

ITFDESIGN was established over 50 years ago by Walter Turolo founder and wood expert. Today, the company is managed and owned by Alberto Turolo, who represents the second generation of the founder's family.

In the late 80's Alberto joins the company with a plan: to produce a distinctive line of dining tables, in a District where was located, the major companies of the production of chairs of the world.

Design Makers since 1998, with the launch of a new generation of products called ITF 100% Design.

The factory strengthens its commitment to research, quality, innovation of techniques and experimentation with new materials. The designing aims to give shape to desires through a design based on emotion.

Design becomes the development of a line of thought, a path of research and experience and the factory becomes the vital centre of the whole production process; It's here that the designer and the technician work side by side, in a continuous exchange of ideas and knowledge.

A principle of production where tradition, rigour and quality research are well integrated to the constant testing of new materials and technologies, realised with the support of major Universities and Research Centres. This philosophy brought the company to patent a large number of models.

ITF DESIGN products undergo hi-tech processes and are manufactured using the most traditional and advanced materials: solid wood, porcelain stoneware, steel and aluminium alloys, polymeric materials. All models are checked through strict tests in order to guarantee conformity with the most important quality and safety standards.

The company carefully considers the stimulus coming from the design and art world as well as from the evolution of living, in order to create contemporary solutions which can meet all present-day needs.

The result is a collection of products having an essential style but with a strong identity, that becomes part of all environments: at home, in studying or working areas, indoor or outdoor.

Today the company is a reality of success on the international market and is active in both the contract and residential sector with proposals for any environment: homes, offices, places of study or work, hotels, bars and restaurants, indoors and outdoors.

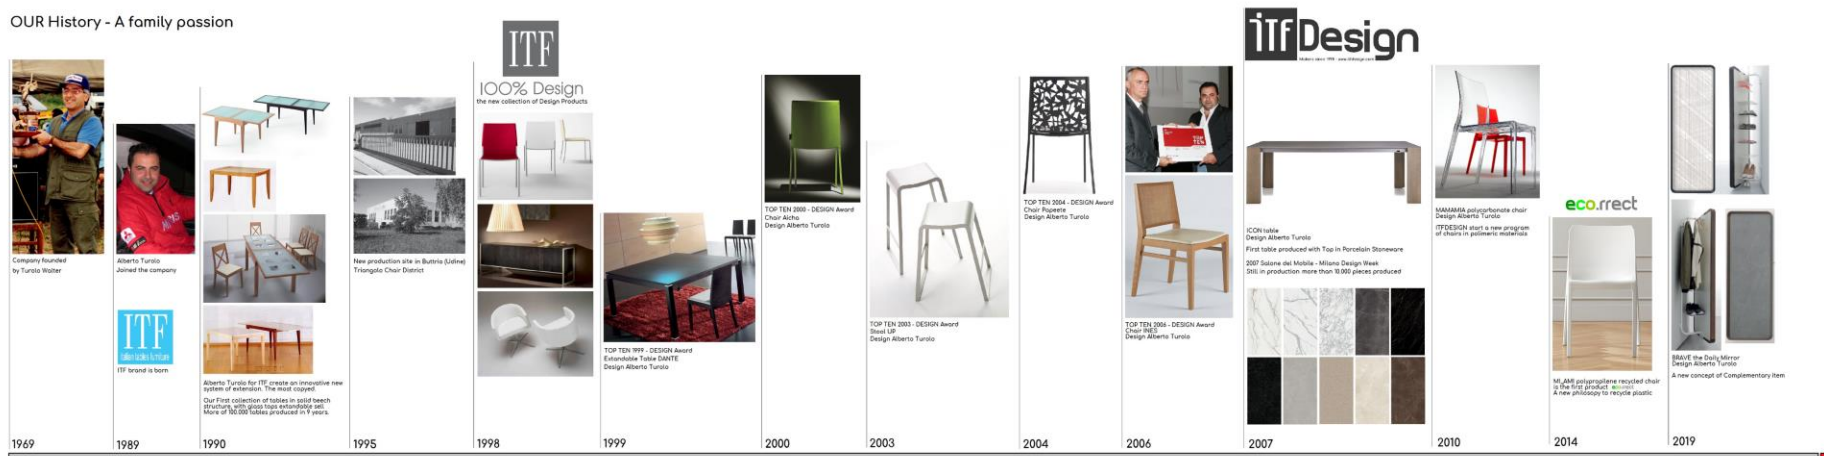

From our base in the north of Venice, we work with artisans, they knew from generations how to manufacture with passion, woods and new innovative materials, fusing our Italian mindset with global innovative skills & traditions. Our head office is located just in the famous District of the Chairs in Manzano (Udine), but our products are sold worldwide.

