Angelina is an icon of style and innovation that brings colour to your kitchen. Born in the Distretto del Casalingo and skilfully crafted by Fonderia Alfredo Togno since 1938, Angelina embodies the excellence of Made in Italy.

With a fresh and contemporary design, Angelina fits perfectly in any kitchen style, offering a vibrant range of colours for your coffee break. Functional and versatile, it is ideal for both induction and traditional kitchens.

The design was created by Barbara Togno, who strongly wanted to surround herself with a team of talented women to develop it. This choice reflects her commitment to value the female contribution at every stage of the creative process. Starting with architect Delia Firpo, passing through Luz, Esra and Ilenia, each team member brought their creativity, experience and dedication, contributing to the success of the collection.

This synergy has resulted in a high quality coffee maker with attention to every detail, combining tradition, innovation and design. Choose from different models and colours, customize the components and admire the illustrations by Massimo Caccia.

Made of recyclable aluminium, Angelina promotes sustainable and environmentally friendly consumption.

With Angelina, rediscover the authentic pleasure of Italian coffee and enjoy every cup with the consciousness of making a stylish and sustainable choice. 100% Made in Italy.

Welcome to the world of

A journey through "Distretto del Casalingo" The "Distretto del Casalingo" (Housewares District), located in Verbano Cusio Ossola nestled between the shores of Lake Maggiore and the mountains of Piedmont, is an area where design meets tradition.

Since the early 1900s, companies in this area have been able to anticipate living trends, introducing innovations that have transformed the kitchen into an increasingly functional and welcoming space.

An example of this excellence is the 'Lago Maggiore Casalinghi" brand, established in 2006 to guarantee consumers the quality, care in manufacturing, tradition and ethics that have always characterised the products of this area.

The Housewares District is a pole of innovation in the home goods sector, with a particular focus on the production of coffee makers, iconic objects of Italian design appreciated worldwide. Here, the passion for beauty and craftsmanship is passed down from generation to generation, creating unique and high-quality products.

Since 1938, Fonderia Alfredo Togno has contributed to making the "Distretto del Casalingo" famous with its work of the highest quality.

The Alfredo Togno foundry manufactures high quality, precision components for various sectors, from medical to lighting, from automotive to furniture, to design, fashion and cosmetics.

To guarantee the highest quality, the company follows each stage of the production process in-house, from co-design to production and finishing, with quality control certified according to the standards

ISO 9001: Quality Management System,

ISO 14001: Environmental Management System,

ISO 50001: Energy Management System and,

ISO 45001: Occupational Health and Safety Management System

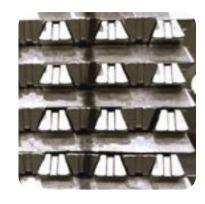

Particularly sensitive to environmental issues, Fonderia Alfredo Togno uses a photovoltaic system to produce energy and also procures from renewable sources. The company constantly invests in cutting-edge technologies to reduce emissions and optimise energy consumption, making a concrete contribution to a sustainable aluminium supply chain.

Joining Assofond, the Italian Foundry Association, in 2021 has further strengthened the company's leadership position in the sector.

Fonderia Alfredo Togno represents an example of excellence in the Italian manufacturing scene, capable of combining tradition with innovation and a strong commitment to sustainability.

You know

tradition innovation design

Fonderia Alfredo Togno has decades of solid experience in the production of aluminium components for Italy's most renowned coffee maker brands, helping to shape the aesthetic and functional evolution of these iconic instruments, an integral part of Italian history. Thanks to this vast experience, in May 2024, the 'Angelina' project was born: a new line of coffee makers that combines styling, functionality and a deep connection with traditional craftsmanship, with the ambitious aim of innovating the sector.'

The primary objective is to create a line of coffee makers that embodies the distinctive values of quality and design of the homeware district, addressing a young and dynamic public. The project aims to bring the elegance of Italian design into everyday life, with a focus on customisation, practicality of use and technological innovation.

A crucial element in the development of Angelina is the commitment to environmental sustainability. The traditional coffee maker represents an ecological and responsible choice compared to disposable capsules or pods, which produce a considerable amount of waste. The use of recyclable aluminium to make Angelina is actively contributing to reducing environmental impact, promoting more sustainable and profitable coffee consumption.

