THE ADVANTAGES OF BOROSILICATE GLASS

Borosilicate glass is produced at extremely high temperatures, giving it special properties. It is extremely sturdy. It can safely handle oven temperatures up to 560°C / 1040°F, and freezer temperatures as low as -40°C / -40°F. Borosilicate glass can also handle immediate temperature changes of up to 120°C / 248°F. Our borosilicate food containers, baking dishes, mixing bowls and casseroles are safe for use in the oven, microwave, dishwasher and freezer.

Borosilicate glass is completely transparent and non-porous, so it won't absorb food odors or flavors, and won't ever stain. Its smooth surface is highly hygienic and resists corrosion. Our heavy duty lock down levers and silicone seals work well with the borosilicate, so the containers are leak proof.
