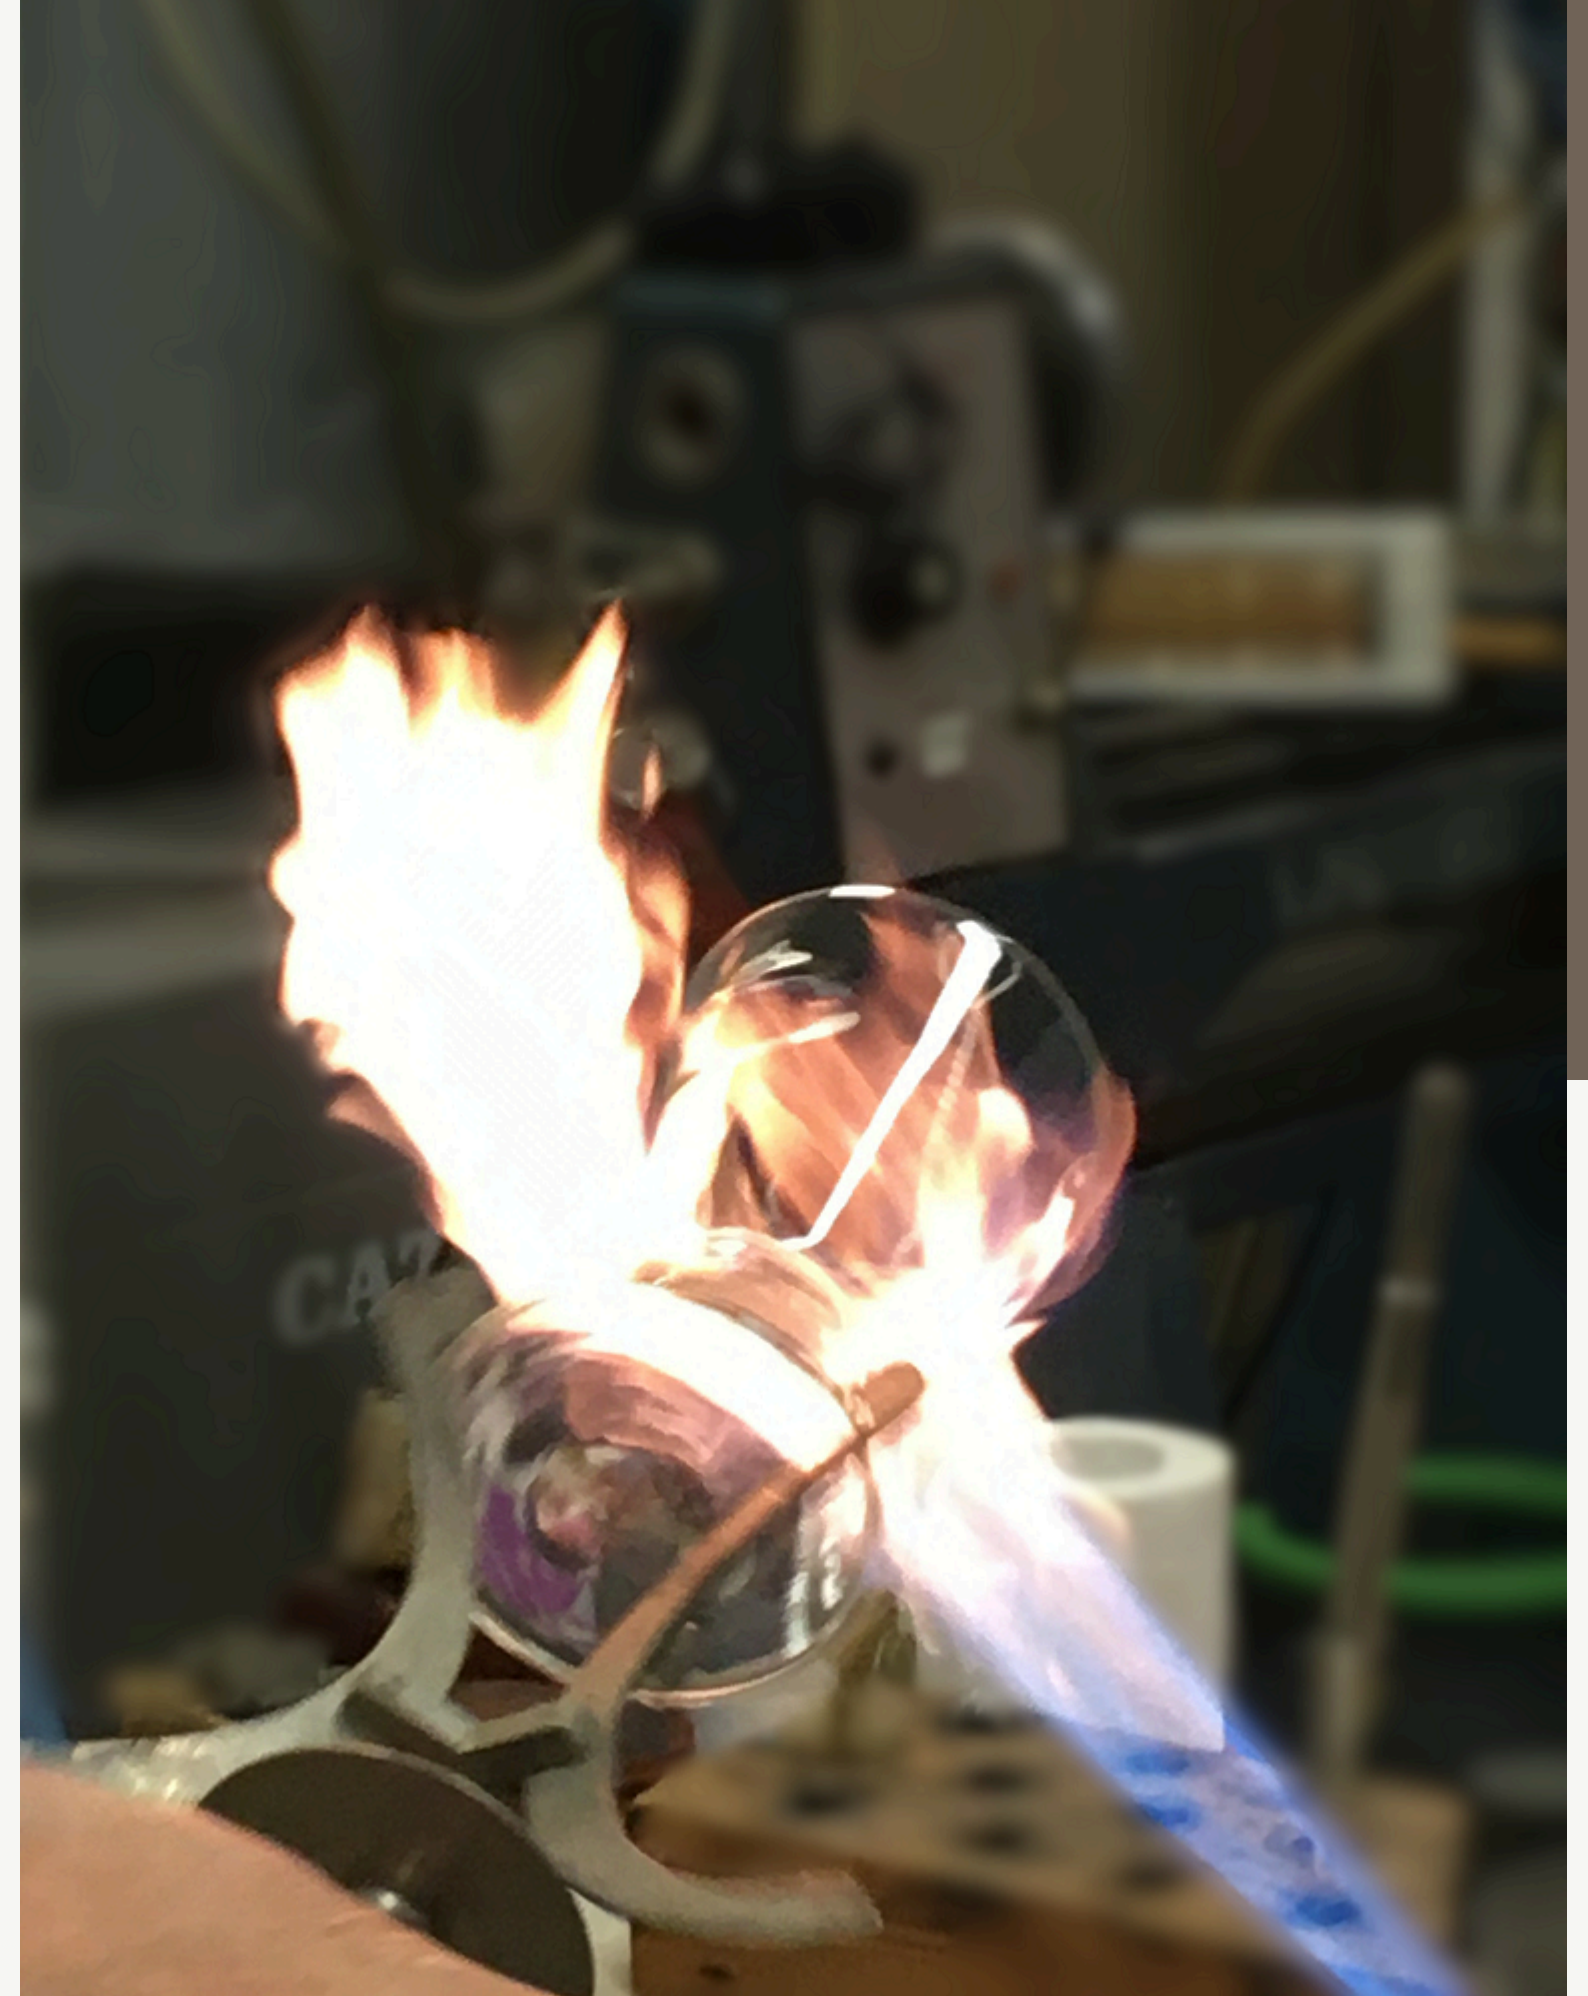

The data shows how in the traditional glass the alcohol content of the bloom remains at the nose-numbing level, whereas with SAVU glass alcohol is quickly eliminated and aromas can be experienced in their full glory.

Alcohol evaporation measurements were performed in the Department of Food Chemistry and Food Development of the University of Turku, one of Finland's leading universities.

HANCRAFED TO PERFECTION

Developed from a scientific idea and manufactured by master craftsmen, each SAVU glass is a unique piece that makes connoisseurs' hearts beat faster.

SAVU GLASS DUO

Sharing the moment

Includes two handmade SAVU whisky tasting glasses delivered in stylish packaging.

The elegant and light hourglass design with its ledges is handmade by our master glass blowers. Purest borosilicate glass ensures durability – SAVU is dishwasher safe. SAVU glass eliminates the ethanol burn so that everyone can enjoy the optimal whisky experience.

SAVU GLASS SOLO

Connosseurs treasure