We proudly present the Angelina collection: 100% made-in-Italy coffee makers born in the heart of Italian tradition, carefully crafted in the home district. We select the best materials and combine the art of our experts with the most advanced technologies to offer you a product that embodies true Italian style.

Angelina coffee makers are designed for every kitchen: they work on both induction and conventional cook-tops. Their special design allows you to obtain a coffee with a rich and intense taste, just as tradition dictates. At the moment, you can choose between 3- and 6-cup models, available in the Classic, Base, Sand and Corinna by Angelina lines, perfect for every occasion. But it doesn't end there: we are already working on new 1- and 12-cup versions to satisfy all needs.

There is a further unique touch: every coffee maker in the Angelina collection is accompanied by exclusive illustrations by the renowned Italian illustrator Massimo Caccia. His drawings, inspired by nature and animals, such as the dragonfly, the hummingbird and the orange fish, add an artistic and distinctive element.

Each year, new editions with unique illustrations will enrich our collection, always offering something new and special.

The Angelina collections 100 % Made in Italy

The refined and functional design of Angelina coffee makers makes them a real jewel for your kitchen, harmoniously blending tradition and innovation to offer you impeccable coffee.

The ergonomic handle is designed to prevent burns and ensure a secure grip during the use. In addition, the spout is designed for precise pouring, avoiding annoying drips.

The structure of the Angelina coffee maker, made of aluminium and stainless steel, consists of:

- Base or boiler: the tank where the water is poured.
- Central funnel filter: contains the ground coffee.
- Plate filter: prevents the passage of coffee powder residues.
- Upper part or collector: where the ready coffee is collected.
- Stainless steel safety valve: regulates the internal pressure during preparation

# Technical characteristics of

#### Characteristics of stainless steel valves:

- Durable material: stainless steel is robust, durable and corrosion-resistant, ensuring a long service life compared to valves made of less valuable materials.
- Precise pressure regulation: the valve controls the steam flow, maintaining the perfect pressure during coffee extraction.
- Easy cleaning: stainless steel is easy to clean and does not retain residues or smell, ensuring more hygienic coffee preparation.
- Safety: thanks to its high resistance, it reduces the risk of malfunctions such as blockages or pressure loss, offering safer use.

All our Angelinas have steel valves to offer increased safety and consistent quality over time, making them an ideal choice for people who are looking for reliability and high performance.

#### Linea Classica

The Angelina Linea Classica coffee maker is specifically designed for use on gas cookers, guaranteeing traditional coffee preparation that brings out authentic aromas and flavours.

Made from high-quality materials such as aluminium and stainless steel, it ensures an even distribution of heat, which is essential for obtaining rich, full-bodied coffee.

Its simple and modern design is available in various colours and finishes, allowing you to choose the version that best suits your style.

The Angelina Linea Classica coffee maker is ideal for people who appreciate the traditional method of coffee preparation, offering a rich aromas and a pleasant brewing process that allows direct control over the final result.