We never stand still, we are every day looking to take the next evolutionary step in the development of the next generation of ITFDESIGN products.

We are a design company with a focus on creativity and love in everything we do.

From design to production and all the way out in our partner's stores; that is why we are constantly on the lookout for talented individuals who share our passions. We take our responsibility to the planet and people seriously, and we expect the same from our partners and costumers. We crate a new line of products, become our mission for the future.. Eco.rrect concept.

OUR History - A family passion

A special thanks to our Worldwide Partners

design Alberto Turolo

itf Design

The X_LIGHT PLUS collection is a more sophisticated variant of the X_Light range of indoor / outdoor tables, covered with a natural ceramic that benefits from heat resistant, non-porous and scratch resistant qualities to maintain a high quality finish in any season. The design also features self-leveling legs for optimal functionality, perfectly balancing the uneven ground. It is available in different finishes with porcelain stoneware top in various marble or stone effect finishes.

Materiale e tecnologie:

Structure in steel sheet and legs in steel tube 35x35 mm treated in cataphoresis (for outdoor) with internal structural steel tie.

Finishes:

Painted in white, green, silk gray, stone gray or black for outdoor use. On request we can customize the color following the RAL or PANTONE scales.

Quick Ship: 80x80 Stone Grey, White Statuario - 100x80 Stone Grey, White Statuario

La collezione X_LIGHT PLUS è una variante più sofisticata della gamma X_Light di tavoli per interni/esterni rivestiti con una ceramica naturale che beneficia di qualità resistenti al calore, non porose e antigraffio per mantenere una finitura di alta qualità in qualsiasi stagione.

Il design presenta anche gambe autolivellanti per una funzionalità ottimale, bilanciando perfettamente il terreno irregolare. È disponibile in diverse finiture con piano in gres porcellanato in varie finiture effetto marmo o pietra.

Materiale e tecnologie:

Ripiano in lamiera d'acciaio e gambe in tubo d'acciaio 35x35 mm trattato in cataforesi (per outdoor) con tirante strutturale interno in acciaio.

Finiture:

Verniciato bianco, verde, grigio seta, grigio pietra o nero per outdoor. Su richiesta possiamo personalizzare il colore seguendo le scale RAL o PANTONE.

Quick Ship: 80x80 Grigio Pietra o Bianco Statuario - 160x80 Grigio Pietra o Bianco Statuario

The story behind this Collection

Designed with sustainability in mind, the exclusive OX_35 table&bench collection and Calle 8 seat collection is a range of outdoor furniture that's sleek, comfortable and easy to manoeuvre.

The table brings new perspectives to modern outdoor furniture through its straight lines alongside the folded edges, halfcircular intersecting legs.

Kept visually clean for long-lasting aesthetics, the Linear Steel Table finds its distinct character through subtle detailing and a simple expression, allowing for it to complement any outdoor setting.

Pair the tables with the bench, Calle 8 stackable armchairs and side chairs for sophisticated alfresco fun. The chairs Calle 8 are made in Recycled Aluminium.

The Collection is designed in proportions that allow for it to slide easily under the table.

Steel is an alloy of iron with carbon.

Powder Coated + cathodolysis finishing steel has a subtle, textured expression and elegant feel while adding durability to the design and making it more resistant to corrosion.

Powder coated steel is also highly chip resistant.

The tables can be topped in the version PLUS, with a porcelain stoneware marble effect which benefits from heat resistant, non-porous and scratch-proof qualities to maintain a high-quality finish whatever the season.

The design also features self-levelling legs for optimum functionality, seamlessly balancing out uneven ground.

The logo for eco.rrect features the word "eco" in a vibrant green color and ".rrect" in a dark grey color, both in a lowercase, sans-serif typeface.

The overall aesthetic is modern and technical, suggesting themes of connectivity, data, or design.

EMMA

Design Alberto Turolo

- **A New Philosophy. A collection made with an eco.rrect story.**

Environmentally friendly or environment friendly, (also referred to as eco friendly, nature friendly, and green) are sustainability and marketing terms referring to goods and services, laws, guidelines and policies that claim reduced, minimal, or no harm upon ecosystems or the environment.

What Does Eco Friendly Mean?

In recent years, terms like "going green" and "eco friendly" have become buzz words on talk shows, commercials and product packaging.

The term "eco friendly" has been used for so many different products and practices, its meaning is in danger of being lost.

By understanding the true meaning of eco friendly, you can implement the practices that will lead to healthier living for the planet and its inhabitants, big and small.

Eco friendly literally means earth friendly or not harmful to the environment.