SAVU Solo tube includes one SAVU whisky tasting glass.

The elegant and light hourglass design with its ledges is handmade by our master glass blowers. Purest borosilicate glass ensures durability – SAVU is dishwasher safe. SAVU combines chemistry with gastronomy and eliminates the ethanol burn – now everyone can enjoy the optimal whisky experience.

SAVU GLASS CARAFE SET

Accessory Whisky Carafe

Includes one handmade whisky carafe and two whisky-tasting glasses. The handmade carafe form complements the beauty of the whisky glass design.

What could be more festive than pouring good whisky from our unique carafe into your friend's SAVU glass. The spout of the decanter is shaped so that it is easy to pour the whiskey over the ledges of the SAVU glass. The design of the carafe follows the SAVU glass, and thanks to the depressions on the side, you can estimate the amount of whisky.

SAVU GLASS BISHOP

Accessory Whisky-Tasting Board

SAVU Bishop has been designed by cabinet maker Jari Karppinen from Karppinen Woodwork in Paaso, Finland, as a companion to SAVU whisky glass SAVU. The handmade Bishop brings sophistication to tasting moments. Two glasses and a bottle or carafe can fit on the board. Material is massive European oak.

SAVU Bishop elevates whisky tasting moments from man caves into living rooms.

BERNHARDT SCHÄFER

Master of the Quaich

Editor in Chief – Der Whisky-Botschafter

SAVU glass is a real innovation, and anything but a “me-too” product. After a short familiarisation phase, the glass is easy to get to grips with.

The sensory experience is clearly different and better than with conventional whisky glasses. Of course, this comes at a price, but the glass is very durable and stable. I love using it!

EVERYONE NOTICES THE DIFFERENCE!

100%.

You do not have to just rely on science and the laboratory results. Take a look at what how our customers answered to our questionnaire after trying out SAVU: 100% noticed the difference to traditional glasses!

93.3%.

According to the same questinnaire 93,3% of our customers find that SAVU glass met fully their expectations.