Available in 3 and 6 cup capacities, with future 1 and 12 cup variants

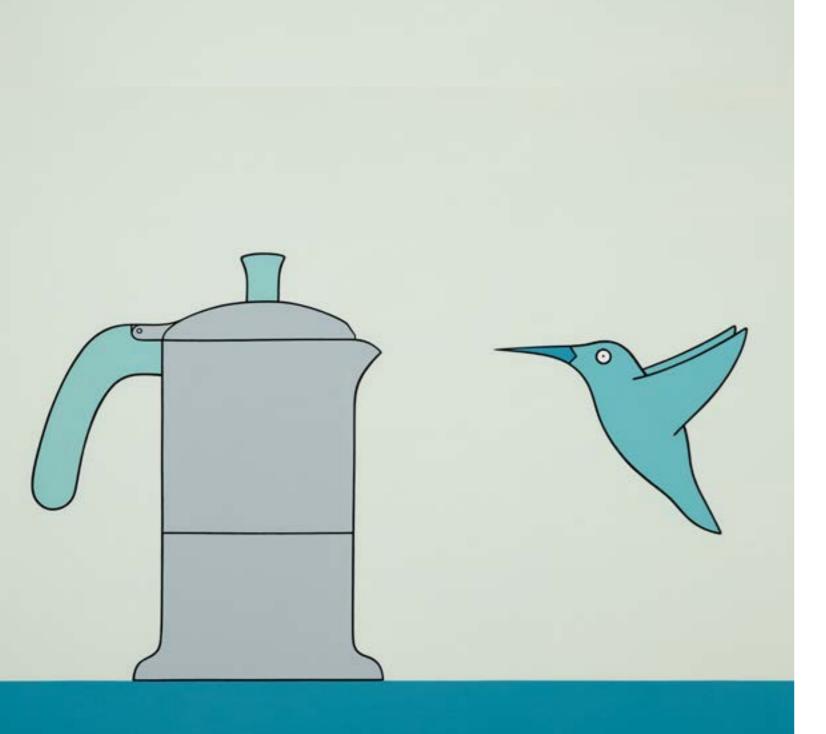

# Linea Base and Sand

The Angelina Linea Base and Sand coffee makers are designed to offer a versatile and modern coffee experience, compatible with induction, electric and gas hobs.

Made of lightweight, durable aluminium, it guarantees even heat distribution, ensuring optimal extraction for aromatic, flavour-rich coffee.

Its simple, modern design is available in various colours and finishes, allowing you to choose the version that best suits your style.

The Angelina Linea Base and Sand coffee maker is ideal for people who appreciate the traditional method of coffee preparation, offering a richly aromatic yield and a pleasant brewing process that allows direct control over the final result.

Available in 3 and 6 cup capacities, with future 1 and 12 cup variants.

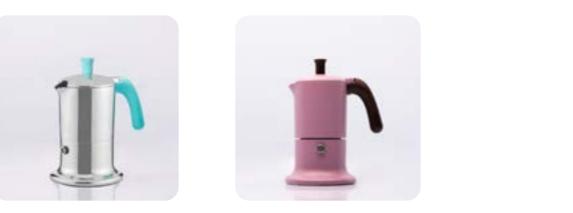

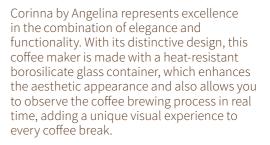

# DO YOU FEEL THE FLAVOUR?

The lightweight yet durable aluminium base ensures optimal heat distribution, enabling rich, aromatic coffee to be prepared quickly. The coffee maker is compatible with induction, electric and gas hobs, offering versatility and practicality in the kitchen.

Available in chrome or black finish, Corinna by Angelina stands out for its sophisticated design and its ability to combine tradition with innovation, making it a perfect design object for any modern kitchen. It combines high performance with refined aesthetics, creating a perfect balance between functionality and beauty.

Available in 3- and 6-cup capacities, with future 1- and 12-cup variants.

# TASTE TAKES SHAPE

# CORINA

The Angelina coffee maker is an ecological and sustainable choice for coffee lovers.

Made of aluminium, a light and resistant material, it guarantees even heat distribution and long life. Its structure is completely recyclable, helping to reduce environmental impact.

Using 'Angelina' offers significant energy savings per cup, compared to pod or capsule machines. In addition, 'Angelina' generates less waste per cup, consisting mainly of the packaging of ground coffee, while pods and capsules respectively produce much more waste per unit.

By choosing the Angelina, you adopt an environmentally friendly method of coffee preparation, reducing energy consumption, waste generation and carbon footprint, thereby contributing to a more sustainable future, one coffee at a time.

An ecologically sustainable choice

## **Customise** your

Angelina coffee makers offer a unique customisation experience, allowing you to express your personal style in the kitchen. You can choose from a current range of 12 exquisite colours for the body of the coffee maker, combining them with handles and pommels available in 7 different shades. This combination allows you to create a coffee maker that perfectly reflects your taste.

In addition, you have the possibility to purchase additional handles and pommels, allowing you to easily renew the look of your coffee maker whenever you wish. The modular design makes it easy to replace these components, giving you the freedom to change the look of your coffee maker according to your mood or kitchen décor.

We are constantly working to expand customisation options, introducing new colours and decorative patterns for you to discover. This attention to detail and our customers' preferences transforms Angelina coffee makers into ideal tools for making great coffee and into truly customisable design elements that add a touch of elegance and innovation to your kitchen.

Angelina coffee pots are an environmentally friendly choice for your corporate gifts or special events. Made from sustainable materials and designed to last, they contribute to the reduction of waste from disposable products.

All our Angelinas can be customised with your company logo, names or specific illustrations, offering a unique opportunity to reinforce your brand identity in an environmentally responsible way. This combination of sustainability and personalisation makes Angelina coffee pots the perfect gift to promote ecological values and leave a lasting impression.