This term most commonly refers to products that contribute to green living or practices that help conserve resources like water and energy.

Eco friendly products also prevent contributions to air, water and land pollution.

Product Qualifications

Making a truly eco friendly product keeps both environmental and human safety in mind. At a minimum, the product is non toxic.

Other eco friendly attributes include the use of sustainably grown or raised ingredients, produced in ways that do not deplete the ecosystem.

Organic ingredients or materials are grown without toxic pesticides or herbicides.

Products with "made from recycled materials" contain glass, wood, metal or plastic reclaimed from waste products and made into something new. Biodegradable products break down through natural decomposition, which is less taxing on landfills and the ecosystem as a whole.

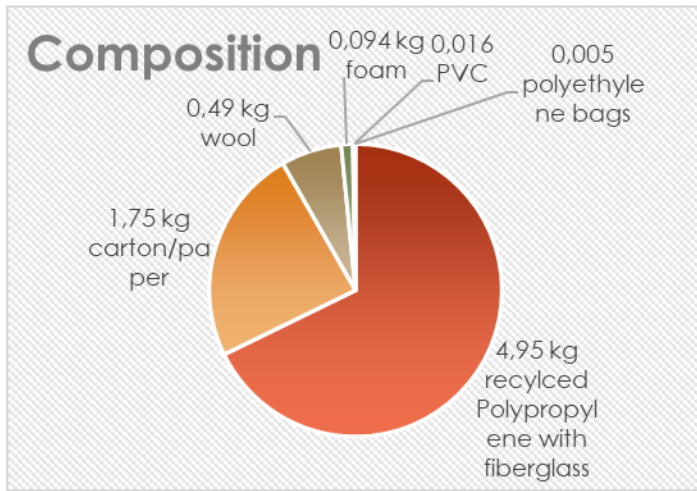

We construct design furniture, by utilising innovative and modern technology in conjunction with natural and eco friendly construction materials.

We are trying to use and offer you the choice of using our preferred range of innovative organic materials, together with recycled, or recyclable material like plastic, ceramic and timber.

Eco.rrect

"Usually an ecological or organic product is more expensive than a "normal" product. The idea of creating a true eco friendly product is to study it and develop it not only for an exclusive and rich market, but must be used for most of the market, where the greatest number of people can buy it, enjoy it, and recycle at the end, because an eco compatible product cannot become a waste."

X_LIGHT

Design Alberto Turolo

X_Light

Un rifacimento di una delle famiglie iconiche di ITF design con più up-to date e un'identità moderna.

I piani sono integrati nel telaio e sono disponibili in legno spessore 33 mm, in rovere naturale o tinto tabacco con un innovativo pannello alveolare composito ad alta pressione.

Questa innovazione tecnologica permette al piano di raggiungere dimensioni importanti, mantenendo la planarità in un intervallo accettabile e una notevole leggerezza.

Le gambe sono realizzate in acciaio composito estruso, sezione 35x35 mm, con una barra di supporto centrale in acciaio standard e sono impiallacciati in rovere per un match perfetto con la parte superiore, con una giunzione dettagliata intelligente.

Tutta la collezione è disponibile per una grande famiglia di tavolini, dove è possibile utilizzare gli stessi optional delle consolle, per creare tavolini iconici, con o senza cassetti.

X_Light è raccomandato solo per uso interno.

A makeover of the ITF Design iconic family tables with a more up-to date and modern identity.

Tops are built-into the frame and are available in wood 33mm thickness, with European Oak natural or Tabacco stained with an innovative high-pressure honeycomb sandwich panel composite.

This technological innovation allows the top to reach important sizes, maintaining the flatness in a acceptable range and a considerable lightness.

Legs are made in extruded steel composite, section 35x35 mm, with a standard central steel support bar, and are veneered in oak for a perfect match with the top, with an clever junction detail.

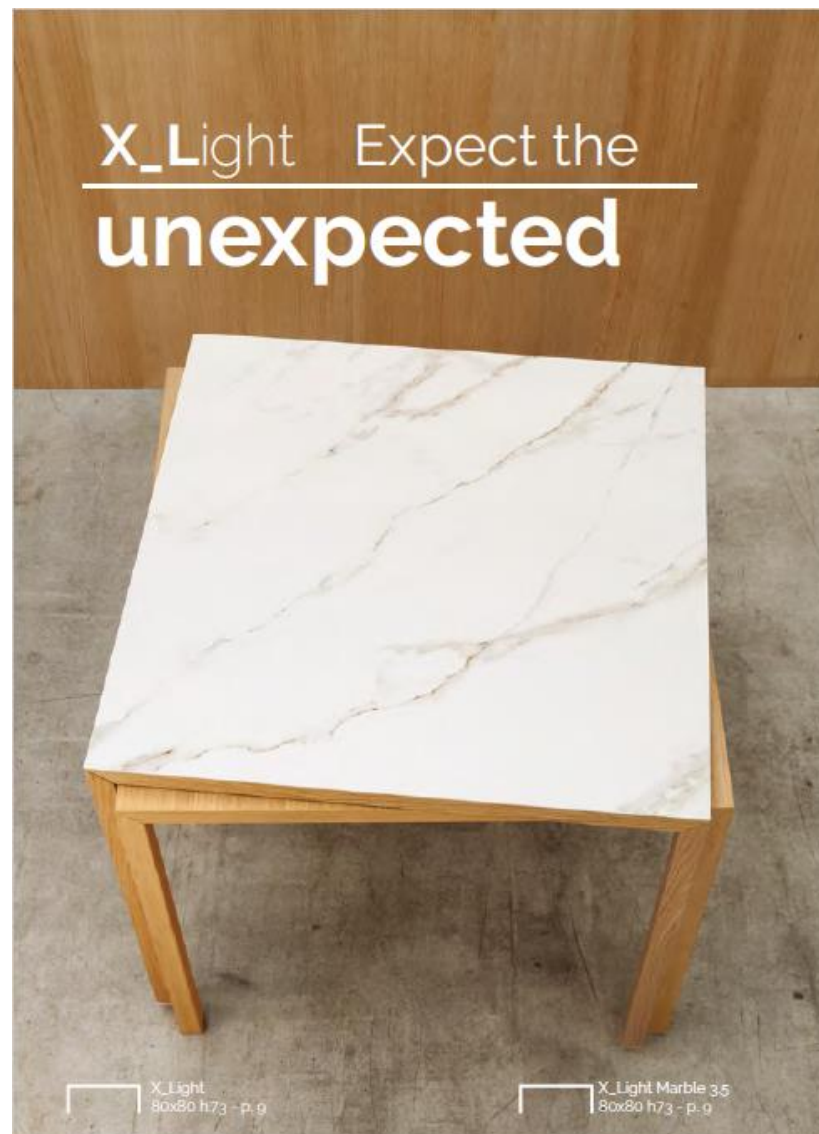

All the collection is available for a large family of coffee tables, where is possible to use the same optionals of the consoles, to create iconic tables, with or without drawers.

X_Light is recommended for indoor use only.

La leggerezza, unita alle proprietà meccaniche ed all'eccezionale stabilità dimensionale dei pannelli compositi alveolari vengono molto apprezzate in tantissimi campi come quello dell'arredamento, dal domestico al professionale, in ambito navale e ferroviario, addirittura in quello aerospaziale.

The lightness, combined with outstanding mechanical properties and dimensional stability of the composite honeycomb panels are very popular in many fields such as furniture, from the domestic to the professional naval rail and even aerospace.

BRAVE
Ceramic&Wood Options

BRAVE

designed by Alberto Turolo & Veronica Balutto

What is it? A mirror? A hanger? A shoe rack? A storage unit or a bathroom furniture?

Brave, can be all this.

Brave is an innovative and courageous creation, but above all, it's useful. Brave solves.

Thanks to its depth of only 33 cm, Brave, is a storage unit that moves with 40 ° door opening on the right or left and lends itself to being inserted in the most diverse spaces.

Brave is a "hide objects" adaptable in various situations of indoor furniture:

- in the Home as a clothes hanger or shoe rack; Brave, is the entrance cabinet that was missing.
- in the Office, as a container / dox holder thanks to the personalized shelves, it becomes a super personal container for every single workstation.
- in the Hotel, Brave has allowed to eliminate the wardrobe and the mirror in one fell swoop, thus making unexpected spaces gain.
- in the bathroom, Brave solves the spaces and hides the towels, the towels and the bathrobes as well as being a functional mirror when needed.

Accessorized in 4 different configurations in the back, it can be customized in the finishes of the solid ash wood structure masterfully worked by our master cabinetmakers.

But it is in the front that you can use the most different and particular finishes, from wood to the mirror, but also the "ultra thin" ceramics, or the leather, the fabrics, etc .. thus coordinating the existing furnishings or creating continuity for newly designed furnishings.

Equipped with a rotating structure in opaque white painted metal tube, coordinated with the shelves, Brave, can be customized on request for projects.

Brave is a furnishing element at the same time simple and ingenious, with minimal and elegant aesthetics, the multiple use is a refined and functional container in all the details. Easy to install on the wall, it does not require any maintenance.

Brave, finally a brilliant product innovation.
